Please read all safety warnings before beginning assembly.

- For external use only.
- Avoid contact with eyes.

- This product contains small parts and is not suitable for children under 3 years due to choking hazards. Manufacturer recommended age is 0-4 years, but adult supervision is advised for assembly due to small components.

## SETUP AND ASSEMBLY

---

### What's in the Box:

- 56 plastic components for Lord Kroak miniature.

- 1 Citadel 80mm Round Base.
- Assembly instructions (typically included within the kit).

## Assembly Steps:

1. **Preparation:** Carefully remove all plastic components from the sprues using a hobby knife or clippers. Clean any mold lines using a hobby file or knife.
2. **Dry Fit:** Before applying adhesive, dry fit components to ensure proper alignment and fit.
3. **Assembly:** Follow the detailed assembly instructions provided within your kit. Use plastic cement or super glue designed for miniatures to bond the components. Work in small sections, allowing glue to cure before proceeding.
4. **Base Assembly:** Attach the assembled Lord Kroak model securely to the Citadel 80mm Round Base.
5. **Optional:** Once assembled, the model can be primed and painted using acrylic hobby paints to achieve your desired aesthetic.

For best results, refer to the specific assembly guide included with your Lord Kroak kit.

## OPERATING / DISPLAYING YOUR MODEL

---

Once assembled and painted, your Lord Kroak miniature is ready for display or use in Warhammer Age of Sigmar tabletop games.

- **Display:** Place your finished model on a stable surface away from direct sunlight, extreme temperatures, and high humidity to preserve its paint and structural integrity.
- **Gaming:** If using for tabletop gaming, refer to the official Warhammer Age of Sigmar core rules and Seraphon battletome for Lord Kroak's specific rules and abilities.

## MAINTENANCE

---

Proper care will ensure the longevity of your Lord Kroak miniature.

- **Cleaning:** Dust your model regularly with a soft, dry brush. For stubborn dust, a very lightly dampened cloth can be used, but avoid excessive moisture, especially on painted surfaces.
- **Storage:** When not on display, store the model in a protective case or box to prevent damage from impacts or dust accumulation. Foam-lined cases are ideal for transport.
- **Handling:** Always handle the model by its base to avoid damaging delicate parts or paintwork.

## TROUBLESHOOTING

---

Here are some common issues and solutions during assembly or handling:

- **Parts Not Fitting:** Ensure all mold lines are removed. Sometimes, a small amount of plastic can remain, preventing a flush fit. Gently file or trim as needed.
- **Broken Components:** If a small part breaks during removal from the sprue or assembly, it can often be re-attached using a strong plastic cement or super glue. For very small or delicate breaks, consider using a small pin for reinforcement.
- **Glue Issues:** If plastic cement isn't bonding, ensure you are using the correct type of glue for plastic models. If super glue is slow to cure, a hobby accelerator can be used.
- **Missing Parts:** Double-check the sprues and packaging. If a part is genuinely missing, contact the retailer or manufacturer's customer support.
