## nzonpet PU50

# nzonpet Anti Barking Device User Manual

Model: PU50 | Brand: nzonpet

## INTRODUCTION

The nzonpet Anti Barking Device is a versatile 3-in-1 tool designed to assist dog owners with training and bark control. Utilizing ultrasonic technology, it provides a safe and effective method to manage unwanted canine behaviors. This manual will guide you through the device's features, setup, operation, and maintenance to ensure optimal performance and a harmonious relationship with your pet.

## PRODUCT FEATURES

- **3-in-1 Functionality:** Combines ultrasonic bark deterrence, a beep training mode, and an LED flashlight for comprehensive training and control.
- **Multiple Frequency Modes:** Emits ultrasonic sounds at 3 different frequencies (stable, undulating, irregular) to prevent dogs from becoming accustomed to a single frequency.
- **Ergonomic Design:** Lightweight and comfortable to hold, designed for easy portability during indoor and outdoor activities.
- **Long-Lasting Rechargeable Battery:** Features a 300mAh lithium battery, fully rechargeable in 1-2 hours, providing up to 12 days of use and 15 days of standby time.
- **High-Power LED Flashlight:** Enhances safety in low-light environments, with options for continuous light or flashing.
- **Effective Range:** Operates effectively up to 16.4 feet (5 meters).

## PACKAGE CONTENTS

Please ensure all items are present in the package:

- 1 x Ultrasonic Bark Control Device
- 1 x Pet Training Clicker
- 1 x USB Charging Cable
- 1 x Wrist Strap for Ultrasonic Device
- 1 x Instruction Manual

Figure 4: All components included in the nzonpet Anti Barking Device package.

## SETUP

### Charging the Device

1. Locate the USB charging port on the device.

2. Connect the provided USB charging cable to the device and a compatible USB power source (e.g., computer, USB wall adapter, power bank).
3. The charging indicator light will illuminate. A full charge typically takes 1 to 2 hours.
4. Once fully charged, the indicator light may change color or turn off, depending on the device's design. Disconnect the charging cable.

A full charge provides up to 12 days of usage and 15 days of standby time.

## OPERATING INSTRUCTIONS

The nzonpet Anti Barking Device features three main buttons for its various functions:

Figure 6: Detailed view of the device's control buttons.

### 1. Ultrasonic Mode (Deterrent & Train)

This mode emits a high-frequency ultrasonic sound, inaudible to most humans but effective for dogs. It is used to deter unwanted behaviors such as excessive barking, digging, or jumping.

- **Activation:** Press and hold the **Ultrasonic Button** (bottom button with sound wave icon).
- **Frequency Adjustment:** The device offers three frequency settings (Stable, Undulating, Irregular) to prevent dogs

from becoming desensitized. Use the side switch to cycle through these frequencies. Experiment to find the most effective setting for your dog.

- **Usage:** When your dog exhibits an unwanted behavior, point the device towards them and press the Ultrasonic Button. Release the button as soon as the behavior stops. Consistency is key for effective training.

## 2. Beep Training Mode

This mode emits an audible beep sound, useful for positive reinforcement training or to get your dog's attention.

- **Activation:** Press the **Beep Button** (middle button with speaker icon).
- **Usage:** Use the beep sound in conjunction with commands or desired actions. For example, beep and then reward your dog when they perform a command correctly.

## 3. LED Flashlight Mode

The built-in LED flashlight provides illumination and can also be used as a visual cue during training or for safety in low-light conditions.

- **Activation:** Press the **Light Button** (top button with light bulb icon).
- **Continuous Light:** A short press will turn the light on continuously.
- **Flashing Light:** A long press will activate the flashing light mode.
- **Deactivation:** Press the Light Button again to turn off the light.

### USAGE GUIDELINES AND IMPORTANT INFORMATION

- **Effective Range:** The ultrasonic function is most effective within a range of 16.4 feet (5 meters).
- **Hearing Impairment:** This device may not be effective for dogs with hearing problems.
- **Age Recommendation:** It is not recommended for use on dogs under six months or above 8 years old.
- **Training Required:** Consistent and patient training is crucial for achieving highly effective and long-lasting results. The device is a training aid, not a magic solution.
- **Safety:** The ultrasonic sound is designed to be harmless to both dogs and humans, operating at frequencies (22-25KHz) beyond the typical range of human hearing.
- **Environmental Use:** Suitable for both indoor and outdoor use.

