

Hormann 4015951

Hormann 4015951 Garage Door Threshold Seal Instruction Manual

Model: 4015951

1. PRODUCT OVERVIEW

The Hormann 4015951 Garage Door Threshold Seal is designed to provide effective protection for sectional garage doors against environmental elements. This 3-meter long seal kit creates a comprehensive barrier, preventing wind, water, dirt, and snow from entering the garage.

It is specifically engineered to seal the bottom of your garage door, enhancing protection against unwanted environmental influences. The seal establishes a reliable barrier against drafts, insects, and moisture, contributing to a cleaner and drier garage interior.

Key features include:

- Specifically designed for effective protection of sectional garage doors against wind and water.
- Kit includes a 3-meter long threshold seal for extensive sealing coverage.
- Prevents water, dirt, and snow from entering the garage, while also blocking drafts and insects.
- Robust construction and high-quality materials ensure durability and reliability, even in challenging weather conditions.

2. PACKAGE CONTENTS

The Hormann 4015951 Garage Door Threshold Seal kit includes the following components:

- 1 x Hormann Garage Door Threshold Seal (3 meters in length)
- Mounting hardware (screws and wall plugs)
- Adhesive/Sealant (e.g., Bostik SIMSON ISR 70-03 or similar)

3. INSTALLATION INSTRUCTIONS

Installation of the Hormann threshold seal is designed to be straightforward and does not require complex modifications. The kit includes all necessary mounting hardware and detailed instructions to facilitate quick and effective sealing.

1. **Prepare the Surface:** Ensure the garage floor where the seal will be installed is clean, dry, and free from dust, grease, or debris. A clean surface is crucial for proper adhesion.
2. **Position the Seal:** Close the garage door. Place the threshold seal on the floor directly under the garage door, ensuring it is centered and aligned with the door's bottom edge. The seal should create a tight fit when the door is closed.
3. **Mark the Position:** Once the seal is correctly positioned, use a pencil or marker to trace its outline on the garage floor. This will serve as a guide for adhesive application and drilling.
4. **Apply Adhesive:** Apply the provided adhesive/sealant within the marked area on the floor. Follow the adhesive manufacturer's instructions for application thickness and curing time. Ensure even coverage to create a strong bond and watertight seal.
5. **Place the Seal:** Carefully place the threshold seal onto the applied adhesive, aligning it with the marked outline. Press firmly along the entire length of the seal to ensure good contact with the adhesive.

6. **Secure with Screws (Optional but Recommended):** For enhanced durability and security, drill pilot holes through the designated areas of the seal and into the garage floor, following the marked positions. Insert the provided wall plugs and secure the seal with screws.
7. **Curing Time:** Allow the adhesive to cure completely before operating the garage door or exposing the seal to heavy traffic or moisture. Refer to the adhesive instructions for specific curing times.

4. CARE AND MAINTENANCE

To ensure the longevity and continued effectiveness of your Hormann Garage Door Threshold Seal, follow these simple maintenance guidelines:

- **Regular Cleaning:** Periodically clean the seal and the surrounding floor area to remove dirt, leaves, and other debris that may accumulate. Use mild soap and water, then rinse thoroughly.
- **Inspect for Damage:** Regularly inspect the seal for any signs of wear, cracks, or damage. If damage is observed, consider replacement to maintain optimal protection.
- **Check Adhesion:** Occasionally check that the seal remains firmly adhered to the floor. If any sections appear loose, reapply adhesive as needed to prevent water ingress.

5. SPECIFICATIONS

Feature	Detail
Brand	Hormann
Model Number	4015951
Product Dimensions (L x W x H)	300 cm (Length) x 8 cm (Base Width) x 1.7 cm (Height)
Weight	4.16 Kilograms
Color	Black
Style	Threshold Seal
Material	Plastic (Rubber/Elastomer)
Quantity of Items	1 (Kit)
Compatibility	Sectional garage doors (Hormann recommended)
Assembly Required	Yes
ASIN	B094NKJL4G

6. TROUBLESHOOTING

If you encounter issues with your Hormann Garage Door Threshold Seal, consider the following:

- **Water Leakage:**

- Ensure the seal is properly adhered to the floor along its entire length. Reapply adhesive to any loose sections.
- Verify that the garage door closes tightly against the seal. Adjust door limits if necessary.
- Check for any gaps or damage in the seal itself.

- **Seal Not Lying Flat:**

- Ensure the floor surface is even and clean before installation.
- Apply sufficient adhesive and press the seal firmly during installation.

- **Difficulty Closing Door:**

- The seal should not significantly impede door operation. Check for obstructions or incorrect placement.
- Ensure the door's closing force is adequate.
