## SETUP

### Wireless Connection (PC/PS4/PS5)

1. Insert the 5.8GHz Wireless USB Adapter into an available USB port on your PC, PS4, or PS5 console.
2. Power on the G01 headset by pressing and holding the Power On/Off button until the indicator light illuminates.

3. The headset should automatically pair with the USB adapter. A solid indicator light on the headset confirms a successful connection.
4. Adjust your device's audio settings to ensure the XIBERIA G01 headset is selected as the default input and output device.

### **Wired Connection (PC/PS4/PS5/Xbox One/Nintendo Switch/Mobile Devices)**

1. Connect one end of the provided 3.5mm audio cable to the 3.5mm Audio Interface on the headset.
2. Connect the other end of the 3.5mm audio cable to the audio jack on your desired device (e.g., PC, PS4/PS5 controller, Xbox One controller, Nintendo Switch, mobile phone).
3. The headset will function in wired mode. Ensure your device's audio settings are configured to use the connected headset.

- Connect the other end of the USB cable to a compatible USB power source (e.g., computer USB port, USB wall adapter).
- The indicator light will show charging status (e.g., solid red while charging, off or green when fully charged).

## MAINTENANCE

Proper maintenance ensures the longevity and performance of your headset:

- **Cleaning:** Use a soft, dry cloth to clean the headset. For earcups, a slightly damp cloth can be used, but ensure no moisture enters the speaker grilles or ports. Do not use harsh chemicals or abrasive materials.
- **Storage:** Store the headset in a cool, dry place away from direct sunlight and extreme temperatures. Avoid placing heavy objects on the headset.
- **Battery Care:** To preserve battery life, avoid fully discharging the headset frequently. If storing for an extended period, charge the headset to about 50% before storage and recharge every few months.
- **Cable Management:** Avoid sharp bends or kinks in the cables to prevent damage.

## TROUBLESHOOTING

If you encounter issues with your G01 Wireless Gaming Headset, please refer to the following common solutions:

Problem	Possible Cause	Solution
No sound from headset (Wireless)	Headset not powered on; Not paired; Low battery; Incorrect audio output settings.	Ensure headset is powered on and charged. Verify the USB adapter is securely plugged in. Check your device's audio settings to ensure the headset is selected as the output device. Re-pair if necessary.
Microphone not working	Microphone muted; Incorrect audio input settings; Microphone not properly connected (if detachable).	Press the Mic Mute button to unmute. Check your device's audio settings to ensure the headset microphone is selected as the input device. Ensure the microphone is securely plugged into the headset.

<b>Problem</b>	<b>Possible Cause</b>	<b>Solution</b>
Intermittent connection or static	Interference from other devices (2.4GHz); Headset too far from adapter; Obstructions.	Move closer to the USB adapter. Ensure no major obstructions are between the headset and adapter. Minimize other 2.4GHz wireless devices in the vicinity.
Headset not charging	Charging cable faulty; Power source issue; Port damage.	Try a different USB Type-C cable and/or a different USB power source. Ensure the cable is securely connected to both the headset and the power source.
No sound from headset (Wired)	3.5mm cable not fully inserted; Incorrect audio output settings; Cable damage.	Ensure the 3.5mm cable is fully inserted into both the headset and the device. Check your device's audio settings. Try a different 3.5mm cable if available.
