## MAINTENANCE

To ensure the longevity and optimal performance of your Digital Day Clock, follow these simple maintenance guidelines:

- **Cleaning:** Gently wipe the screen and frame with a soft, dry, lint-free cloth. Avoid using abrasive cleaners, solvents, or spray cleaners directly on the screen.
- **Placement:** Position the clock in a stable location away from direct sunlight, extreme temperatures, and high humidity.
- **Power:** Always use the provided power adapter. If the clock is unplugged, the battery backup will maintain settings, but it is not designed for continuous battery operation.

## TROUBLESHOOTING

If you encounter any issues with your Digital Day Clock, refer to the following common solutions:

- **Clock Not Powering On:**
  - Ensure the power adapter is securely plugged into both the clock and a working electrical outlet.

- Test the outlet with another device to confirm it has power.

- **Incorrect Time/Date Display:**

- Access the settings menu using the MENU button and manually adjust the time and date as described in the "Operating Instructions" section.
- Verify the time mode (12-hour/24-hour) and date mode (Month-Day-Year, etc.) are set correctly.

- **Alarms Not Sounding:**

- Check the alarm settings in the menu to ensure the alarm time is correct, a message is selected (if desired), and the alarm is set to "On."
- Adjust the alarm volume if available in the settings.

- **Display Too Bright/Dim:**

- Ensure the "Auto Dimming" feature is enabled or disabled according to your preference.
- Some models may have manual brightness adjustment options in the menu.

If these steps do not resolve the issue, please contact American Lifetime customer service for further assistance.
