Inch Scale

Centimeter Scale

Sighting Lens

Double Chain

Clear Sighting Line

Table of Measurement

Image: A composite image highlighting various features of the compass, including the inch scale, centimeter scale, sighting lens, double chain mechanism, clear sighting line, and a table of measurements on the back.

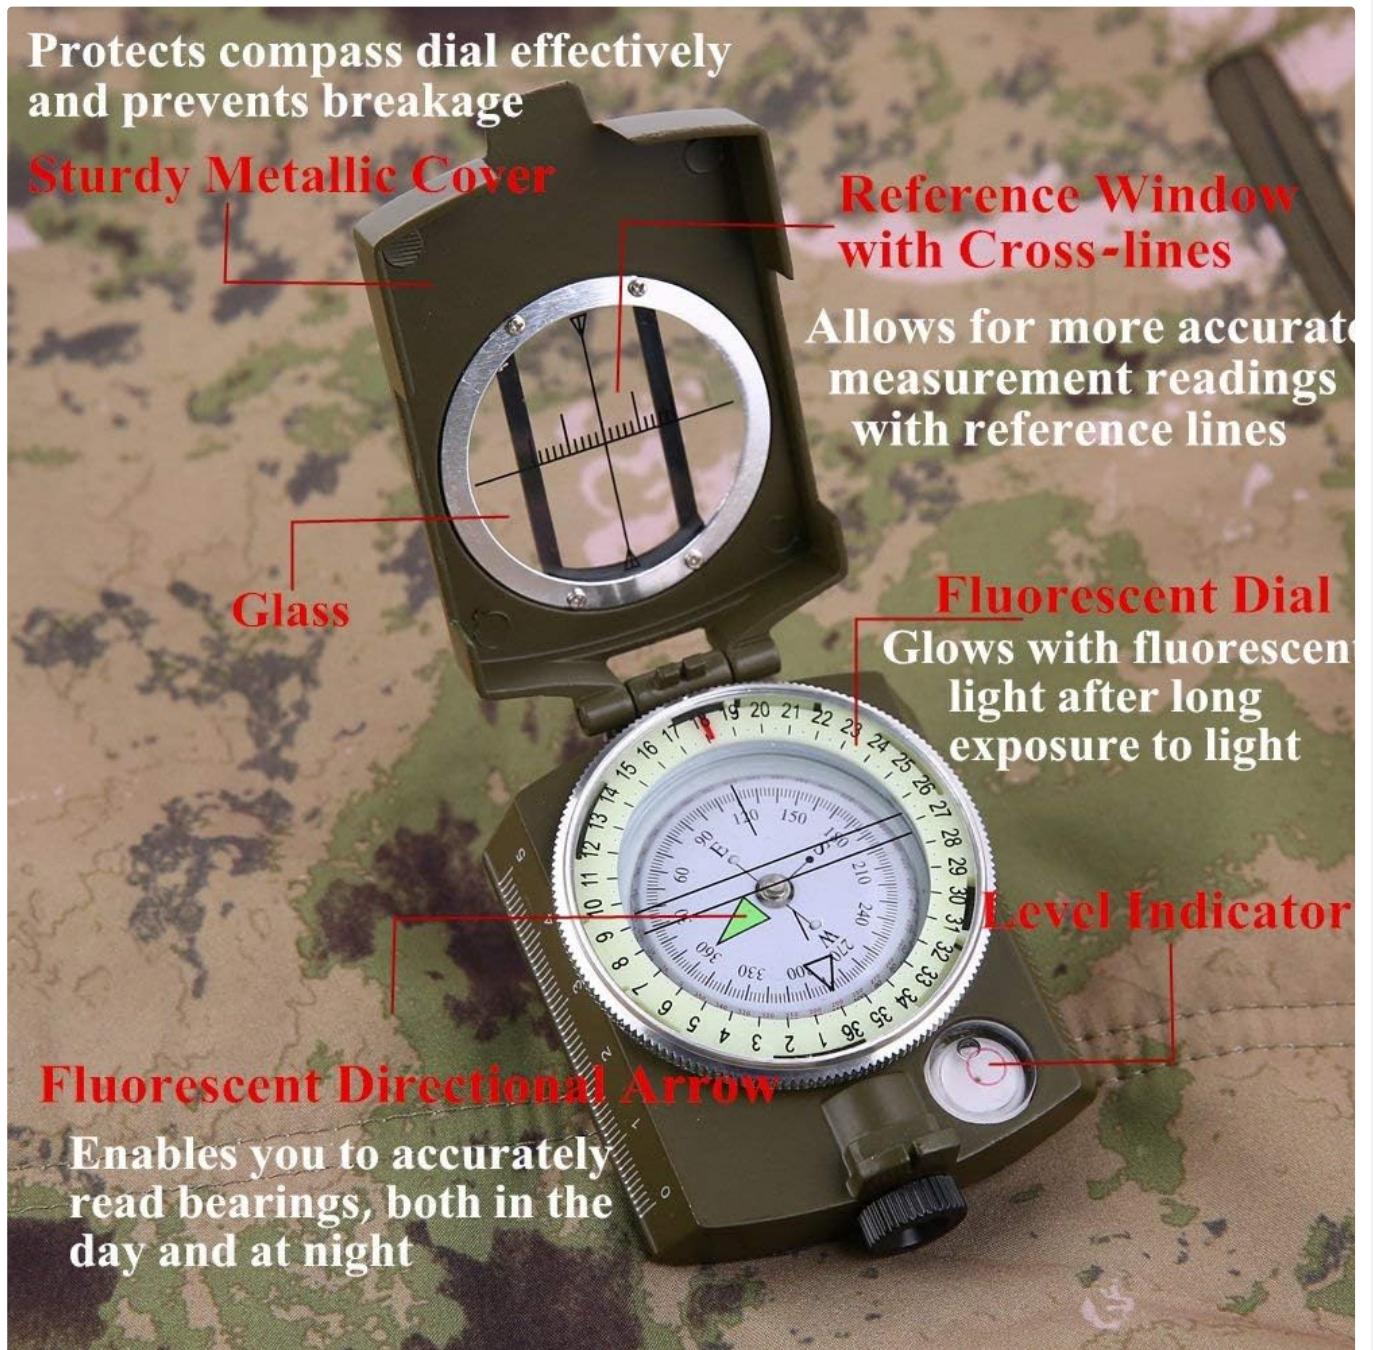

Image: A detailed view of the compass, pointing out key components such as the sturdy metallic cover, reference window with cross-lines, fluorescent dial, level indicator, and fluorescent direction arrow.

Features

- **Professional Grade:** Designed for accuracy and reliability in various outdoor and emergency situations.
- **Ergonomic Lensatic Function:** Features a lens on the rear sight to magnify the card dial for precise readings.
- **Durable Military Construction:** Built with waterproof and shakeproof properties to withstand harsh environments.
- **Portable Design:** Includes a carrying case with a belt loop attachment for easy transport.
- **Fluorescent Interface:** The compass dial and direction arrow glow in the dark for night navigation.

Setup

1. **Unpacking:** Carefully remove the compass from its packaging and the included carrying bag.
2. **Familiarization:** Open the compass cover. Observe the dial, sighting lens, and reference window.
3. **Luminescence Activation:** For optimal glow-in-the-dark functionality, expose the compass dial and direction arrow to a light source for a period before use in low-light conditions.

Operating Instructions

1. **Holding the Compass:** Hold the compass level and steady, away from metallic objects that could interfere with the magnetic needle.
2. **Taking a Bearing (Sighting Method):**
 - Open the compass fully so the cover is perpendicular to the base and the sighting lens is extended.
 - Align the sighting line on the cover with your target.
 - Look through the sighting lens at the magnified dial to read the bearing. Ensure the compass is level using the built-in level indicator.
3. **Reading the Dial:** The compass dial displays degrees (0-360) and cardinal directions (N, E, S, W). The fluorescent direction arrow indicates North.
4. **Using Scales:** The compass features inch and centimeter scales on its sides for map reading or distance estimation.

