

JJC fw3795e3

JJC 3-Piece Camera Lens Filter Wrench Kit (37-95mm) Instruction Manual

Model: fw3795e3

INTRODUCTION

This instruction manual provides detailed information for the JJC 3-Piece Camera Lens Filter Wrench Kit, model fw3795e3. This kit is designed to assist photographers in safely removing and separating camera lens filters with diameters ranging from 37mm to 95mm. The wrenches are crafted from durable, lightweight PC material to ensure effective operation without damaging your valuable camera equipment.

PRODUCT FEATURES

- **Versatile Sizing:** Includes three distinct wrenches to accommodate UV, CPL, and ND filters with diameters from 37mm to 95mm.
- **Effective Filter Removal:** An essential tool for removing jammed or over-tightened filters from your lens.
- **Ergonomic Design:** Engineered for comfortable use and to provide a strong, secure grip during operation.
- **Protective Material:** Each wrench is constructed from durable and lightweight PC material, designed to prevent scratching your camera lens or filter threads.
- **Separates Stacked Filters:** Aids in separating multiple filters that have become stuck together.

OPERATING INSTRUCTIONS

Follow these steps to effectively use the JJC Filter Wrench Kit:

1. **Select the Correct Wrench:** Identify the diameter of the filter you need to remove. Choose the appropriate wrench from the kit (37-52mm, 55-72mm, or 77-95mm) that matches or slightly exceeds your filter's diameter.
2. **Grip the Filter:** Gently but firmly place the selected wrench around the edge of the filter. Ensure the wrench's inner surface makes full contact with the filter's rim.
3. **Loosen the Filter:** With a steady hand, turn the wrench counter-clockwise to loosen the filter. Apply even pressure to avoid slipping.
4. **Remove the Filter:** Once loosened, you can typically unscrew the filter by hand.

Simply grip the correct wrench around the filter, then turn it counterclockwise to loosen it

MAINTENANCE

To ensure the longevity and effectiveness of your JJC Filter Wrench Kit, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the wrenches with a soft, dry cloth after each use to remove any dust or debris. Avoid using harsh chemicals or abrasive materials, as these may damage the PC material.
- **Storage:** Store the wrenches in a clean, dry place, away from direct sunlight and extreme temperatures. Keeping them in their original packaging or a dedicated pouch can prevent them from getting lost or damaged.
- **Inspection:** Periodically inspect the wrenches for any signs of wear or damage. While made from durable PC material, excessive force or improper use can cause stress.

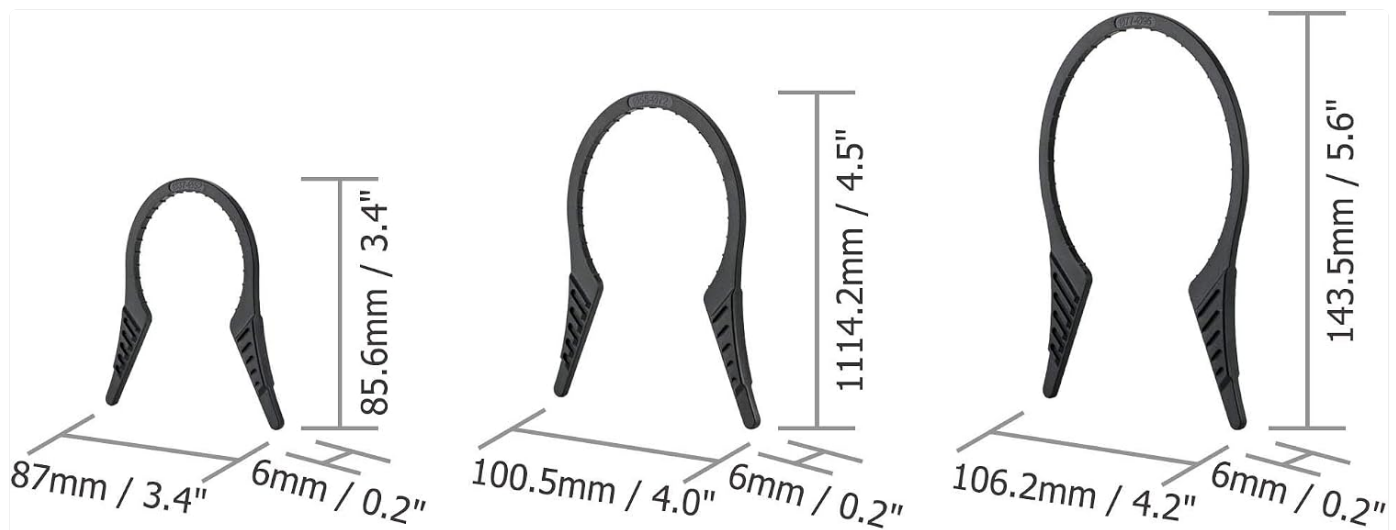

TROUBLESHOOTING

If you encounter difficulties while using the filter wrench kit, consider the following:

- **Filter Still Stuck:** Ensure you are using the correct size wrench. Sometimes, a slightly smaller wrench might provide a tighter grip, but be careful not to apply excessive force. Try applying gentle, consistent pressure rather than sudden jerks.
- **Slipping Wrench:** Make sure the wrench is fully seated around the filter's rim. If the filter is very smooth, ensure your hands and the wrench are dry and free of oils or lubricants.
- **Stacked Filters:** If two filters are stuck together, try to apply pressure to only one of them at a time, if possible, to create a slight torque difference. The wrenches are designed to help separate these.
- **Damage Concern:** If you fear damaging your lens or filter, stop and consult a professional camera technician.

SPECIFICATIONS

Feature	Detail
Manufacturer	JJC
Part Number	fw3795e3
Product Model Number	fw3795e3
Size (3 Pcs)	37-52mm, 55-72mm, 77-95mm
Material	PC (Polycarbonate)
Quantity in Package	1 kit
Number of Pieces	3
Batteries Included	No
Batteries Required	No
Photo Filter Thread Size Compatibility	37mm - 95mm
Coating Description	Uncoated (for the wrenches themselves)
First Available Date	September 27, 2021
