WOWOW Brass Kitchen Faucet Bridge with Side Sprayer Instruction Manual

Model: N-23115A1G-AMUS

1. INTRODUCTION

Thank you for choosing the WOWOW Brass Kitchen Faucet Bridge with Side Sprayer. This manual provides essential information for the proper installation, operation, and maintenance of your new faucet. Please read these instructions carefully before installation and retain them for future reference.

This faucet features a durable solid brass construction, a classic bridge design with two handles for precise control, and a convenient side sprayer, all finished in elegant brushed gold.

2. PRODUCT OVERVIEW

The WOWOW Brass Kitchen Faucet is designed for both functionality and aesthetic appeal, offering a blend of traditional style and modern convenience.

Key Features:

- **Solid Brass Construction:** Crafted from premium solid brass, ensuring durability, resistance to rust and corrosion, and water safety.
- **Dual Handle Design:** Provides precise control over water volume and temperature for both hot and cold water.
- **High Arc 360° Swivel Spout:** Offers ample clearance for kitchen tasks and is ideal for single or double sinks.
- **Brass Side Sprayer:** Delivers a high-pressure water stream for effective cleaning and extends up to 20 inches for hard-to-reach areas. Features a push-button for activation.
- **Easy Installation:** Designed for 4-hole countertop installation with included flexible hot & cold supply hoses and a quick-connect sprayer hose.

3. SETUP & INSTALLATION

Before beginning installation, ensure you have all necessary tools and components. It is recommended to turn off the main water supply before starting.

3.1. Included Components

Figure 2: All components included for installation.

3.2. Installation Steps

1. **Prepare Countertop:** Ensure your countertop has the required 4 holes for installation. The pre-drilled hole size should be 1.15"-1.5" and the maximum deck thickness 2".

Figure 3: Faucet dimensions and 4-hole requirement.

2. **Assemble Faucet Body:** Place the faucet body into the center holes of your countertop. Secure it from underneath by tightening the gasket and lock nut onto the threaded rods.
3. **Connect Supply Lines:** Connect the flexible hot and cold water supply hoses to the corresponding shutoff valves. Ensure all connections are tight to prevent leaks. Use plumber's tape on threaded connections for a watertight seal.
4. **Attach Side Sprayer:** Insert the side sprayer's pull-out hose into its mounting hole. Attach the pull-out hose to the

quick connector on the center threaded rod. You will hear a 'click' when it's securely in place. Do not use tape or extra gasket here. Install the gravity ball onto the hose to ensure smooth retraction.

Figure 4: Quick connector for sprayer hose.

Optional: If you prefer not to install the sprayer, a stopper is provided to plug the center threaded rod instead.

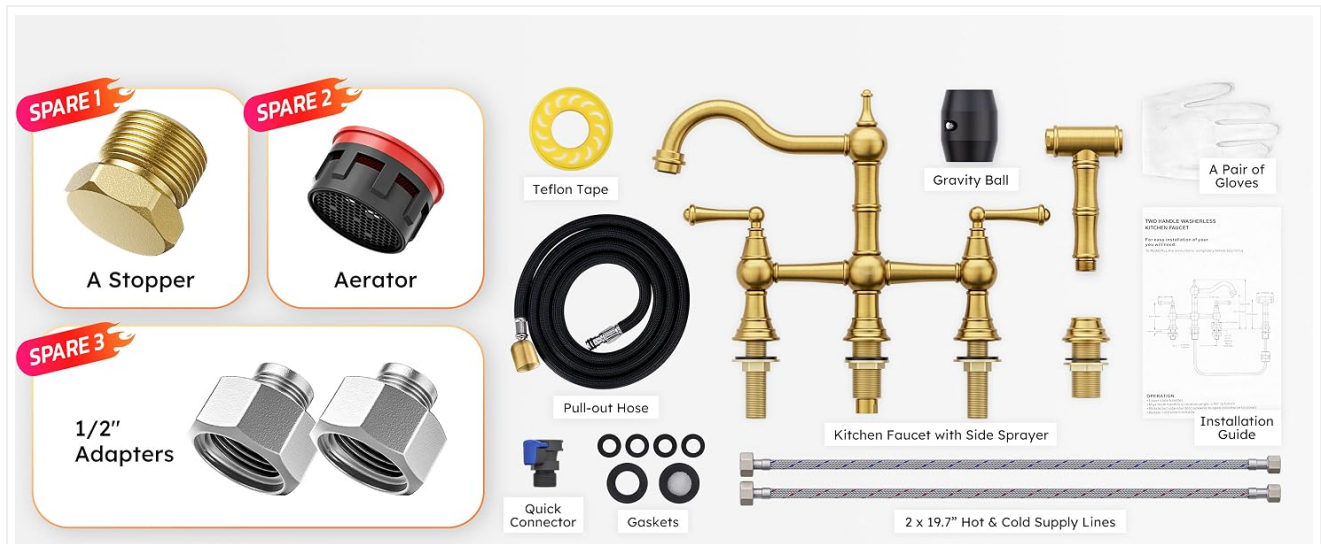

Figure 5: Stopper for optional sprayer hole.

5. **Flush the System:** Before using, remove the aerators from both the main spout and the side sprayer. Turn on both hot and cold water for 1-2 minutes to flush out any debris from the water lines.
6. **Install Aerators:** Reinstall the aerators onto the main spout and side sprayer.

4. OPERATING INSTRUCTIONS

4.1. Faucet Operation

Use the two handles to control the water flow and temperature. Turn the left handle for hot water and the right handle for cold water. The high arc spout can swivel 360° to cover both sides of a double sink or provide flexibility in a single sink.

