SETUP GUIDE

System Requirements:

- PC with a free USB port
- Operating System: Windows, macOS, or Linux
- Internet connection for Razer Synapse software installation (optional, but recommended for customization)

Installation:

1. **Connect the Mouse:** Plug the USB connector of the Razer DeathAdder Essential Gaming Mouse into an available USB port on your computer.
2. **Driver Installation:** Your operating system will automatically detect and install the necessary drivers for basic functionality.
3. **Install Razer Synapse (Optional but Recommended):**
 - To unlock advanced features such as programmable buttons, DPI customization, and macro functions, download and

install the Razer Synapse software from the official Razer website (www.razer.com/synapse).

- Follow the on-screen instructions to complete the installation and create a Razer ID if you don't already have one.

OPERATING INSTRUCTIONS

Basic Operation:

- Left-Click Button:** Primary action, typically used for selecting items or interacting with software.
- Right-Click Button:** Secondary action, typically used for context menus or alternative functions.
- Scroll Wheel:** Used for vertical scrolling. Pressing the scroll wheel acts as a middle-click button.
- Side Buttons (Mouse Button 4 & 5):** By default, these buttons often function as "Back" and "Forward" in web browsers. Their functions can be customized via Razer Synapse.

Customizing with Razer Synapse:

Razer Synapse software allows you to personalize your mouse settings to suit your preferences and gaming style.

- Button Assignment:** Remap any of the 5 programmable buttons to perform keyboard functions, mouse functions, multimedia controls, or complex macros.
- DPI Adjustment:** Fine-tune the mouse sensitivity (DPI) to your desired level. You can set multiple DPI stages and switch between them on-the-fly using the dedicated DPI buttons (if configured). The optical sensor supports up to 6400 DPI.
- Polling Rate:** Adjust the polling rate (how often the mouse reports its position to the computer) for smoother tracking.
- Calibration:** Calibrate the sensor to your mouse mat for optimal tracking performance.

MAINTENANCE AND CARE

Proper maintenance ensures the longevity and optimal performance of your Razer DeathAdder Essential Gaming Mouse.

- Cleaning:**
 - Use a soft, lint-free cloth slightly dampened with water or a mild cleaning solution to wipe the surface of the mouse.
 - Avoid using harsh chemicals, abrasive cleaners, or solvents.
 - For the optical sensor, use a cotton swab lightly dampened with isopropyl alcohol to gently clean the lens. Ensure no liquid enters the sensor opening.
 - Use compressed air to clear dust and debris from around the buttons and scroll wheel.
- Storage:** Store the mouse in a clean, dry environment away from extreme temperatures and direct sunlight.
- Cable Management:** Avoid sharp bends or kinks in the mouse cable to prevent damage.

TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Mouse not responding	Loose USB connection, faulty USB port, driver issue.	<ul style="list-style-type: none"> Ensure the USB cable is securely plugged into a working USB port. Try a different USB port on your computer. Restart your computer. Check Device Manager (Windows) or System Information (macOS) to see if the mouse is recognized. Reinstall drivers if necessary.
Cursor erratic or not tracking smoothly	Dirty optical sensor, unsuitable surface, software interference.	<ul style="list-style-type: none"> Clean the optical sensor at the bottom of the mouse with a cotton swab. Use the mouse on a clean, uniform surface or a dedicated mouse pad. Ensure Razer Synapse is updated to the latest version. Try calibrating the mouse to your surface using Razer Synapse.
Programmable buttons not working	Razer Synapse not installed or configured correctly, software conflict.	<ul style="list-style-type: none"> Install or update Razer Synapse software. Verify button assignments within Razer Synapse. Ensure no other software is conflicting with mouse button functions.
Scroll wheel jittering or unresponsive	Dust/debris in scroll wheel mechanism.	<ul style="list-style-type: none"> Use compressed air to blow out any debris around the scroll wheel. Gently rotate the scroll wheel back and forth to dislodge particles.
