Maintenance

Once assembled, your nanoblock model requires minimal maintenance.

- **Cleaning:** To clean your model, gently dust it with a soft brush or a can of compressed air. Avoid using water or harsh cleaning agents, as these may damage the blocks or cause them to lose their grip.
- **Storage:** Store your assembled model in a stable location to prevent accidental disassembly. Keep loose blocks in a secure

container.

- **Disassembly:** If you wish to disassemble the model, do so carefully to avoid breaking or bending the small pieces.

Troubleshooting

- **Missing Pieces:** While rare, if you find a piece missing, double-check your workspace and the packaging. If still missing, contact customer support (see Warranty & Support section).
- **Difficulty Assembling:** nanoblocks are very small and require fine motor skills. If you find a step challenging, try using tweezers for better grip and precision. Ensure you are using the correct block type and orientation as shown in the instructions.
- **Model Instability:** If your model feels unstable, re-examine the most recently assembled layers to ensure all blocks are firmly pressed together.
