SWOOC LY-BOX

SWOOC Games Giant Tower Game LY-BOX Instruction Manual

Model: LY-BOX

1. INTRODUCTION

Thank you for choosing the SWOOC Games Giant Tower Game. This manual provides essential information for the proper setup, operation, and maintenance of your game. This product features a unique 3-in-1 design, where the storage box transforms into a tower straightener and a game table, enhancing your playing experience.

2. PRODUCT COMPONENTS

The SWOOC Games Giant Tower Game includes the following components:

- **60 Wooden Blocks:** Crafted from New Zealand Pine. Each block measures approximately 6.5 inches x 2.2 inches x 1.2 inches.
- **1 Storage Box / 3-in-1 Base:** Made from New Zealand Poplar wood. This box serves as a storage container, a tower straightener, and a game table base.

3. ASSEMBLY & SETUP

3.1 Box Assembly (Light Assembly Required)

The storage box requires light assembly. A Phillips head screwdriver is needed. Follow the instructions provided on the packaging or included diagram to secure the sides of the box. Ensure all screws are tightened for stability.

3.2 Initial Tower Setup

The 60 wooden blocks come pre-assembled in the storage box, ready for immediate play. To begin, simply slide the lid off the box.

Figure 1: The SWOOC Giant Tower Game showing the blocks pre-stacked within the storage box, ready for use as a straightener or base. The image also displays the closed storage box and the tower set up on its base.

3.3 Using the Box as a Straightener

The storage box is designed to act as a built-in straightener. When the blocks are stacked inside the box, the box walls help to align them perfectly, creating a stable and straight tower. This feature significantly reduces setup time and ensures a sturdy foundation for higher towers.

Figure 2: Demonstration of the built-in straightener feature. The box holds the blocks securely, ensuring a perfectly aligned tower for instant setup.

3.4 Using the Box as a Game Table Base

For an elevated playing experience, the assembled box can be used as a game table base. Simply place the box on a flat surface, then carefully slide the pre-stacked tower of blocks out of the box and onto the top surface of the box. This configuration allows the tower to start at approximately 4 feet and grow to over 6 feet during play.

Alternatively, the game can be played without the box as a base, starting at approximately 2 feet tall and growing to over 4 feet.

GIANT TOWER W/ 3-IN-1 BOX

Box transforms as a built-in straightener or table for instant play!

