SAFETY INFORMATION

Your safety is paramount. Please adhere to the following safety guidelines:

- **Maximum Weight Capacity:** Ensure that the weight limits for each bed are strictly observed to prevent structural failure. Consult the specifications section for detailed weight capacities.
- **Pinch Points and Sharp Edges:** Exercise caution during assembly and use to avoid potential pinch points or sharp edges. Inspect the bed regularly for any damage or wear that could create hazards.
- **Proper Assembly:** Follow all assembly instructions precisely. Incorrect assembly can lead to instability or collapse, posing a serious risk of injury. Do not modify the bed structure.
- **Guardrails:** The top bunk and loft bed are equipped with full-length guardrails for safety. Ensure they are always securely in place.

- **Ladder Use:** Always use the provided ladders for accessing the upper bunks and loft bed. Do not jump on or off the beds.
- **Mattress Size:** Use only mattresses of the specified size to ensure proper fit and safety. The side rails are designed for standard mattresses without excessive pillow tops.
- **Ventilation:** Ensure adequate ventilation around the bed, especially if placed in a corner, to prevent moisture buildup.
- **Children's Use:** This bed is intended for kids and teens. Supervise younger children to ensure safe use.

MAINTENANCE

Regular maintenance will ensure the longevity and safety of your Polibi bunk bed.

- **Cleaning:** For the metal frame, wipe with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals that could damage the finish. For any fabric components (e.g., mattress covers, if applicable), follow their specific care instructions. The manufacturer specifies "Dry Clean Only" for general product care, which typically refers to textiles. For the metal frame, a simple wipe-down is sufficient.
- **Hardware Check:** Periodically inspect all bolts, screws, and connections to ensure they remain tight. Re-tighten any loose hardware to maintain stability.
- **Structural Integrity:** Regularly check the bed frame for any signs of bending, cracks, or damage. If any structural issues are observed, discontinue use immediately and contact customer support.
- **Slat Condition:** Ensure all metal slats are in place and undamaged. Damaged or missing slats can compromise

mattress support and safety.

TROUBLESHOOTING

This section addresses common issues you might encounter with your bunk bed.

- **Missing or Damaged Parts:** If you find any parts missing or damaged upon delivery, do not proceed with assembly. Contact Polibi customer support immediately for replacement parts.
- **Assembly Difficulties (Holes Not Aligning):** Ensure you are following the assembly instructions precisely. Often, perceived misalignment is due to parts being oriented incorrectly. Double-check each step and the orientation of components before tightening fasteners. Loosen previously tightened bolts slightly to allow for adjustment if needed, then re-tighten once aligned.
- **Bed Instability/Wobbling:** This is typically caused by loose hardware. Re-check and tighten all bolts and

connections throughout the entire frame. Ensure the bed is placed on a level surface.

- **Scratches on Frame:** Minor cosmetic scratches may occur during shipping or assembly. These can often be touched up with a black marker or appropriate metal paint. For significant damage, contact customer support.
- **Squeaking Noises:** Squeaking can result from loose connections or metal-on-metal friction. Identify the source of the noise and tighten the corresponding hardware. Applying a small amount of silicone spray to contact points (avoiding areas that support weight directly) can sometimes help.
