Fahuac s02

Fahuac Inflatable Kids Travel Bed Instruction Manual

Model: s02

1. INTRODUCTION

Thank you for choosing the Fahuac Inflatable Kids Travel Bed. This portable air mattress set is designed to provide a comfortable and secure sleeping solution for toddlers during travel, camping, or overnight stays. It features a durable construction, an easy-to-use electric pump, and integrated bed rails for added safety.

Figure 1: Fahuac Inflatable Kids Travel Bed components.

2. SAFETY INFORMATION

Please read all safety warnings and instructions before using this product to ensure safe operation and prevent injury.

- **Suffocation Hazard:** The product consists of an internal mattress and an inflatable surround. The surround has a plastic base. Exercise extreme caution when using this product with very young children, as there is a potential suffocation hazard if a child's face becomes pressed against an under-inflated or improperly assembled plastic surface. Ensure the mattress is fully inflated and properly seated within the surround.
- Keep the air bed away from sharp objects to prevent punctures and abrasion. Do not place it on rough ground.
- Keep the air bed away from flames, sparks, and heat sources such as candles and fire.
- This travel bed is suitable for toddlers from 15 months and can support up to 50 lbs. Do not exceed the maximum weight capacity.
- Always supervise children when the product is in use.

3. COMPONENTS INCLUDED

The Fahuac Inflatable Kids Travel Bed set includes the following items:

- 1 x Inflatable Air Mattress (inflated dimensions: 62"L x 40"W x 12"Th)
- 1 x Electric Pump (with three nozzles)
- 1 x AC Adapter
- 1 x Cigarette Lighter Adapter
- 1 x Carry Bag

4. SETUP INSTRUCTIONS

Follow these steps to set up your Fahuac Inflatable Kids Travel Bed:

1. Unpack all components from the carry bag.

2. Lay the outer inflatable surround flat on a clean, level surface.
3. Locate the air valve on the outer surround. Attach the appropriate nozzle from the electric pump to the pump's inflation port and insert it firmly into the valve.
4. Connect the electric pump to a power source (AC adapter for indoor use or cigarette lighter adapter for car use).
5. Turn on the pump to inflate the outer surround. Ensure it is fully inflated and firm.
6. Once the outer surround is inflated, close the air valve tightly and press it down to secure.
7. Next, inflate the inner air mattress following the same steps. The mattress features dual lock valves designed to prevent air leakage. When inflating, ensure both the clear and black parts of the valve are pulled out.
8. After the inner mattress is fully inflated, close its valve tightly.
9. Place the inflated inner mattress into the inflated outer surround. The bed rails of the surround will help keep the mattress in place and prevent your child from rolling off.

Figure 3: Inflating the travel bed using the electric pump.

The electric pump allows for super fast inflation and deflation, typically inflating the entire set in approximately 30 seconds.

5. OPERATING INSTRUCTIONS

The Fahuac Inflatable Kids Travel Bed is designed for versatility and ease of use:

- **Travel Companion:** Ideal for use in cars (fits most minivans and SUVs), during camping trips, at hotels, or for sleepovers at grandparents' homes.
- **Comfort:** The mattress is made with premium flocking fabric for a soft-touching feeling. It is also reversible, with one side offering a soft, warm fabric surface and the other a cool, comfy PVC surface.
- **Bed Rails:** The integrated inflatable bed rails provide a secure and cozy environment, helping to prevent children from falling out of bed.
- **Sheet Compatibility:** The inflatable toddler bed fits all standard crib sheets and blankets.

Figure 4: The travel bed provides a comfortable sleeping space for children.

6. MAINTENANCE

Proper care and maintenance will extend the life of your travel bed:

- **Cleaning:** The product is designed for hand wash only. Use a damp cloth and mild soap to clean the surfaces. Do not use harsh chemicals or abrasive cleaners.
- **Storage:** After each use, fully deflate both the inner mattress and the outer surround. Pull out both the clear and black valves to allow air to escape quickly. Drain as much air as possible to save space. Fold and roll the deflated bed neatly and store it in the included carry bag in a cool, dry place away from direct sunlight and extreme temperatures.
- **Repairs:** In case of small punctures, use a standard PVC repair kit (not included) to patch the affected area.

7. TROUBLESHOOTING

If you encounter issues with your Fahuac Inflatable Kids Travel Bed, consider the following:

- **Bed not inflating:** Ensure the electric pump is properly connected to a power source and turned on. Check that the correct adapter nozzle is securely attached to the pump and inserted into the bed's valve.
- **Bed losing air:** Verify that all air valves (on both the inner mattress and outer surround) are tightly closed and pressed down after inflation. Inspect the bed for any visible punctures or leaks. Small leaks can sometimes be located by applying soapy water to the surface and looking for bubbles.
- **Pump not working:** Check the power connection. If using the car adapter, ensure the vehicle's power outlet is functioning.

8. SPECIFICATIONS

Feature	Detail
Brand	Fahuac
Model Name	MDFJ159 (Item model number: s02)
Color	Blue
Inflated Dimensions	62"L x 40"W x 12"Th (157 cm x 100 cm x 30 cm)
