

Marantec Comfort 360

Marantec Comfort 360 Electric Garage Door Opener User Manual

Model: Comfort 360 (183504)

1. INTRODUCTION AND SAFETY INFORMATION

This manual provides essential information for the safe installation, operation, and maintenance of your Marantec Comfort 360 Electric Garage Door Opener. Please read this manual thoroughly before beginning installation or operation to ensure proper function and to prevent injury or damage.

1.1 General Safety Warnings

- Always disconnect power to the opener before performing any maintenance or repairs.
- Keep children and pets away from the garage door area, especially during operation.
- Do not allow children to operate the garage door opener controls.
- Ensure the garage door is balanced and in good working order before installing the opener.
- Install the wall control button within sight of the door, at a minimum height of 1.5 meters (5 feet) to prevent accidental operation by children.
- Regularly inspect the garage door system, including springs, cables, rollers, and other hardware, for signs of wear or damage. Do not attempt to repair these components yourself; contact a qualified service technician.
- The opener is designed for use with residential garage doors only.

2. PACKAGE CONTENTS

Verify that all components listed below are present in your package. If any items are missing or damaged, please contact your retailer or Marantec customer support.

- Marantec Comfort 360 Garage Door Opener Unit
- Radio Receiver
- Digital 572 2-Channel Handheld Transmitter
- Digital 564 4-Channel Handheld Transmitter
- Power Cable with Plug
- Mounting Material (screws, brackets, etc.)
- Warning Sticker

- User Manual (this document)

Note: The drive rail for the garage door opener is sold separately and is not included in this kit.

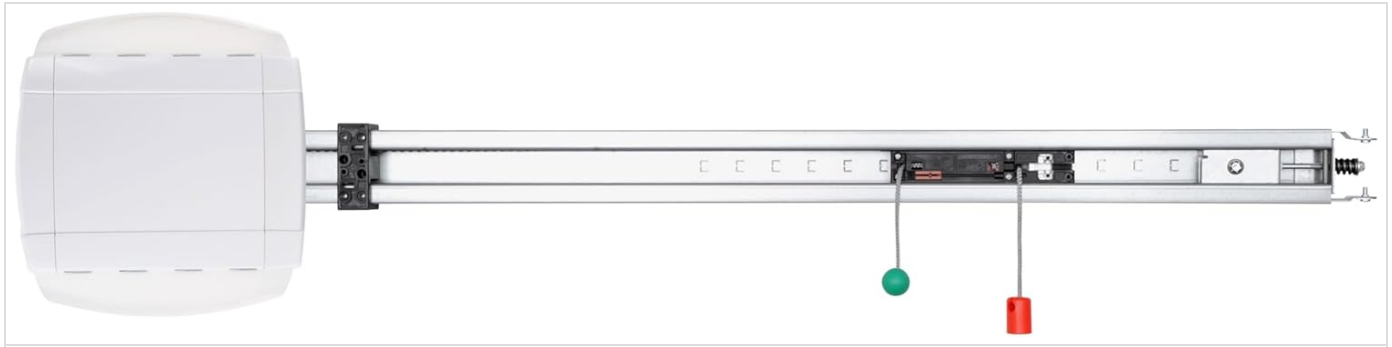

Figure 2.1: Marantec Comfort 360 opener unit with included accessories.

3. SETUP AND INSTALLATION

Installation of the Marantec Comfort 360 requires basic mechanical and electrical knowledge. If you are unsure about any step, it is recommended to consult a professional installer.

3.1 Pre-Installation Checks

- Ensure your garage door is in good working condition, balanced, and moves freely.
- Verify that there is a power outlet within reach of the opener's power cable.
- Confirm that you have the appropriate drive rail for your garage door type and height.

