5. MAINTENANCE

5.1 Cleaning Your Device

- Use a soft, lint-free cloth to clean the screen and body of the phone.
- For stubborn smudges, slightly dampen the cloth with water or a screen cleaner designed for electronics.
- Avoid using harsh chemicals, abrasive materials, or aerosol sprays directly on the device.
- Do not expose the device to excessive moisture.

5.2 Battery Care

- Avoid extreme temperatures, both hot and cold, as they can degrade battery life.
- Use only the original or certified compatible chargers and cables.
- While the device supports fast charging, occasional slower charging can help prolong battery health.
- Avoid completely draining the battery frequently. Charge it before it drops below 20%.

5.3 Software Updates

Regularly check for and install software updates to ensure optimal performance, security, and access to new features.

- Go to *Settings > System > System updates*
- Connect to a stable Wi-Fi network and ensure your battery is sufficiently charged before initiating an update.

6. TROUBLESHOOTING

This section addresses common issues you might encounter with your OnePlus 9 Pro.

Problem	Possible Solution
Device not turning on	Ensure the battery is charged. Connect to the charger for at least 15 minutes, then try powering on. If unresponsive, perform a force restart by holding the Power button and Volume Up button simultaneously for 10-15 seconds.
Apps crashing or freezing	Close and reopen the app. Clear the app's cache and data (<i>Settings > Apps & notifications > See all apps > [App Name] > Storage & cache</i>). Update the app from the Google Play Store. If the issue persists, uninstall and reinstall the app.
Poor battery life	Check battery usage in <i>Settings > Battery</i> to identify power-hungry apps. Reduce screen brightness, disable unnecessary features (Bluetooth, GPS, Wi-Fi when not in use). Enable battery saver mode.
Network connectivity issues (Wi-Fi/Mobile Data)	Toggle Wi-Fi/Mobile Data off and on. Restart the device. Reset network settings (<i>Settings > System > Reset options > Reset Wi-Fi, mobile & Bluetooth</i>). Ensure your SIM card is properly inserted and activated.
Fingerprint sensor not working	Ensure your finger is clean and dry. Re-register your fingerprints in <i>Settings > Security & lock screen > Fingerprint unlock</i> . Ensure the screen is clean and free of protectors that might interfere.

6.1 Factory Reset

A factory reset will erase all data from your phone and restore it to its original factory settings. This should be a last resort for persistent software issues.

Warning: Back up all important data before proceeding with a factory reset.

1. Go to *Settings > System > Reset options*
2. Tap *Erase all data (factory reset)*.
3. Confirm your decision and enter your PIN/pattern/password if prompted.
4. The device will restart and begin the reset process.