4.2. Side Sprayer Operation

To activate the side sprayer, press the button on its head. This will deliver a high-pressure stream. To switch back to the

main faucet flow, press the button again. The sprayer hose can be pulled out up to 20 inches for extended reach.

5. MAINTENANCE

5.1. Cleaning the Faucet

To maintain the brushed gold finish, clean the faucet regularly with a soft, damp cloth. Avoid using abrasive cleaners, harsh chemicals, or scouring pads, as these can damage the finish.

5.2. Aerator Maintenance

The faucet features a removable aerator for easy cleaning. If water flow becomes restricted or irregular, unscrew the aerator from the spout, clean any mineral deposits or debris, and then reattach it. The side sprayer also has a removable aerator that can be cleaned if needed.

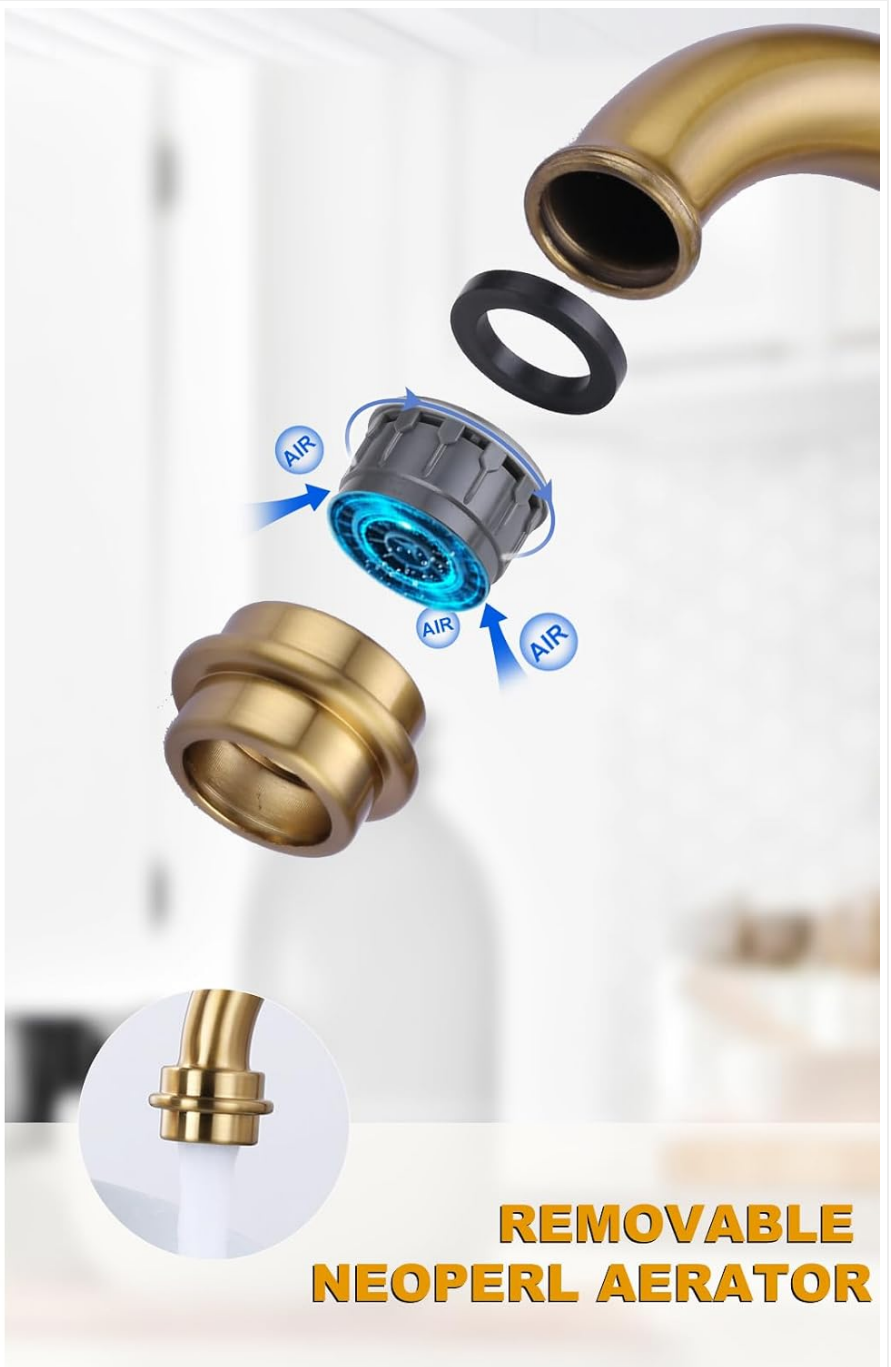

Figure 6: Removable aerator for easy cleaning.

6. TROUBLESHOOTING

- **Low Water Flow:** Check if the aerators are clogged with debris or mineral buildup. Clean them as described in the Maintenance section. Ensure shutoff valves are fully open.
- **Leaks:** Verify that all connections are tightened properly, especially those with plumber's tape. Ensure gaskets are correctly seated. If leaks persist, recheck the quick connector for the side sprayer, ensuring it clicked into place.
- **Sprayer Not Turning Off:** The side sprayer is designed to stay on until the button is pressed again. Ensure you press the button to switch back to the main faucet flow after use.

7. SPECIFICATIONS

Feature	Detail
Brand	WOWOW
Model Name	N-23115A1G-AMUS
Material	Brass
Finish Type	Brushed Gold
Mounting Type	Deck Mount