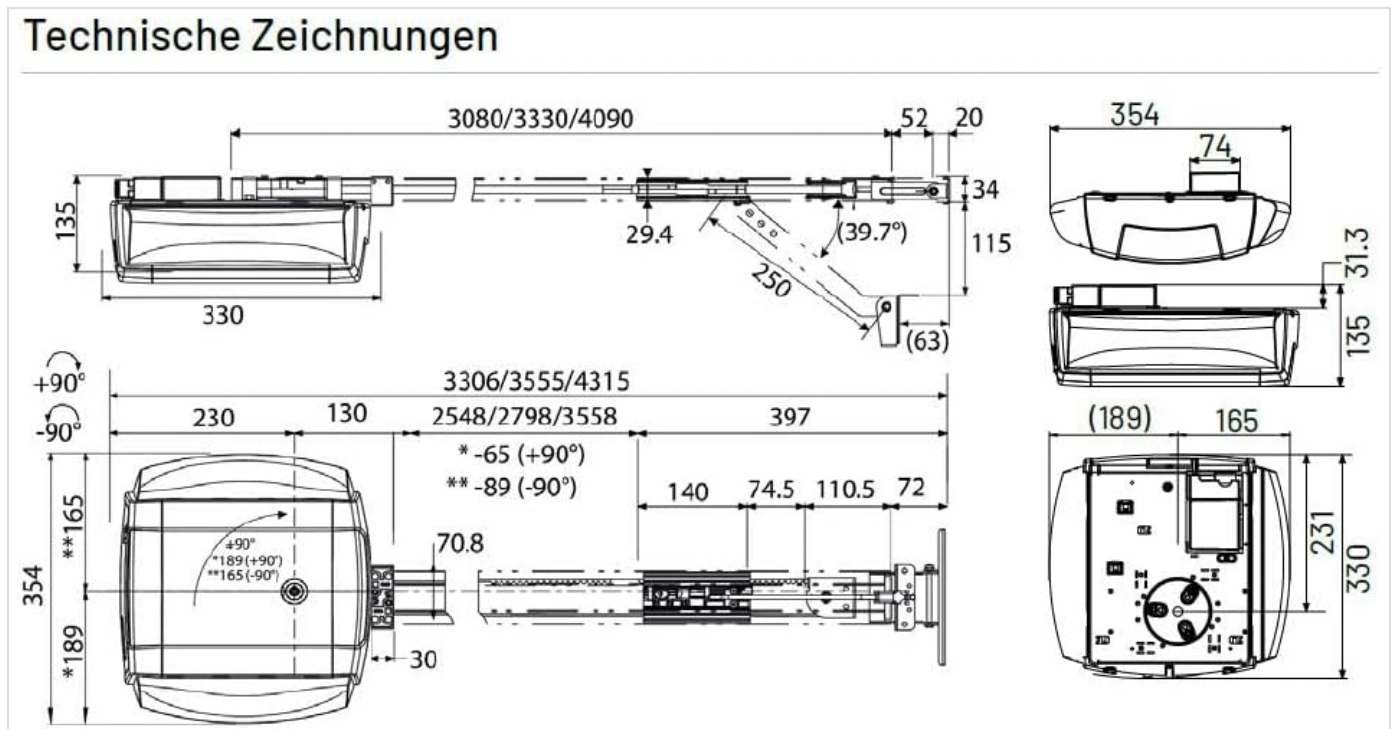

Figure 3.1: Technical dimensions for installation planning.

3.2 Mounting the Opener

1. Assemble the drive rail according to its specific instructions.
2. Attach the opener unit to the drive rail.
3. Mount the assembled opener and rail system to the garage ceiling and the header bracket above the garage door, ensuring it is level and securely fastened. Refer to the detailed instructions provided with your drive rail for precise

mounting steps.

Figure 3.2: Front view of the Marantec Comfort 360 opener unit.

3.3 Connecting Power

Plug the power cable into the opener unit and then into a grounded electrical outlet. Ensure the outlet is easily accessible for disconnecting power when needed.

3.4 Initial Programming and Limit Setting

After installation, the opener needs to learn the travel limits (open and close positions) of your garage door. This process typically involves:

1. Activating the programming mode on the opener unit (refer to the specific button sequence on the unit).
2. Manually moving the door to its desired fully open position and saving it.
3. Manually moving the door to its desired fully closed position and saving it.
4. The opener will then perform a few test cycles to automatically adjust the force settings.

Note: Detailed programming steps are usually found on a sticker on the opener unit or in a separate quick-start guide. If you encounter difficulties, refer to the troubleshooting section or contact support.

4. OPERATING YOUR GARAGE DOOR OPENER

The Marantec Comfort 360 offers convenient operation via handheld transmitters and can be integrated with smart home systems.

4.1 Using Handheld Transmitters

Your kit includes two handheld transmitters: a Digital 572 (2-channel) and a Digital 564 (4-channel). These transmitters

are pre-programmed to operate your garage door opener.

- Press the assigned button on the transmitter once to open or close the garage door.
- Pressing the button again during operation will stop the door.
- The transmitters feature 128-bit encryption and rolling code technology for enhanced security.

Figure 4.1: Example of a Marantec handheld transmitter.

4.2 Manual Operation (Power Failure)

In case of a power outage, you can manually open or close your garage door. Locate the emergency release handle (usually a red cord) attached to the trolley on the drive rail. Pull the handle firmly to disengage the door from the opener. You can then manually lift or lower the door. To re-engage, push the door back into the trolley until it clicks into place, or follow the specific re-engagement instructions for your rail system.

4.3 Smart Home Integration (maveo)

The Marantec Comfort 360 is compatible with the maveo smart home system. This allows you to control and monitor your garage door from your smartphone, both at home and remotely. For maveo integration, you will need additional maveo hardware (sold separately). Refer to the maveo system's documentation for setup and operation instructions.

5. MAINTENANCE

Regular maintenance ensures the longevity and safe operation of your Marantec Comfort 360 garage door opener.

5.1 Monthly Checks

- **Safety Reversal Test:** Place a 2x4 piece of wood flat on the floor in the path of the garage door. Close the door. The door should reverse upon contact with the wood. If it does not, adjust the force settings or contact a service technician.

