## Sekonda 1685

# Sekonda 1685 Men's Watch User Manual

Model: **1685** | Brand: **Sekonda**

## 1. PRODUCT OVERVIEW

This Sekonda men's watch features a grey dial with rose gold-tone hands and hour markers. It includes a day/date display at the three o'clock position. The watch is completed with a brown leather strap and a traditional buckle closure.

Front view of the Sekonda 1685 men's watch, showcasing its grey dial, rose gold-tone hands, day/date window, and brown leather strap.

The watch is powered by a reliable quartz movement and offers water resistance for daily use.

## 2. SETUP

---

### 2.1 Setting the Time

1. Pull the crown (the small knob on the side of the watch) out to the furthest position.
2. Turn the crown clockwise or counter-clockwise to set the hour and minute hands to the desired time.

3. Push the crown back into its normal position to start the watch.

## 2.2 Setting the Date and Day

1. Pull the crown out to the first position (halfway).
2. Turn the crown clockwise to adjust the date.
3. Turn the crown counter-clockwise to adjust the day.
4. Once the correct date and day are displayed, push the crown fully back into its normal position.

*Note: Avoid setting the date and day between 9 PM and 3 AM, as this can interfere with the automatic date change mechanism.*

## 3. OPERATING YOUR WATCH

---

### 3.1 Water Resistance

This watch is designed to be water-resistant. It is suitable for everyday use and can withstand splashes or brief immersion in water. However, it is **not** suitable for swimming, diving, or showering. Always ensure the crown is fully pushed in before any contact with water. Avoid pressing buttons or operating the crown while the watch is wet to prevent water ingress.

### 3.2 Wearing the Watch

Adjust the brown leather strap to a comfortable fit on your wrist using the traditional buckle. The watch should be snug enough not to slide freely, but not so tight as to restrict circulation.

Watch Used In Box  
An Example Only

## 4. MAINTENANCE

### 4.1 Cleaning

- Wipe the watch case and crystal with a soft, dry, lint-free cloth.
- For the leather strap, avoid harsh chemicals, excessive moisture, or prolonged exposure to direct sunlight, which can cause damage or discoloration.

### 4.2 Battery Replacement

This watch uses a quartz movement, which requires a battery. When the watch stops running, the battery

will need to be replaced. Battery replacement should be performed by a qualified watch technician to ensure the watch's water resistance is maintained and to prevent damage to the internal components.

## 5. TROUBLESHOOTING

### 5.1 Watch Not Running

- Ensure the crown is fully pushed in to the normal operating position.
- If the watch still does not run, the battery may need replacement. Refer to section 4.2 for battery replacement information.

### 5.2 Incorrect Day/Date Display

- Verify that the time is set correctly, especially ensuring the AM/PM is accurate for the day/date change.
- The day/date display is fixed and may not be available in multiple languages. If the day appears in a language other than English, this is a characteristic of the watch and cannot be changed.
