GUY-TECH AC Power Cord

GUY-TECH AC Power Cord for DBPOWER L21 LCD Video Projector

Instruction Manual

Introduction

Welcome to the instruction manual for your GUY-TECH AC Power Cord. This manual provides essential information for the safe and effective use of your power cord, specifically designed for the DBPOWER L21 LCD Video Projector. Please read this manual thoroughly before use to ensure proper installation and operation.

Product Overview

The GUY-TECH AC Power Cord is a high-quality replacement power supply adapter. It is engineered to provide reliable power to your DBPOWER L21 LCD Video Projector.

Key Features:

- **100% Compatible Replacement:** Designed to function identically to the original power cord for the DBPOWER L21 projector.
- **Wide Input Voltage:** Supports input voltages from 100V to 240V, suitable for worldwide use.
- **Safety Protections:** Includes Over Voltage, Over Current, and Short Circuit output protection for enhanced safety.
- **Durable Construction:** Built for longevity and consistent performance.

This image displays the GUY-TECH AC Power Cord. It is a black cable, coiled in the center, featuring a standard two-prong Type A plug for wall outlets on one end and a two-slot C7 connector (often referred to as a "figure-8" connector) on the other end, which connects to the projector.

Setup

Compatibility Check:

This power cord is specifically designed for the **DBPOWER L21 LCD Video Projector**. It is crucial to verify that your projector model is the DBPOWER L21 to ensure proper function and safety. This cord is **not** compatible with other projector models.

Connecting the Power Cord:

1. Ensure your DBPOWER L21 projector is powered off and unplugged from any power source.
2. Locate the power input port on your DBPOWER L21 projector. This port typically resembles a figure-8 shape.
3. Insert the C7 connector (the two-slot end) of the GUY-TECH AC Power Cord firmly into the projector's power input port.
4. Plug the two-prong wall plug end of the power cord into a standard electrical outlet (100V-240V).
5. Once connected, you may power on your projector.

Operating Instructions

The GUY-TECH AC Power Cord operates passively, supplying power to your projector. No specific operational steps are required for the cord itself beyond proper connection.

- Always ensure the cord is securely connected at both ends before powering on the projector.
- Avoid bending or kinking the cord sharply, as this can damage the internal wiring.
- Do not place heavy objects on the power cord.
- If the cord appears damaged, discontinue use immediately and replace it.

Maintenance

The GUY-TECH AC Power Cord requires minimal maintenance.

- Keep the cord clean and free from dust and debris.
- Store the cord in a cool, dry place when not in use. Avoid extreme temperatures.
- Regularly inspect the cord for any signs of wear, cuts, or damage to the insulation or connectors.
- Do not attempt to repair a damaged power cord. Replace it with a new, compatible cord.

Troubleshooting

Projector Not Receiving Power:

- **Check Connections:** Ensure both ends of the power cord are securely plugged into the projector and the wall outlet.
- **Verify Outlet:** Test the wall outlet with another device to confirm it is supplying power.
- **Inspect Cord:** Look for any visible damage to the power cord (cuts, frayed wires, bent pins). If damaged, replace the cord.
- **Compatibility:** Reconfirm that your projector is indeed the DBPOWER L21 model. This cord is not compatible with other models.

Overheating:

- If the power cord or projector feels excessively hot, immediately unplug the cord from the wall outlet and the projector.
- Ensure adequate ventilation around the projector and the power cord.
- Do not cover the power cord or projector with blankets or other materials.
- If overheating persists, discontinue use and contact support.
