## Momcozy M20SSCJ01

# Momcozy Baby Wrap Carrier M20SSCJ01 Instruction Manual

Model: M20SSCJ01

## 1. INTRODUCTION

This manual provides instructions for the safe and proper use of your Momcozy Baby Wrap Carrier. The carrier features an easy-on 2-piece design, offering an adjustable fit for various body types and supporting infants from newborn up to 33 lbs. It is designed to promote healthy hip development and provide comfort for both parent and baby.

The Momcozy Baby Wrap Carrier, shown in Grey, designed for comfortable babywearing.

## 2. IMPORTANT SAFETY INFORMATION

Always prioritize your baby's safety when using the carrier. Failure to follow these instructions can result in serious injury or death.

- **Weight and Age Limits:** This carrier is suitable for newborns weighing a minimum of 7 lbs (3.2 kg) up to toddlers weighing a maximum of 33 lbs (15 kg). Do not use for babies outside this weight range.
- **Breathing:** Ensure your baby's face is visible and clear of fabric at all times. Their chin should not be resting on their chest, as this can restrict breathing. Regularly check for clear breathing.
- **Positioning:** Always ensure your baby is in an ergonomic position. This means their hips should be spread apart with knees higher than their bottom, forming an 'M' shape. Their spine should have a natural 'C' curve.
- **Head and Neck Support:** For newborns and infants with limited head and neck control, ensure adequate support is provided by the carrier fabric.
- **Secure Fit:** The carrier should fit snugly around both you and your baby. Loose fabric can allow the baby to slump,

obstructing their airway.

- **Activity Restrictions:** Avoid activities that could put your baby at risk, such as cooking, running, cycling, or driving.
- **Regular Checks:** Periodically check the carrier for wear and tear, and ensure all adjustments remain secure during use.

### 3. PRODUCT COMPONENTS

---

The Momcozy Baby Wrap Carrier consists of two main components:

- **Main Wrap:** This is the primary fabric piece that forms the body of the carrier, providing the main pouch for the baby and shoulder support for the wearer.
- **Adjustable Strap/Belt:** A separate strap with rings that wraps around the waist, providing additional security and adjustability for a snug fit.

A close-up view of the adjustable ring mechanism, which allows for easy customization of the carrier's fit.

### 4. SETUP AND WEARING INSTRUCTIONS

---

Follow these steps to correctly put on your Momcozy Baby Wrap Carrier:

1. Put on the main wrap like a t-shirt, ensuring the fabric crosses over your back and forms a pouch in the front.
2. Adjust the fabric to ensure it sits comfortably on your shoulders and back, distributing weight evenly.
3. Place your baby into the front pouch, ensuring their legs are in the ergonomic 'M' position.
4. Spread the fabric across your baby's back and bottom, ensuring they are fully supported from knee to knee.
5. Take the adjustable strap/belt and wrap it around your waist, threading it through the rings to secure.
6. Tighten the strap to achieve a snug fit, ensuring your baby is held close and high on your chest, allowing for easy monitoring of their breathing.

## 5. OPERATING THE CARRIER (BABY POSITIONING)

Once the carrier is on, proper baby positioning is essential for comfort and safety:

- **High and Tight:** Your baby should be high enough to kiss their head easily. The carrier should be tight enough to hold them securely against your body without sagging.
- **Airway Clear:** Always ensure your baby's face is visible and their nose and mouth are unobstructed. There should be at least a finger's width between their chin and chest.
- **M-Position:** Ensure your baby's knees are higher than their bottom, creating an 'M' shape with their legs. This supports healthy hip development.
- **C-Curve Spine:** For newborns, their spine should maintain a natural 'C' curve. The carrier should support this natural posture.
- **Breastfeeding:** The carrier design allows for discreet breastfeeding. Adjust the baby's position slightly lower if needed, ensuring their airway remains clear at all times. Re-adjust to the high and tight position after feeding.

## 6. CARE AND MAINTENANCE

---

Proper care extends the life of your carrier and ensures hygiene for your baby.

- **Washing:** The Momcozy Baby Wrap Carrier is machine washable. Use cold water on a gentle cycle with a mild detergent.
- **Drying:** Air dry or tumble dry on low heat. Avoid high heat, which can damage the fabric.
- **Storage:** Store the carrier in a clean, dry place away from direct sunlight when not in use. The included storage bag can be used for convenience.

The Momcozy branded storage bag, provided for convenient storage and transport of the baby carrier.

## 7. TROUBLESHOOTING

If you encounter any issues while using your Momcozy Baby Wrap Carrier, consider the following:

- **Baby feels uncomfortable or fussy:** Re-check the baby's positioning. Ensure their legs are in the 'M' shape and their spine has a natural 'C' curve. Make sure no fabric is bunched uncomfortably.
- **Carrier feels too loose or baby is sagging:** The carrier might not be tight enough. Re-adjust the main wrap and the adjustable strap to ensure a snug fit. The baby should be held high and close to your body.
- **Parent experiences back or shoulder discomfort:** Ensure the fabric is spread wide over your shoulders and back to distribute the baby's weight evenly. The adjustable strap should also be snug around your waist to provide additional support.
- **Difficulty with breastfeeding in the carrier:** Ensure the carrier is adjusted to allow the baby to reach your breast comfortably while maintaining a clear airway. You may need to loosen slightly, but always re-tighten for security after feeding.
