Setup Guide

Follow these steps to set up your faroro Dog Camera with Treat Dispenser:

1. Download the 'Smart Life' APP from your smartphone's app store.
2. Ensure your phone is connected to the internet.
3. Plug in the faroro device using the provided power adapter and USB cable.
4. Reset the device by long-pressing the reset button until you hear a "ding-dong" sound.
5. Ensure your phone and the device are on the same Wi-Fi network (2.4GHz or 5GHz) for initial pairing.
6. Open the 'Smart Life' APP and follow the on-screen instructions to pair the device. Bluetooth connection simplifies this process.

Operating Instructions

Remote Treat Tossing

To dispense treats remotely, open the 'Smart Life' APP and tap the designated treat tossing button. The device will toss a portion of treats. You can also press the 'Manual Treat Tossing' button directly on the machine. Ensure treats are between 7-15 mm for optimal dispensing.

Treat-Tossing

Tossing distance depends on the location of device and size of food, hung or place are available.

1080P Full HD Video and Night Vision

The camera provides 1080P Full HD video resolution with a 130° wide-angle view, allowing you to monitor your pet clearly. The auto night vision feature ensures visibility in low-light conditions. You can view the live stream video using cellular data as long as the device is connected to the internet.

130° & 1080P Camera

Check-in on your pet any time of the day and night
with full HD live streaming video

Maintenance

Regular maintenance ensures the longevity and optimal performance of your faroro Dog Camera with Treat Dispenser.

- **Cleaning the Device:** Use a soft, dry cloth to wipe the exterior of the device. Avoid using abrasive cleaners or solvents.
- **Cleaning the Treat Hopper:** Periodically empty and clean the treat hopper to prevent residue buildup. Ensure it is completely dry before refilling.
- **Camera Lens:** Gently clean the camera lens with a microfiber cloth to maintain clear image quality.

Troubleshooting

If you encounter issues with your faroro Dog Camera, refer to the following common problems and solutions:

Problem	Solution
Device won't connect to Wi-Fi.	Ensure your Wi-Fi is 2.4GHz or 5GHz. Try resetting the device and re-pairing through the app. Make sure your phone and device are on the same network during initial setup.
Treats are not dispensing.	Check if the treat hopper is full and that treats are within the recommended size (7-15 mm). Ensure the device is powered on and connected. For app dispensing, hold the button down for a few seconds.
Audio quality is poor or low.	Check your phone's volume settings and the device's volume settings in the app. Ensure there is no obstruction to the microphone or speaker on the device.

Problem	Solution
Motion alerts are not received.	Verify that motion detection is enabled in the app settings. Check your phone's notification settings for the 'Smart Life' app. Ensure stable internet connection.

For further assistance, please refer to the support section or contact customer service.
