MohMus FC9521/09, FC952109

MohMus Filter Set Instruction Manual

For Philips PowerPro Active & PowerPro Compact Vacuum Cleaners

1. PRODUCT OVERVIEW

This MohMus filter set is designed as a high-quality replacement for various Philips PowerPro Active and PowerPro Compact vacuum cleaner models. It ensures optimal filtration performance, capturing fine dust and allergens to maintain clean air and efficient vacuum operation. The set includes a washable HEPA hygiene filter, a foam filter, and an exhaust filter.

2. COMPATIBLE MODELS

This filter set is compatible with the following Philips vacuum cleaner series and models:

- Philips FC 8058/01
- PowerPro Active Series: FC8630 - FC8649, FC9520 - FC9529, FC8670 - FC8679, FC9530 - FC9542
- PowerPro Compact Series: FC8470 - FC8479, FC9320 - FC9327

3. PACKAGE CONTENTS

The MohMus filter set includes the following components:

- 1x Washable HEPA Hygiene Filter
- 1x Foam Filter (pre-motor filter)
- 1x Exhaust Filter (including foam)

4. SETUP (INSTALLATION)

Follow these general steps to replace the filters in your Philips vacuum cleaner. Refer to your vacuum cleaner's original manual for specific compartment locations.

1. **Power Off and Unplug:** Always ensure your vacuum cleaner is turned off and unplugged from the power outlet before performing any maintenance.
2. **Locate Filter Compartments:**
 - The HEPA hygiene filter and the pre-motor foam filter are typically located in or near the dust container.
 - The exhaust filter is usually found at the back or side of the vacuum cleaner.
3. **Remove Old Filters:** Carefully open the filter compartments and remove the old, dirty filters. Dispose of them responsibly.
4. **Insert New Filters:** Place the new MohMus filters into their respective compartments. Ensure they are seated correctly and securely.

Image: The MohMus blue foam filter, typically used as a pre-motor filter.

Image: The MohMus black foam filter, often part of the exhaust filter assembly.

5. **Close Compartments:** Securely close all filter compartments.

5. OPERATING

Once the new filters are installed, your vacuum cleaner is ready for use. The filters work to capture dust, dirt, and allergens from the air as it passes through the vacuum, ensuring cleaner exhaust air and protecting the motor from fine particles.

6. MAINTENANCE

Regular maintenance of your filters is crucial for optimal performance and longevity of your vacuum cleaner.

Cleaning Instructions:

- **Washable HEPA Hygiene Filter:** This filter can be rinsed under running tap water. Ensure all dust and debris are removed.
Important: Allow the filter to air dry completely for 24-48 hours before reinstallation. Do not use heat to dry.
- **Foam Filters:** The foam filters are also washable. Rinse them under running water until clean. Squeeze out excess water and allow them to air dry completely for at least 24 hours before placing them back into the vacuum cleaner.

Replacement Frequency:

To ensure optimal filter performance and maintain strong suction, it is recommended to replace the entire filter set every 3 to 6 months, depending on the frequency of use and the level of dust in your environment.

7. TROUBLESHOOTING

If you experience any issues with your vacuum cleaner after installing the new filters, consider the following:

- **Reduced Suction Power:** If suction power decreases, check if the filters are clogged. Even new filters can become clogged quickly in very dusty environments. Ensure all filters are clean and properly installed.
- **Unusual Odors:** Persistent odors during vacuuming may indicate that the filters need cleaning or replacement.
- **Improper Installation:** Double-check that all filters are correctly seated in their compartments and that all covers are securely closed.

8. SPECIFICATIONS

Brand	MohMus
Material	HEPA filter material, Foam
Reusability	Reusable (washable components)
Quantity	1 set (containing 1 HEPA filter, 1 foam filter, 1 exhaust filter)
First Available Date	June 16, 2021

MohMus is not affiliated with Philips. Manufacturer names and part numbers are used for reference purposes only.
