6. MAINTENANCE

- **Cleaning:** Wipe down the bed frame with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners that could damage the wood finish. For the chalkboard, use a dry cloth or chalkboard eraser.
- **Hardware Check:** Periodically inspect all bolts, screws, and connections to ensure they remain tight. Re-tighten any loose hardware to maintain structural integrity.
- **Wood Care:** Protect the wood from extreme temperature changes and direct sunlight to prevent warping or fading.
- **Slide Inspection:** Regularly check the slide surface for any damage or rough edges. One customer review mentioned a potential gap at the bottom of the slide that may require covering for safety; inspect this area carefully.

7. TROUBLESHOOTING

This section addresses common issues you might encounter with your Bellemave Twin Low Loft Bed.

- **Difficulty during Assembly (Holes not aligning):** If you experience issues with pre-drilled holes not aligning perfectly, try loosening all surrounding hardware slightly to allow for minor adjustments. Then, align the problematic piece and re-tighten all connections. Avoid forcing parts, as this can cause damage.
- **Bed feels unstable or wobbly:** Ensure all bolts and screws are fully tightened. Double-check that all components are correctly installed according to the assembly instructions. Uneven flooring can also contribute to instability; consider placing shims under the bed legs if necessary.
- **Slide has a gap or sharp edge:** Inspect the bottom edge of the slide where it meets the floor. If a gap or sharp edge is present, consider covering it with a soft, durable material (e.g., heavy-duty tape, foam padding) to prevent scrapes or injuries.
- **Squeaking sounds:** Squeaking often indicates loose connections. Re-tighten all hardware. Applying a small amount of furniture wax or silicone spray to joints can also help reduce friction and noise.
