## Coway APMS-0815C

# Coway APMS-0815C Air Purifier Filter Kit Instruction Manual

## INTRODUCTION

---

This manual provides essential information for the proper installation, use, and maintenance of your Coway APMS-0815C Air Purifier Filter Kit. This kit is designed to replace the filters in compatible Coway air purifiers, ensuring continued high-quality air filtration. Please read these instructions carefully before proceeding.

## INSTALLATION GUIDE

---

This filter kit is intended for use with compatible Coway air purifier models. Before beginning, ensure your air purifier is unplugged from the power outlet.

### Identifying Your Filters

The Coway APMS-0815C filter kit includes two types of filters:

- **HEPA Filter:** Designed to capture 99.5% of airborne allergens and particles as small as 0.3  $\mu\text{m}$ .
- **Activated Carbon Filter:** Used to control odors and capture larger dust particles.

### Filter Replacement Steps

1. **Prepare the Air Purifier:** Unplug the air purifier from the wall outlet.
2. **Open the Front Cover:** Gently open the front cover of your air purifier. Refer to your air purifier's specific manual for exact instructions on opening the cover.
3. **Remove Old Filters:** Carefully remove the used activated carbon filter and HEPA filter. Dispose of them according to local regulations.
4. **Install New Activated Carbon Filter:** Unpack the new activated carbon filter. Place it into the designated slot, ensuring it is oriented correctly. The activated carbon filter typically sits in front of the HEPA filter.
5. **Install New HEPA Filter:** Unpack the new HEPA filter. Insert it into its slot, making sure it fits snugly. The HEPA filter usually has a specific direction for airflow; follow any arrows or indicators on the filter or in your air purifier's manual.
6. **Close the Cover:** Close the front cover of the air purifier securely.
7. **Reset Filter Indicator:** Plug the air purifier back into the power outlet. Locate the filter reset button on

your air purifier (refer to your air purifier's manual) and press and hold it for a few seconds until the filter indicator light turns off or resets. This step is crucial for accurate filter life monitoring.

## FILTER OPERATION AND FUNCTION

---

Once installed, the filters work continuously with your Coway air purifier to clean the air.

- The **activated carbon filter** acts as a pre-filter, capturing larger particles like dust, pet dander, and hair, and significantly reducing odors from cooking, pets, and smoke.
- The **HEPA filter** then captures fine airborne particles, including pollen, mold spores, dust mites, and other allergens, ensuring cleaner air output.

For optimal performance, ensure your air purifier is placed in an area with good airflow and is not obstructed.

## MAINTENANCE AND FILTER REPLACEMENT SCHEDULE

---

Regular filter replacement is essential for maintaining the efficiency and effectiveness of your Coway air purifier.

## Recommended Replacement Intervals

- **Activated Carbon Filter:** Replace approximately every 6 months, depending on usage and air quality.
- **HEPA Filter:** Replace approximately every 12 months, depending on usage and air quality.

Your air purifier's filter indicator light will typically signal when a filter replacement is due. Always reset the filter indicator after replacing filters.

## Cleaning Instructions

The HEPA filter and activated carbon filter included in this kit are not washable and should not be cleaned with water or vacuumed. Attempting to clean these filters can damage their structure and reduce their filtration efficiency. Always replace them with new filters according to the recommended schedule.

## TROUBLESHOOTING

---

If you encounter issues after replacing your filters, consider the following:

- **Air Purifier Not Turning On:** Ensure the front cover is securely closed. Many Coway models have a safety switch that prevents operation if the cover is open.
- **Filter Indicator Light Remains On:** Confirm you have properly reset the filter indicator after installation. Refer to your air purifier's manual for the specific reset procedure.
- **Reduced Airflow or Odors Persist:** Double-check that the filters are installed correctly and are not obstructed. If filters were recently replaced, ensure they are genuine Coway filters. If the issue persists, the air purifier itself may require servicing.
- **Filters Don't Fit:** Verify that you have purchased the correct filter kit (APMS-0815C) for your specific Coway air purifier model.

For further assistance, please contact Coway customer support.

## PRODUCT SPECIFICATIONS

---

Feature	Detail
Brand	Coway
Model Number	APMS-0815C
Filter Type	HEPA, Activated Carbon
HEPA Filtration Efficiency	Captures 99.5% of 0.3 µm particles
Kit Contents	1 HEPA Filter, 1 Activated Carbon Filter
Dimensions (L x W x H)	28.9 x 22.8 x 2.5 cm
Item Weight	510 grams

## WARRANTY AND CUSTOMER SUPPORT

---

This filter kit is a consumable item. For information regarding the warranty of your Coway air purifier or for specific support related to filter performance, please refer to the documentation provided with your air purifier or visit the official Coway website.

For direct customer support, please contact Coway through their official channels.