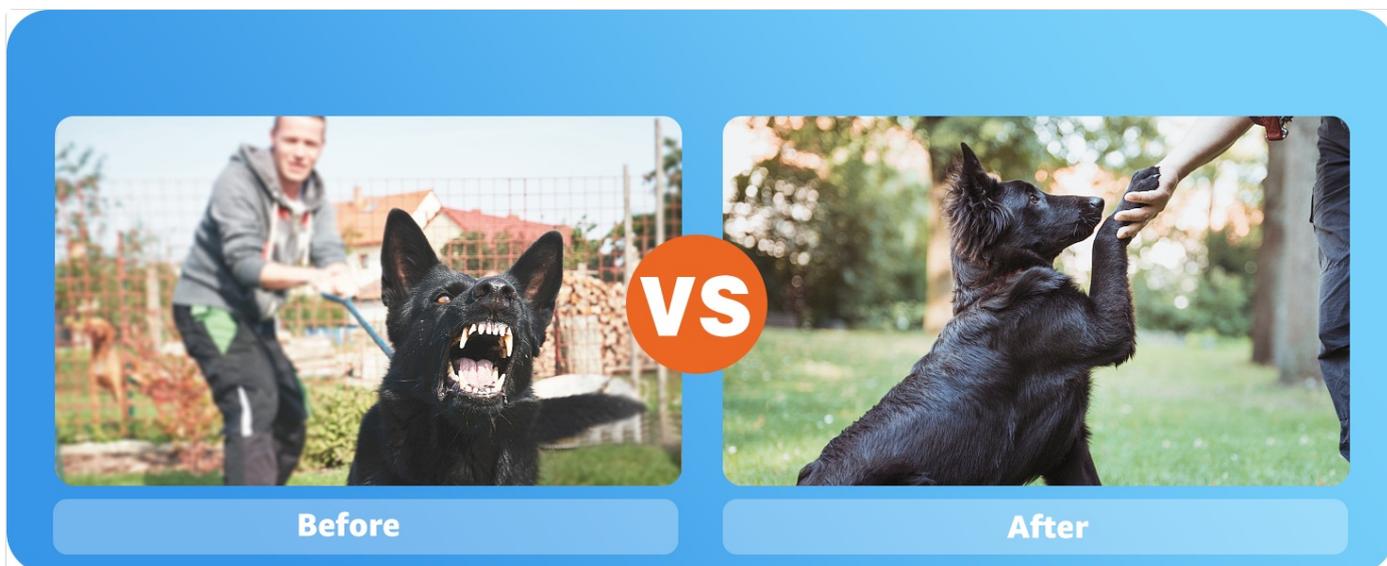

Figure 8: The device can be used to address various behavioral issues and for general training.

Figure 9: The device emits ultrasonic frequencies safe for both pets and people.

## MAINTENANCE

To ensure the longevity and proper functioning of your nzonpet Anti Barking Device, follow these maintenance guidelines:

- **Cleaning:** Wipe the device with a soft, dry cloth. Do not use harsh chemicals or abrasive cleaners.
- **Storage:** Store the device in a cool, dry place away from direct sunlight and extreme temperatures when not in use.
- **Battery Care:** Avoid fully depleting the battery frequently. Recharge the device regularly, even if not used for extended periods, to maintain battery health.
- **Water Exposure:** The device is not waterproof. Avoid exposing it to water or high humidity.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Device not turning on/responding.	Low or depleted battery.	Charge the device fully (1-2 hours).
Ultrasonic function seems ineffective.	Dog may have hearing issues or is accustomed to the frequency. Device is out of range.	Ensure the device is within 16.4 ft (5m). Try switching to a different frequency mode (Stable, Undulating, Irregular). Ensure your dog does not have hearing problems. Consistent training is essential.
LED flashlight not working.	Low battery or malfunction.	Charge the device. If the issue persists after charging, contact customer support.
Device not holding a charge.	Battery degradation or faulty charging cable/port.	Try a different USB charging cable and power source. If the problem continues, the battery may need replacement or the device may be faulty. Contact customer support.

## SPECIFICATIONS

Attribute	Detail
Model Number	PU50
Brand	nzonpet
Item Weight	4.2 ounces (approx. 119 grams)
Product Dimensions (LxWxH)	3.52 x 1.65 x 1.14 inches (approx. 8.94 x 4.19 x 2.90 cm)
Battery Type	1 Lithium Polymer battery (included)
Battery Capacity	300mAh
Charging Time	1-2 hours
Usage Time (per charge)	Up to 12 days
Standby Time	Up to 15 days
Effective Range	Up to 16.4 feet (5 meters)
Ultrasonic Frequency	22-25KHz
Color	Black
Manufacturer	Nzonpet

## WARRANTY AND SUPPORT

### Warranty Information

The nzonpet Anti Barking Device comes with a **1-year warranty** from the date of purchase. This warranty covers manufacturing defects and issues arising from normal use.

### Customer Support

If you encounter any issues with your device or have questions regarding its operation, please contact our professional after-sales team. We are committed to assisting you in resolving any problems.

In cases where the device is deemed ineffective for your dog despite proper use and training, we offer free replacements or refunds without requiring you to return the product. Please reach out to our support team for assistance.

For further assistance, please refer to the contact information provided on the product packaging or the official nzonpet website.
