MageGee MK-Star-Blue

MageGee 75% Mechanical Gaming Keyboard User Manual

Model: MK-Star-Blue | Brand: MageGee

INTRODUCTION

This manual provides comprehensive instructions for the setup, operation, maintenance, and troubleshooting of your MageGee 75% Mechanical Gaming Keyboard. Designed for gamers, typists, programmers, and writers, this compact TKL wired keyboard offers a responsive typing experience with its mechanical blue switches and customizable LED backlighting.

SETUP

The MageGee MK-Star keyboard is designed for simple plug-and-play functionality, requiring no additional drivers or software installation.

1. **Unpacking:** Carefully remove the keyboard and its accessories from the packaging.
2. **Connection:** Connect the USB 2.0 cable from the keyboard to an available USB port on your computer (PC,

Laptop, or Gaming Console).

3. **System Recognition:** Your operating system (Windows 2000/XP/ME/Vista/7/8, Linux, or Mac) will automatically detect and configure the keyboard.

OPERATING INSTRUCTIONS

Mechanical Blue Switches

The keyboard features mechanical blue switches, known for their tactile bump and audible click sound. This provides a crisp paragraph feeling and excellent input feedback, ideal for both gaming and typing.

Image: A close-up view of several keycaps removed, revealing the blue mechanical switches underneath, highlighting their design.

LED Backlight Control

The keyboard offers a charming blue LED backlight with multiple illuminated light effects, including static and dynamic modes. There are approximately 19 different backlight modes to choose from.

- **Switch Backlight Mode:** Press **Fn + |** to cycle through the various backlight modes.
- **Adjust Backlight Brightness:** Press **Fn + ↑** to increase brightness, and **Fn + ↓** to decrease brightness.
- **Adjust Backlight Speed:** Press **Fn + -_** to decrease speed, and **Fn + =+** to increase speed for dynamic modes.

Anti-Ghosting and Multimedia Keys

All 87 keys on the keyboard feature anti-ghosting, ensuring that multiple key presses are registered simultaneously and accurately, which is crucial for gaming. The keyboard also includes 12 dedicated multimedia shortcut keys for enhanced convenience.

Image: A detailed view of the keyboard's top row, specifically highlighting the 12 multimedia shortcut keys (F1-F12) and their respective functions, such as media playback controls and volume adjustment.

The multimedia keys (F1-F12) can be accessed by pressing the **Fn** key in combination with the desired F-key. These include functions for media control, volume, email, and more.

Ergonomic Design

The keyboard features a stylish grey and black 75% layout, designed to save space while maintaining full functionality. It includes double kickstand feet for adjustable typing angles and a durable metal panel for protection against scratches. The keycaps are double-shot injection non-slip suspension type, and the design is splash-proof.

MAINTENANCE

Proper maintenance ensures the longevity and optimal performance of your keyboard.

- **Cleaning:**
  Regularly clean the keyboard to prevent dust and debris buildup. Use a soft brush or compressed air to remove particles between keys. For surface cleaning, a slightly damp, lint-free cloth can be used. Ensure the keyboard is disconnected before cleaning.

- **Keycap Replacement:**
  The keyboard comes with a key puller and extra keycaps (16 red keycaps) for customization or replacement. To remove a keycap, gently use the key puller to lift it straight up. To install a new keycap, align it with the switch stem and press down firmly until it clicks into place.

- **Storage:**
  When not in use, store the keyboard in a dry, cool place away from direct sunlight and extreme temperatures.

TROUBLESHOOTING

If you encounter issues with your MageGee keyboard, refer to the following common solutions:

- **Keyboard Not Responding:**

  - Ensure the USB cable is securely connected to both the keyboard and the computer's USB port.
  - Try connecting the keyboard to a different USB port on your computer.
  - Test the keyboard on another computer to determine if the issue is with the keyboard or the original computer.
  - Restart your computer.

- **Backlight Not Working or Incorrectly Displaying:**

  - Ensure the backlight is not turned off. Press **Fn + |** to cycle through modes and **Fn + ↑** to increase brightness.
  - If a specific key's backlight is not working, it might indicate a hardware issue.

- **Keys Not Registering or "Ghosting" Issues:**

  - While the keyboard has anti-ghosting, ensure no debris is lodged under the keycap preventing proper switch actuation.
  - Disconnect and reconnect the keyboard.
  - Ensure your operating system and drivers are up to date (though typically not required for this plug-and-play keyboard).

SPECIFICATIONS

Feature	Detail
Product Dimensions	13.98 x 5.04 x 1.4 inches (35.5 x 12.8 x 3.6 cm)
Item Weight	2.29 pounds (1.04 kg)
