

Nektar SE61

Nektar SE61 USB MIDI Controller Keyboard

Model: SE61 | Brand: Nektar

1. INTRODUCTION

The Nektar SE61 is a USB MIDI controller keyboard designed for music production with computers. It features a full-size, velocity-sensitive keyboard and includes essential performance controls. This manual provides detailed instructions for setting up, operating, and maintaining your SE61 controller, along with information on Nektar DAW integration.

Image 1.1: Top view of the Nektar SE61 USB MIDI Controller Keyboard.

2. WHAT'S IN THE Box

Verify that all items are present in the packaging:

- SE61 Keyboard
- USB Cable
- User Manual (this document)
- Bitwig Studio 8-Track License Card

3. SETUP

3.1 Connecting to Your Computer

- 1. Connect the USB Cable:** Plug one end of the supplied USB cable into the "USB to Host" port on the rear of the Nektar SE61.
- 2. Connect to Computer:** Plug the other end of the USB cable into an available USB port on your computer (Windows, macOS, or Linux).
- 3. Power On:** Ensure the On/Off switch on the rear panel is set to the "On" position. The SE61 is USB bus-powered and does not require an external power supply.
- 4. Driver Installation:** The Nektar SE61 is a class-compliant USB MIDI device, meaning it does not require special drivers for basic functionality on most operating systems. Your computer should automatically recognize it.

Image 3.1: Rear panel showing USB to Host port and Sustain input.

3.2 Connecting to iOS Devices

To connect the SE61 to an iOS device (e.g., iPad), you will need an Apple Camera Connection Kit (not supplied). Connect the USB cable from the SE61 to the Camera Connection Kit, and then connect the kit to your iOS device.

3.3 Software Setup

Once connected, open your Digital Audio Workstation (DAW) or music software. The SE61 should appear as a MIDI input device. Refer to your software's documentation for specific instructions on enabling MIDI input devices.

4. OPERATING INSTRUCTIONS

4.1 Keyboard

The SE61 features 61 full-sized, velocity-sensitive keys. The velocity sensitivity allows for expressive playing, where the force of your key press affects the sound's dynamics.

PLAY - THE ACTION

61 Velocity-Sensitive Full-sized Keys with a Synth Action Keybed for expressive performance.

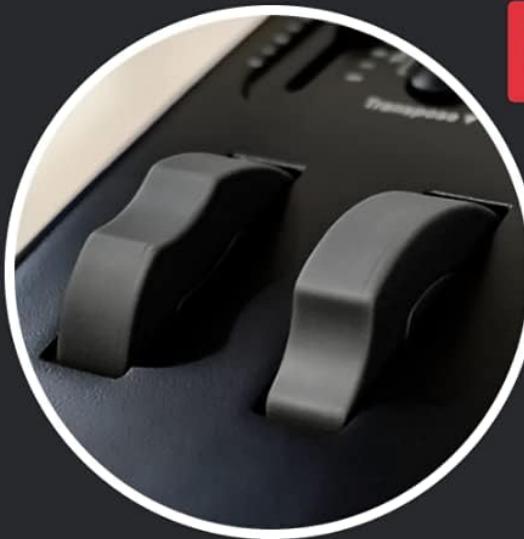

Image 4.1: Close-up of the SE61's velocity-sensitive keys.

4.2 Performance Controls

The left side of the keyboard features several controls for real-time performance and expression:

- **Pitch Bend Wheel:** Allows for real-time pitch modulation of notes.
- **Modulation Wheel:** Typically used to control parameters like vibrato, tremolo, or filter cutoff, depending on the software instrument.
- **Octave Buttons (Up/Down):** Shift the keyboard's octave range up or down.
- **Transpose Buttons (Up/Down):** Shift the keyboard's pitch in semitone increments. Be aware that accidental presses can change the activated note.
- **MIDI-Assignable Fader:** A slider that can be assigned to control various parameters within your DAW or software instruments.

PERFORMANCE CONTROLS

Perform and transform your music with dedicated large Pitch Bend, Modulation Wheel!

HANDS ON - BUTTON UP

Four buttons and one MIDI-assignable fader to the left of the keys make the SE61 even more flexible.

Image 4.2: Detailed view of the SE61's performance controls.

4.3 Nektar DAW Integration

The Nektar SE61 offers dedicated DAW integration for popular Digital Audio Workstations. This integration provides enhanced control over transport functions (play, stop, record), track selection, and more, directly from the keyboard. Supported DAWs include: Bitwig, Cubase, Garageband, Logic, Nuendo, Digital Performer, Mixcraft, Reason, Reaper, Sonar, and Studio One.

For specific setup and usage instructions regarding Nektar DAW integration, please visit the official Nektar website and refer to the dedicated documentation for your chosen DAW.

NEKTAR DAW INTEGRATION

Take control of your favorite DAW with Nektar's renowned integration! Transport, track selection and more, directly from the SE61!

COMPATIBLE WITH

Logic Pro X

Color	Black
Item Weight	6.6 pounds (approx. 3 kg)
Product Dimensions (L x W x H)	38.77 x 7.75 x 2.75 inches (approx. 98.5 x 19.7 x 7 cm)

6. TROUBLESHOOTING

6.1 No Sound or MIDI Output

- **Check USB Connection:** Ensure the USB cable is securely connected to both the SE61 and your computer. Try a different USB port or cable.
- **Power On:** Verify the On/Off switch on the SE61 is in the "On" position.
- **DAW/Software Settings:** Confirm that the Nektar SE61 is selected as a MIDI input device within your DAW or music software's preferences/settings.
- **Instrument Track:** Ensure you have an instrument track armed for recording or monitoring, and that a virtual instrument is loaded and active.
- **Octave/Transpose Settings:** Check if the Octave or Transpose buttons have been accidentally pressed, shifting the keyboard out of the audible range or to an unexpected pitch.

