2. **Install Faucet Body:**
 - Place the rubber gasket (2) and metal washer (3) over the mounting rod.

- **Temperature Control:** Move the handle to the left for hot water and to the right for cold water.
- **Waterfall Effect:** The faucet is designed to produce a smooth, quiet waterfall stream. Adjust the handle to achieve your desired flow and temperature.

MAINTENANCE

Regular cleaning and proper care will help maintain the appearance and functionality of your faucet.

- **Cleaning:** Clean the faucet regularly with a soft cloth and mild soap. Avoid abrasive cleaners, harsh chemicals, or scouring pads, as these can damage the matte black finish.
- **Finish Protection:** The matte black finish is designed for superior rust and corrosion resistance. Gentle cleaning will help preserve its appearance.
- **Drain Maintenance:** The pop-up drain features a detachable anti-clogging strainer. Periodically remove and clean the strainer to prevent blockages and ensure proper drainage.

TROUBLESHOOTING

If you encounter any issues with your faucet, refer to the following common solutions:

- **Low Water Flow:** Check if the water supply valves are fully open. Inspect the aerator for any debris or mineral buildup and clean if necessary.
- **Leaks:** Ensure all connections, especially the water supply lines and mounting nuts, are securely tightened. Check the gaskets for proper seating and damage.

- **Noise during Operation:** Some waterfall faucets may produce a slight sound, especially at lower flow rates. Ensure the water flow is not excessively restricted. If the noise is excessive, verify proper installation of internal components.