Maintenance

- **Cleaning:** Wipe the compass with a soft, dry cloth. Avoid abrasive cleaners or solvents.
- **Storage:** Store the compass in its carrying bag in a cool, dry place, away from strong magnetic fields and extreme temperatures.
- **Protection:** The sturdy metallic cover protects the compass dial. Keep it closed when not in use to prevent damage.

Troubleshooting

- **Inaccurate Readings:** Ensure the compass is held level and away from any metallic objects (e.g., phones, keys, metal buckles) or strong magnetic fields that could interfere with its operation.
- **Faint Glow:** If the fluorescent dial or arrow is not glowing brightly, expose it to a strong light source for a few minutes to recharge its luminescence.

SPORTNEER SLEEPING BAG WITH ZIPPERED HOLES FOR ARMS AND FEET

Product Overview

Image: A person inside the blue Sportneer sleeping bag, demonstrating the zippered armholes that allow for freedom of movement while staying warm, reading a book.

Convenient Bottom Zippers

Just unzip and walk around
You don't even need to get out of the bag

Image: A person wearing the blue Sportneer sleeping bag, with the convenient bottom zippers open, allowing them to stand and walk around without fully exiting the bag.

Built-in Side Pocket

Keep your personal items close at hand for easy access

Waterproof & Weather-resistant

You'll stay warm day, night, and in extreme conditions.

Image: A detailed view highlighting key features of the sleeping bag, including a built-in side pocket for personal items and an illustration of its waterproof and weather-resistant properties.

Features

- **Zippered Armholes:** Allows for free movement of arms while remaining inside the sleeping bag.
- **Zippered Foot Holes:** Enables walking and standing without fully exiting the sleeping bag.
- **Built-in Side Pocket:** Convenient storage for small personal items.
- **Waterproof & Weather-resistant:** Provides protection against moisture and varying weather conditions.

Setup

1. **Unpacking:** Remove the sleeping bag from its compression sack or storage bag.
2. **Lofting:** Allow the sleeping bag to loft (expand) for a few minutes to regain its insulating properties after being compressed.
3. **Placement:** Lay the sleeping bag on a flat, insulated surface, such as a sleeping pad, for optimal comfort and warmth.

Operating Instructions

1. **Entering the Bag:** Unzip the main zipper and slide into the sleeping bag.
2. **Using Armholes:** Locate the zippered armholes and open them to free your arms for activities like reading or eating.
3. **Using Foot Holes:** To stand or walk, unzip the foot holes at the bottom of the bag. Ensure zippers are fully closed when sleeping to retain warmth.
4. **Adjusting Hood:** Tighten or loosen the drawstring on the hood for head warmth and comfort.
5. **Using Side Pocket:** Place small essentials like a phone or headlamp in the built-in side pocket for easy access.

Maintenance

- **Cleaning:** Follow care label instructions. Generally, spot clean small stains with mild soap and water. For a full wash, use a front-loading washing machine with a gentle cycle and specialized sleeping bag cleaner, or hand wash. Air dry thoroughly, avoiding direct heat.
- **Drying:** Ensure the sleeping bag is completely dry before storage to prevent mildew. Tumble dry on low heat with dryer balls, or air dry flat.
- **Storage:** Store the sleeping bag uncompressed in a large, breathable storage sack (not the compression sack) in a cool, dry place to maintain its loft and insulating properties.
- **Zipper Care:** Keep zippers clean and free of debris. Lubricate with a zipper lubricant if they become stiff.

Troubleshooting

- **Loss of Warmth:** Ensure the sleeping bag is fully lofted. Check for drafts or inadequate insulation from the ground (use a sleeping pad). Ensure all zippers are fully closed.
- **Stuck Zipper:** Gently pull the fabric away from the zipper teeth and slowly work the slider. Do not force it.
