## JODSONE FJFIEJFOK3398

# JODSONE Gel Nail Polish Kit with UV LED Light - Model FJFIEJFOK3398 Instruction Manual

Brand: JODSONE | Model: FJFIEJFOK3398

## INTRODUCTION

---

This manual provides comprehensive instructions for the JODSONE Gel Nail Polish Kit. This kit includes 32 classic gel nail polish colors, a base coat, a no-wipe top coat, a matte top coat, a glitter top coat, a professional UV LED nail lamp, and various manicure tools. It is designed to enable users to create diverse nail styles at home.

## SAFETY INFORMATION

- Keep all products out of reach of children.
- Avoid direct contact of gel polish with skin, eyes, mouth, and face. In case of contact, rinse thoroughly with water and seek medical advice if irritation persists.
- Use in a well-ventilated area.
- Discontinue use if any allergic reaction or irritation occurs.
- The UV LED lamp emits light that can be harmful to eyes. Avoid looking directly into the light.
- Store gel polishes in a cool, dry place away from direct sunlight.

## SETUP

### Unpacking the Kit

Carefully remove all components from the packaging. Verify that all items listed in the product description are present. Dispose of packaging materials responsibly.

## Connecting the UV LED Lamp

1. Place the UV LED nail lamp on a stable, flat surface.
2. Connect the power adapter to the lamp's power input port.
3. Plug the power adapter into a suitable electrical outlet. The lamp is now ready for use.

# High Quality Gel Nail Polish

-  Safe formula
-  Low odor
-  Natural resin
-  Easy to apply

## OPERATING INSTRUCTIONS

### Nail Preparation

1. **Trim and File:** Trim nails to desired length and shape using the nail clipper and files provided.

2. **Buff:** Gently buff the nail surface with the buffing block to remove shine and create a rough texture for better adhesion.
3. **Clean:** Wipe nails with a nail cleanser pad or alcohol wipe to remove dust, oils, and debris. Ensure nails are completely dry before proceeding.
4. **Push Cuticles:** Gently push back cuticles using the cuticle pusher.

Image: Visual steps for applying gel polish, starting with nail preparation.

## Gel Polish Application

1. **Base Coat:** Apply a thin, even layer of JODSONE Base Coat to each nail. Cure under the UV LED lamp for 30-60 seconds. The surface will remain tacky, which is normal and helps the next layer adhere.
2. **Color Gel:** Apply a thin, even layer of your chosen JODSONE Color Gel. Cure under the UV LED lamp for 60-90 seconds. Apply a second thin coat of color gel and cure again for 60-90 seconds. For darker colors or desired opacity, a third thin coat may be applied and cured.
3. **Top Coat:** Apply a thin, even layer of JODSONE Top Coat (Glossy, Matte, or Glitter). Cure under the UV LED lamp for 60-120 seconds until completely dry and hard.
4. **Finishing:** If using a traditional top coat (not no-wipe), wipe off the sticky residue with a nail cleanser pad. Apply cuticle oil around the nails for hydration.

Proper application ensures long-lasting results, typically over 21 days.

# Professional Nail Lamp

**2X**  
**FASTER**   
than the ordinary nail lamp to dry

**Faster Dry**  
Dry all gels

**4 timing modes**  
30S, 60S, 90S, 120S  
low heat

**LCD display**  
Curing time is clear

**24 LED beads**  
Dual light source

**Auto sensor**  
Hand in, light on,  
hand out, light off

Image: Examples of long-lasting gel manicures achieved with the kit.

## Using the UV LED Lamp

The JODSONE UV LED Nail Lamp features a smart sensor and multiple timer settings for convenience and efficiency.

- **Automatic Sensor:** Simply place your hand into the lamp, and it will automatically turn on. Remove your hand, and the light will turn off.
- **Timer Buttons:** Select desired curing time using the 30s, 60s, 90s, or 120s (Low Heat) buttons. The digital display will show the countdown.
- **Low Heat Mode (120s):** This mode gradually increases power over time to eliminate pain caused by curing gel, suitable for sensitive nails.

## MAINTENANCE

### Cleaning the UV LED Lamp

Wipe the exterior of the lamp with a soft, dry cloth. Do not use harsh chemicals or abrasive cleaners. Ensure the lamp is

unplugged before cleaning.

## Storing Gel Polishes

Store gel polish bottles upright in a cool, dark place away from direct sunlight and heat. Ensure caps are tightly sealed to prevent drying or curing of the polish.

## Cleaning Manicure Tools

Clean all reusable manicure tools (cuticle pushers, brushes, etc.) after each use with alcohol or a suitable disinfectant. Store them in a clean, dry place.

## TROUBLESHOOTING

- **Gel Polish Not Curing:** Ensure layers are applied thinly. Thicker coats may not cure properly. Verify the UV LED lamp is functioning correctly and that the correct curing time is selected.
- **Gel Polish Peeling/Chipping:** Proper nail preparation is crucial. Ensure nails are buffed and clean before applying base coat. Cap the free edge of the nail with each coat. Avoid getting polish on cuticles or skin.
- **Color Difference:** Nail gel polish may appear differently under various light sources, displays, and with different numbers of coats. The color card in the image typically shows two layers of color gel.
- **Product Consistency:** Gel polish consistency can be affected by temperature. If it feels too thick, warm the bottle slightly (e.g., by rolling it between your palms). If too thin, shake well before use.

## SPECIFICATIONS

<b>Product Dimensions</b>	11.93 x 5 x 8.15 inches
<b>Item Weight</b>	1.76 Pounds
<b>Model Number</b>	FJFIEJFOK3398
<b>Manufacturer</b>	JODSONE
<b>Liquid Volume (per bottle)</b>	0.27 Fluid Ounces
