Vaydeer T3s

Vaydeer T3s Tiny Mouse Jiggler Instruction Manual

Model: T3s

1. PRODUCT OVERVIEW

The Vaydeer T3s Tiny Mouse Jiggler is a compact, undetectable USB device designed to simulate natural mouse movement, preventing your computer from going to sleep or showing an inactive status. Made of premium aluminum alloy, it offers durability and portability.

Upgraded Metal Shell with 2 Buttons

Image: The Vaydeer T3s Mouse Jiggler, featuring an upgraded metal shell, two orange control buttons (ON/OFF and Mode), and an LED display, shown plugged into a laptop's USB port.

2. SETUP

The Vaydeer T3s Mouse Jiggler is designed for plug-and-play operation, requiring no driver installation. It is recognized by your computer as a standard USB composite device, similar to a regular mouse, ensuring 100% undetectability by IT systems.

1. **Connect the Device:** Plug the Vaydeer T3s Mouse Jiggler into an available USB port on your computer or laptop.
2. **Power On:** Press and hold the ON/OFF button (marked with a power symbol) on the device for

approximately 3 seconds to turn it on. The LED display will illuminate.

3. **Placement (Optional):** For optical mice, you can place your mouse directly on the rotating disc of the jiggler. The device's movement will be detected by your mouse's optical sensor, causing the cursor on your screen to move.

Your browser does not support the video tag.

3. OPERATING INSTRUCTIONS

The Vaydeer T3s features multiple movement tracks and a simple interface for ease of use.

1. **Changing Movement Tracks:** The device has 3 built-in tracks. Briefly press the Mode button (marked with a circular arrow) to cycle through the tracks. The LED display will indicate the current track (1, 2, or 3).
 - **Track 1:** Mouse pointer moves in a small range.
 - **Track 2:** Mouse pointer moves in a wide range.
 - **Track 3:** Mouse pointer jiggles slightly. This mode allows you to still use your mouse while the jiggler is active.
2. **Memory Function:** The device remembers the last selected track, so it will automatically run that track when powered on again.
3. **Power Off:** Press and hold the ON/OFF button again for approximately 3 seconds to turn the device off.

4. MAINTENANCE

The Vaydeer T3s Mouse Jiggler is designed for durability and requires minimal maintenance.

- Keep the device clean and free from dust. Use a soft, dry cloth for cleaning.
- Avoid exposing the device to extreme temperatures or moisture.
- Do not attempt to disassemble the device, as this may void the warranty.

5. TROUBLESHOOTING

If you encounter any issues with your Vaydeer T3s Mouse Jiggler, please refer to the following common solutions:

- **Device not powering on:** Ensure the device is securely plugged into a functional USB port. Try a different USB port or computer.
- **Cursor not moving:** Verify the device is powered on (LED display is active). Ensure your optical mouse is placed correctly on the rotating disc. If using a non-optical mouse, the jiggle will still send signals to keep the computer awake, but physical cursor movement may not be visible.
- **Unexpected behavior:** Power off the device and restart your computer. Then, reconnect the jiggle and try again.

6. SPECIFICATIONS

Feature	Description
Product Dimensions	0.98 x 0.75 x 0.39 inches
Item Weight	0.004 ounces
Brand	Vaydeer
Model Number	Metal Mouse Jiggler
Connectivity Technology	USB
Special Features	Premium metal shell, longer life span, 100% undetectable, 3 random and natural tracks
Movement Detection Technology	Optical
