## 6. MAINTENANCE

To ensure the longevity and appearance of your IRONCK Nightstand, follow these maintenance guidelines:

- **Cleaning:** Wipe surfaces with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners, which can damage the finish.
- **Spills:** Promptly clean up any spills, especially on the engineered wood surfaces, to prevent staining or water damage.
- **Hardware:** Periodically check and tighten all screws and bolts to maintain stability.
- **Wireless Charger:** Keep the charging pad free of dust and debris. Do not attempt to disassemble the charging unit.
- **Placement:** Avoid placing the nightstand in direct sunlight or near heat sources, which can cause fading or warping.

## 7. TROUBLESHOOTING

If you encounter issues with your IRONCK Nightstand, particularly with the wireless charging function, refer to the following common solutions:

### Wireless Charging Issues:

- **Device Not Charging:**

- Ensure the USB-C cable is fully plugged into a power adapter and the adapter is connected to a live power outlet.
- Verify your device is wirelessly charging compatible.
- Reposition your device on the charging pad. It must be centered for proper contact.
- Remove any phone cases thicker than 4mm or cases made of metal. Magnets, cards, or grips attached to the phone or case can also interfere.
- Try a different power adapter if available, ensuring it provides sufficient power for wireless charging.

- **Intermittent Charging:**

- This often indicates poor alignment. Adjust the device's position on the pad.
- Check for foreign objects between the device and the charging pad.
- Ensure the power adapter is stable and not experiencing power fluctuations.

### Structural Issues:

- **Wobbling/Instability:**

- Check all assembly hardware (screws, bolts) and tighten them securely. Do not overtighten.
- Ensure the nightstand is placed on a flat, level surface.

If these steps do not resolve the issue, please contact IRONCK customer support.
