## SETUP AND ASSEMBLY

---

Assembly of the MG 1/100 Altron Gundam EW requires careful attention to detail. Follow the step-by-step instructions provided in the included printed manual for precise construction.

### Recommended Tools:

- Plastic Nippers: For cleanly cutting parts from the runners.
- Hobby Knife: For trimming nubs and refining parts.
- Tweezers: Useful for applying small decals and handling tiny parts.
- Sanding Sticks/Files: For smoothing cut surfaces.

### Assembly Steps Overview:

1. **Unpack and Organize:** Carefully open the box and identify all runners. Refer to the runner layout in the manual.
2. **Part Removal:** Use plastic nippers to carefully cut parts from the runners. Cut slightly away from the part first, then make a second cut closer to the part to minimize stress marks.
3. **Clean Nubs:** Use a hobby knife or sanding stick to remove any remaining nubs for a smooth finish.
4. **Follow Manual:** Assemble sections (e.g., head, torso, arms, legs, weapons) according to the numbered steps in the

instruction manual. Pay attention to part orientation.

5. **Decal Application:** Apply the included decals after assembly of the respective sections, following the decal placement guide in the manual.
6. **Final Assembly:** Connect all assembled sections to form the complete mobile suit.

## MAINTENANCE

Proper care will preserve the appearance and integrity of your model kit.

- **Cleaning:** Dust your model regularly with a soft brush or compressed air to prevent dust buildup. Avoid using harsh chemicals or abrasive materials.
- **Storage:** Store the model in a cool, dry place away from direct sunlight, which can cause plastic discoloration and decal degradation.
- **Handling:** Handle the model by its main body parts rather than delicate appendages or weapons to prevent accidental breakage.

## TROUBLESHOOTING

Common issues and their solutions:

- **Loose Joints:** If a joint feels too loose, you can apply a thin layer of clear nail polish or a specialized hobby joint-tightening solution to the peg and let it dry before reassembling.
- **Broken Parts:** Small breaks can often be repaired with plastic cement. For larger or critical breaks, contact Bandai Namco customer support for potential replacement parts, if available.
- **Decals Not Sticking:** Ensure the surface is clean and dry. Use a decal setting solution to help decals conform to the surface and adhere better.
