4. SETUP

4.1 Installing SIM Card and Battery

Your uleway SC6531E phone requires a standard-sized SIM card for network connectivity. It also supports a Micro SD card (up to 32GB) for expanded storage.

1. Open the back cover of the phone by gently prying it from the notch at the bottom.
2. Insert your standard-sized SIM card(s) into the designated slot(s) with the gold contacts facing down.
3. (Optional) Insert a Micro SD card into its slot, if desired.
4. Align the battery with the contacts inside the compartment and gently press it down until it clicks into place.
5. Replace the back cover, ensuring it snaps securely into position.

4.2 Charging the Device

Before first use, fully charge the phone's battery. You can charge it using the included Micro USB cable directly or by placing it in the charging dock.

1. **Using the Charging Dock:** Place the phone firmly into the charging dock, ensuring the charging contacts align. The phone will indicate that it is charging.
2. **Using the Micro USB Cable:** Connect the Micro USB cable to the phone's charging port (located on the side or bottom) and the other end to a power adapter or a computer's USB port.
3. A full charge typically takes a few hours. The battery icon on the screen will show the charging status.
