GUTINNEEN AIR14-IN-HP-2-L2-AD

GUTINNEEN Heated Cat House: 2-Level Weatherproof Outdoor Shelter User Manual

Model: AIR14-IN-HP-2-L2-AD

1. Introduction

Thank you for choosing the GUTINNEEN Heated Cat House. This 2-level weatherproof outdoor shelter is designed to provide a warm, safe, and comfortable environment for outdoor cats, especially during colder weather. It features an automatic temperature-control heating pad, an insulated liner, and a durable construction to withstand various outdoor conditions. This manual provides essential information for the proper assembly, operation, maintenance, and care of your cat house.

2. Safety Information

Please read all safety instructions before assembling and operating the cat house to prevent injury or damage. Keep this manual for future reference.

- **Electrical Safety:** The included heating pad is designed with automatic temperature control and overheat protection. Ensure the power cord is routed safely to prevent chewing by animals. The heating pad is UL and FCC certified for safety.
- **Placement:** Place the cat house on a stable, level surface. While weatherproof, positioning it under an overhang or in a sheltered area can extend its lifespan and provide additional protection.

- **Ventilation:** Ensure the house is placed in an area with adequate air circulation.
- **Inspection:** Regularly inspect the cat house and heating pad for any signs of wear, damage, or electrical issues. Discontinue use if any damage is found.
- **Children and Pets:** Keep children away from the assembly area. Supervise pets during initial use to ensure they adapt safely to the new shelter.

Image 2.1: The heating pad is UL and FCC certified, ensuring electrical safety.

3. Package Contents

Verify that all components are present before beginning assembly. If any parts are missing or damaged, please contact customer service.

- Cat House Panels (various sizes for walls, roof, base, and platforms)
- Electric Heating Pad with Chew-Resistant Cable
- Insulated Liner
- PVC Curtains for entrances
- Hardware Kit (screws, bolts, etc.)
- Assembly Instructions

4. Setup and Assembly

Assembly is required. It is recommended to have a drill for easier assembly, though not strictly necessary. Follow the provided assembly instructions carefully. While larger pieces may not be explicitly marked, they can be identified using the illustrations.

Assembly Steps:

1. **Unpack Components:** Lay out all panels and hardware. Verify against the package contents list.
2. **Assemble Base:** Attach the side panels to the base panel, ensuring proper alignment.
3. **Construct Levels:** Build the lower and upper levels of the cat house according to the diagrams. Note the two-level design for resting and observation.
4. **Install Platforms and Entrances:** Secure the side platforms and attach the PVC curtains to the main and side escape doors.
5. **Attach Roof:** Secure the asphalt roof to the top of the structure.
6. **Insert Insulated Liner:** Place the insulated liner inside the designated areas of the cat house.

7. **Position Heating Pad:** Place the electric heating pad on the bottom floor of the cat house. Ensure the chew-resistant cable is routed safely out of the house.
8. **Final Check:** Ensure all screws are tightened and the structure is stable.

Image 4.2: The two-level design offers distinct spaces for cats.

5. Operating Instructions

The GUTINNEEN Heated Cat House is designed for simple operation, primarily focusing on the automatic heating pad.

Heated Pad Operation:

- **Power On:** Once the heating pad is correctly placed inside the cat house, plug its power cord into a suitable outdoor-rated electrical outlet.
- **Automatic Temperature Control:** The heating pad features an automatic temperature control system. It will maintain a comfortable temperature range of approximately 95-113°F (35-45°C) when plugged in. No manual adjustment is needed.

- **Overheat Protection:** Built-in safety sensors prevent the pad from overheating, ensuring a safe environment for your pets.
- **Consistent Warmth:** The pad provides stable and consistent warmth, ideal for cold weather conditions.

Image 5.1: The heating system provides instant, consistent warmth with automatic temperature control and overheat protection.

6. Maintenance

Regular maintenance ensures the longevity and hygiene of your GUTINNEEN Heated Cat House.

Cleaning the Cat House:

- **Access:** The cat house features two side doors and a removable roof for easy access, making cleaning and feeding convenient.
- **Exterior:** Wipe down the exterior surfaces with a damp cloth and mild, pet-safe cleaner as needed.
- **Interior:** Remove any debris or soiled bedding. The insulated liner can be removed for thorough cleaning.

Heating Pad and Liner Care:

- **Heating Pad Cover:** The cover of the heating pad is removable and washable. Unzip and remove the cover.
- **Washing:** Machine wash the cover in cold water on a gentle cycle ONLY.
- **Drying:** Air dry naturally. Do not tumble dry. Ensure it is completely dry before zipping it back onto the heating pad.
- **Insulated Liner:** The insulated liner can be spot cleaned or hand washed with a mild detergent. Air dry thoroughly.

Image 6.2: The heating pad cover is removable and machine washable for hygiene.

7. Troubleshooting

If you encounter any issues with your cat house, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Heating pad not warming up.	Not plugged in; power outlet issue; pad malfunction.	Ensure the pad is securely plugged into a working outlet. Test the outlet with another device. If still not working, contact customer support.
Cat not using the house.	Unfamiliarity; location preference; other shelters available.	Place familiar bedding or toys inside. Try moving the house to a more secluded or preferred location. Give the cat time to adjust.
Water or moisture inside.	Improper assembly; extreme weather; damaged roof/curtains.	Check all seams and roof installation for gaps. Ensure PVC curtains are properly installed. Consider placing the house in a more sheltered spot. Inspect for damage.
House feels unstable.	Loose hardware; uneven ground.	Tighten all screws and bolts. Ensure the house is on a flat, stable surface.

8. Specifications

- **Model Number:** AIR14-IN-HP-2-L2-AD
- **Product Dimensions (D x W x H):** 20" x 28" x 34"
- **Item Weight:** 79 pounds
- **Material:** Acrylic, Asphalt, Fir Wood
- **Color:** Grey
- **Heating Pad Temperature Range:** 95-113°F (35-45°C)