- **Photo Eye Test:** Wave your hand in front of the photo eyes (located near the bottom of the door tracks) while the door is closing. The door should stop and reverse. Clean the photo eyes if they are dirty.
- **Door Balance:** Disengage the opener and manually lift the door. It should stay in place at any point of travel. If it drifts up or down, the springs are out of balance and require professional adjustment.
- **Hardware Inspection:** Check all nuts, bolts, and screws on the door and opener for tightness. Inspect rollers, cables, pulleys, and springs for wear or damage.

5.2 Lubrication

Lubricate the garage door's moving parts (rollers, hinges, and springs) annually with a silicone-based lubricant. Do not lubricate the opener's drive rail unless specifically instructed by the rail manufacturer.

5.3 Cleaning

Wipe down the exterior of the opener unit and handheld transmitters with a soft, damp cloth. Do not use abrasive cleaners or solvents.

5.4 Transmitter Battery Replacement

The handheld transmitters use a CR2032 battery. If the transmitter's LED indicator does not light up or its range decreases, replace the battery. Open the transmitter casing, remove the old battery, and insert a new CR2032 battery with the correct polarity.

6. TROUBLESHOOTING

This section addresses common issues you might encounter with your Marantec Comfort 360 opener. For problems not listed here, or if solutions do not resolve the issue, contact Marantec customer support.

Problem	Possible Cause	Solution
Opener does not respond to transmitter.	Dead transmitter battery; transmitter out of range; power outage; opener unplugged; transmitter not programmed.	Replace transmitter battery. Move closer to the opener. Check power supply to opener. Ensure opener is plugged in. Reprogram transmitter if necessary (refer to programming section).
Door does not close completely or reverses.	Obstruction in door path; photo eyes misaligned or dirty; force settings too low; travel limits incorrect.	Remove any obstructions. Clean and align photo eyes. Adjust force settings (consult manual for specific steps). Reprogram travel limits.
Door opens but does not close.	Photo eyes obstructed, misaligned, or faulty.	Check for obstructions. Clean and align photo eyes. If problem persists, photo eyes may need replacement.
Opener motor runs but door does not move.	Door disengaged from opener (emergency release activated); trolley broken.	Re-engage the door to the opener's trolley. Inspect trolley for damage; if broken, contact service.
Unusual noises during operation.	Lack of lubrication; worn rollers or hinges; loose hardware.	Lubricate moving parts of the door. Inspect and tighten all hardware. Replace worn components if necessary.

7. SPECIFICATIONS

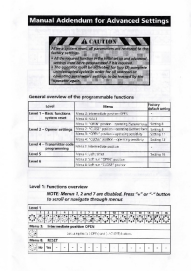

Feature	Specification
Model	Comfort 360
Model Number	183504
Manufacturer	Marantec
Dimensions (L x W x H)	33.5 x 36 x 13.5 cm (13.2 x 14.2 x 5.3 inches)
Weight	4.3 kg (9.5 lbs)
Max. Door Weight	110 kg (242 lbs)
Max. Door Speed	Up to 22 cm/sec (8.7 inches/sec)
Traction/Pressure Force	Up to 650 N
Power Consumption (Standby)	Near zero (Blueline technology)
Lighting	2 LED light modules (expandable)
Transmitter Battery	1 x CR2032 (included)
Security	128-bit encryption, rolling code
Material	Metal
Color	White
Assembly Required	Yes
Origin	Made in Germany

8. WARRANTY AND SUPPORT

Marantec products are manufactured to high-quality standards. For information regarding your product's warranty, please refer to the warranty card included with your purchase or visit the official Marantec website.

For technical assistance, troubleshooting beyond this manual, or to inquire about replacement parts, please contact Marantec customer support. Contact details can typically be found on the Marantec website or on your purchase documentation.

 Comfort 360, 370, 380	Marantec Comfort 360, 370, 380 Garage Door Openers: Technical Specifications and Features Detailed technical data, features, and scope of delivery for Marantec Comfort 360, 370, and 380 garage door openers. Article

Item no.	Description
189632	maveo connect stick - plug & play connectivity module
182384	maveo connect Basic-Bundle: plug & play connectivity module incl. Special 3rd phonolet

Features

Remote Door Control

Open and close your garage door with a tap on your smartphone. No more fumbling for the remote with freezing or manual operation.

Auto-Close Timer

Set up a timer to automatically close your garage door after a specified time. For added safety, you receive a message a day before, ensuring your garage door won't close if there's an obstruction.

Light Control

Switch on the garage door opener's light with a single tap on the phone, when it's safety and visibility in your garage.

Control Home Scenes

Create a scene around your coming home. You can turn the lights on, activate the alarm, set the car to start, or even open your garage door as you arrive.

Status at a Glance

Always know whether your garage door is open or closed with real-time feedback on your smartphone.

Guest Passes

Share access to your garage with family and friends effortlessly. Manage their access and revoke permissions at any time. You're always in control. Never did you receive a call.