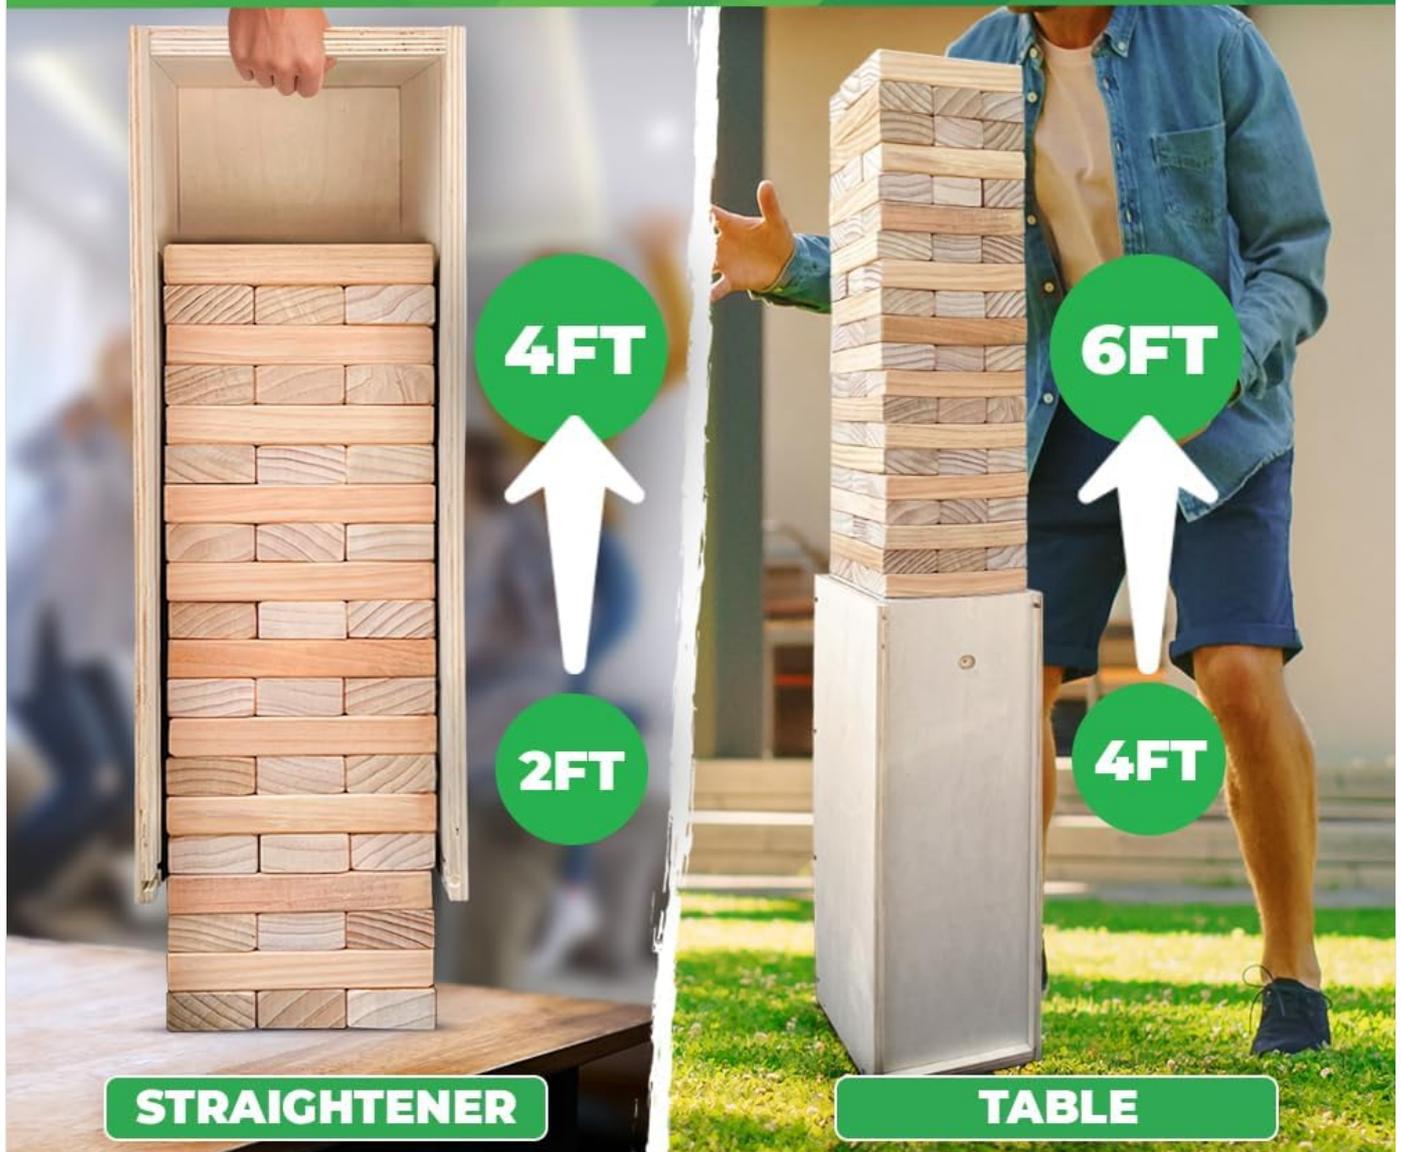

Figure 3: This visual guide illustrates the two primary setup configurations for the game, highlighting how the included box can extend the tower's starting and maximum height.

4. PLAYING THE GAME (OPERATING INSTRUCTIONS)

The objective of the Giant Tower Game is to remove blocks from the tower and place them on top without causing the tower to fall.

- Starting the Game:** Ensure the tower is stable and straight. Players take turns.
- Removing Blocks:** On your turn, carefully remove one block from any level below the highest completed level of the tower. You may use only one hand.
- Placing Blocks:** Once a block is removed, place it on the topmost level of the tower, completing the level before starting a new one. Blocks must be placed parallel to the blocks immediately below them.
- Winning/Losing:** The last player to successfully remove and place a block without toppling the tower wins. The player who causes the tower to fall loses.

5. STORAGE & MAINTENANCE

5.1 Storage

After playing, carefully stack all 60 blocks back into the storage box. The box is designed for convenient storage and portability, making it easy to pack away or transport.

Figure 4: This image highlights the portability and convenient storage features of the game, showing the compact box that holds all 60 blocks.

5.2 Cleaning and Care

To clean the wooden blocks and box, wipe them with a slightly damp cloth. Avoid using harsh chemicals or abrasive cleaners, as these can damage the wood finish. Ensure all components are completely dry before storing to prevent warping or mold growth. Store the game in a dry place, away from direct sunlight and extreme temperatures, to preserve the integrity of the wood.

Figure 5: This image details the high-quality, eco-friendly materials used in the game's construction, including New Zealand Pine for the blocks and New Zealand Poplar for the storage box, all sourced sustainably.

6. TROUBLESHOOTING

- **Wobbly Tower:** If the tower appears wobbly during setup, ensure all blocks are properly aligned within the straightener box. The box is designed to provide stability.
- **Blocks Sticking:** If blocks are difficult to remove, ensure they are clean and dry. Dust or moisture can sometimes cause friction.
- **Box Lid Not Sliding Smoothly:** Check that the box lid is perfectly straight when attempting to slide it on. Misalignment can cause resistance. Ensure no debris is obstructing the grooves.

7. SPECIFICATIONS

- **Product Dimensions (Box):** 9.3 x 8.3 x 26.4 inches
- **Item Weight:** 26 pounds

- **Block Material:** New Zealand Pine
- **Box Material:** New Zealand Poplar wood
- **Number of Blocks:** 60
- **Individual Block Dimensions:** Approximately 6.5 inches x 2.2 inches x 1.2 inches
- **Recommended Age:** 6 years and up
- **Model Number:** LY-BOX

8. SAFETY INFORMATION

- **Supervision:** Adult supervision is recommended, especially for younger children, to ensure safe play.
- **Falling Tower:** Be aware that the tower can fall unexpectedly. Ensure players and bystanders maintain a safe distance when the tower is unstable.
- **Choking Hazard:** While the blocks are large, always ensure small children do not put any parts of the game in their mouths.
- **Outdoor Use:** If playing outdoors, choose a flat, stable surface. Avoid playing near hazards or in areas where falling blocks could cause damage or injury.