6.2 Keys Not Responding or Sticking

- **Restart:** Disconnect and reconnect the USB cable, then restart your computer and DAW.
- **Cleanliness:** Ensure no debris or liquids have entered the keybed. Refer to the Maintenance section for cleaning instructions.
- **Software Glitch:** Close and reopen your music software. If the issue persists, try testing with a different MIDI monitoring application to determine if the problem is with the keyboard or the software.

6.3 DAW Integration Not Working

- **Nektar Website:** Visit the official Nektar website for the latest DAW integration files and detailed setup guides specific to your DAW.
- **Installation:** Ensure any necessary Nektar DAW integration files have been correctly installed according to Nektar's instructions.
- **DAW Preferences:** Double-check your DAW's control surface or MIDI preferences to ensure the Nektar SE61 is correctly configured for integration.

7. MAINTENANCE

7.1 Cleaning

- **Exterior:** Use a soft, dry, lint-free cloth to wipe the surface of the SE61. For stubborn dirt, slightly dampen the cloth with water. Avoid abrasive cleaners, solvents, or waxes.
- **Keys:** Gently wipe the keys with a soft, slightly damp cloth. Do not allow liquids to seep between the keys.
- **Ports:** Keep all ports free of dust and debris. Use compressed air if necessary, but avoid inserting objects into the ports.

7.2 Storage

When not in use, store the Nektar SE61 in a clean, dry environment away from direct sunlight, extreme temperatures, and excessive humidity. If transporting, consider using a padded case to protect the keyboard.

8. WARRANTY AND SUPPORT

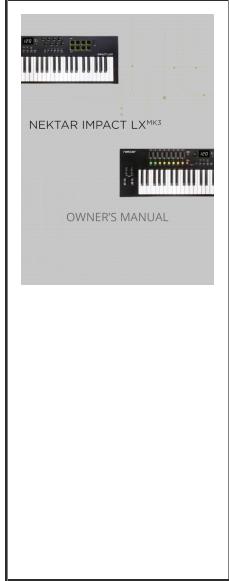

For warranty information, technical support, and further assistance, please refer to the official Nektar Technology website or contact their customer support directly. Keep your proof of purchase for warranty claims.

[Nektar DAW Integration and SE25/SE49/SE61 Working Together](#)

To get your SE61 working with your DAW, locate the instructions for your DAW on the following pages and complete installation & setup.

With Nektar DAW integration installed, here is how your Nektar product works with your DAW.

SE25/SE49/SE61 provide instant access to transport controls as well as track or patch change in your DAW, using the 4 buttons with the transport controls.

ASSIGNING THE REWIND-FORWARD BUTTONS TO CONTROL TRACK OR PATCH NAVIGATION:

- Press the two buttons labeled [Rewind] on your SE25/SE49/SE61. The Setup menu is now active.
- On the keyboard, press the key with the [Track] label above (SE25: C4; SE49/SE61: D4).
- From the menu, select the transport controls and [Setup] (or [DAW] if this step is not needed).
- The Rewind button now navigates to previous track and the [Forward] button navigates to next track.
- To assign the buttons to control your DAW's patch changes, follow the same steps, replacing the [Track] key with the one labeled Patch.

* Note: In FL Studio, [Track] navigates the master track and [Patch] navigates the Channel.

TRANSPORT CONTROL:

- Press the [Play] + [Rewind] buttons (the two buttons on the left) on your SE25/SE49/SE61 at the same time to assign the 4 buttons to transport controls.
- Each of the buttons now control transport functions according to their label: Play, Record, Rewind and Forward.
- Press [Play] + [Rewind] again to end transport control.

CONTROLLING VOLUME (ARMED STATE):

The [Fader] button is assigned to control volume of the currently selected track.

Move the fader all the way up and down. The master volume for the currently selected track is now controlled by the fader.

Nektar DAW Integration and SE Series Working Together

To get your SE Series working with your DAW, locate the instructions for your DAW on the following pages and complete installation & setup. With Nektar DAW Integration installed, here is how your Nektar product works with your DAW, using the buttons with the transport controls.

The SE Series provides instant access to transport controls as well as track or patch changes in your DAW, using the buttons with the transport controls.

ASSIGNING THE REWIND/FORWARD BUTTONS TO CONTROL TRACK OR PATCH NAVIGATION

- Press the two buttons labeled [Rewind] on your SE Series. The Setup menu is now active.
- On the [Rewind] button, press the [Patch] button.
- Press the higher C key labeled [Enter] to confirm selection and exit Setup. (Note: on SE25, this step is not needed).

The [Rewind] button now navigates to previous track and the [Forward] button navigates to next track.

To use the buttons to control your DAW's patch changes, follow the same steps, replacing the [Track] key with the one labeled [Patch] (2020 SE25, SE49, SE61 only).

* Note: In D-Studio, [Track] negotiates the mixer In and [Patch] negotiates the Out.

CONTROLLING VOLUME (SE49/SE61)

The [Volume] fader is assigned to control the volume of the currently selected track. Move the fader all the way up and down. The main volume for the currently selected track is now controlled by the fader. In Reason, the fader controls the volume for the currently selected instrument instead of the mixer channel.
