SETUP AND ASSEMBLY

The Smoby Veterinary Center requires assembly. Please follow the detailed assembly instructions provided in the separate instruction sheet included in the packaging. Ensure all parts are present before beginning assembly.

1. **Unpack Components:** Carefully remove all parts from the packaging. Verify against the parts list in the assembly sheet.
2. **Identify Main Sections:** Separate the base, examination table, bath area, and back panel components.
3. **Assemble Base Structure:** Connect the legs and lower shelf according to the diagrams. Ensure all connections are secure.
4. **Attach Play Areas:** Secure the examination table and bath area to the main structure.
5. **Install Back Panel and Accessories Holders:** Attach the back panel, including the hamster running wheel and accessory storage compartments.
6. **Apply Stickers:** If included, apply any decorative stickers as indicated in the assembly guide.
7. **Final Check:** Ensure all screws are tightened and the structure is stable before play.

OPERATING INSTRUCTIONS

The Smoby Veterinary Center offers multiple interactive areas for imaginative play:

- **Examination Table:** Place the plush kitten or other animal patients on the green examination table for check-ups. Use the stethoscope to listen to heartbeats, and the thermometer to check temperatures.

- **Bath Area:** The blue washbasin can be filled with water for pretend bathing of the animals. The hand shower can be used to simulate washing. *Note: Ensure water is emptied after play to prevent spills and maintain hygiene.*
- **Hamster Running Wheel:** The integrated running wheel is designed for the plush hamster. Children can place the hamster inside and spin the wheel to simulate exercise and check for any discomfort.
- **Accessory Storage:** Utilize the various shelves and compartments to organize the medical accessories, keeping them tidy and ready for the next patient.
- **Medical History Booklet:** Use the provided booklet to record patient information, symptoms, and treatments, enhancing the role-play experience.

MAINTENANCE AND CARE

- **Cleaning:** Wipe down plastic surfaces with a damp cloth and mild soap. Do not use abrasive cleaners. For plush toys, surface clean only.
- **Water Management:** If the washbasin is filled with water, ensure it is completely emptied and dried after each play session to prevent mold or mildew and to protect the toy's integrity.
- **Storage:** Store the Veterinary Center in a dry, clean place away from direct sunlight to prevent fading and material degradation. Keep all small accessories together to avoid loss.
- **Inspection:** Periodically inspect the toy for any loose parts, damage, or wear. Tighten any loose screws if

necessary. Discontinue use if significant damage is observed.

TROUBLESHOOTING

Issue	Possible Cause	Solution
Toy feels wobbly after assembly.	Screws or connections are not fully tightened.	Review the assembly instructions and ensure all screws are securely fastened.
Water leaks from the washbasin.	The basin may not be properly seated or has a crack.	Check if the basin is correctly inserted. If a crack is present, discontinue use of water in the basin.
Missing accessories.	Accessories may have been misplaced during play or storage.	Thoroughly search the play area. Store accessories in designated compartments after use.
