JOYOUNG M6L20

JOYOUNG M6L20 Automatic Water-Filling Noodle Maker Instruction Manual

Model: M6L20

1. Introduction

Welcome to your new JOYOUNG M6L20 Automatic Water-Filling Noodle Maker. This appliance is designed to simplify the process of making fresh pasta and noodles at home with intelligent weighing and automatic water-filling features. Please read this manual thoroughly before first use to ensure safe and efficient operation and to maximize the lifespan of your product.

2. Important Safety Instructions

Always follow basic safety precautions when using electrical appliances to reduce the risk of fire, electric shock, and injury.

- Read all instructions before operating the appliance.
- Keep the appliance and its cord out of reach of children.
- Do not immerse the main unit, cord, or plug in water or other liquids.
- Unplug the appliance from the outlet when not in use, before assembling or disassembling parts, and before cleaning.
- Do not operate any appliance with a damaged cord or plug, or after the appliance malfunctions or has been damaged in any manner.
- Use only attachments recommended or sold by the manufacturer.
- Do not use outdoors. This appliance is for household use only.
- Do not let the cord hang over the edge of a table or counter, or touch hot surfaces.
- Do not place on or near a hot gas or electric burner, or in a heated oven.
- Exercise extreme caution when moving an appliance containing hot oil or other hot liquids.
- This appliance is **not dishwasher safe**. Refer to the cleaning section for proper maintenance.

3. Product Overview and Components

Familiarize yourself with the parts of your JOYOUNG M6L20 Noodle Maker before initial use.

Figure 3.1: Product List. This image displays the main noodle maker unit along with its included accessories: a measuring flour cup, a measuring water cup, a cleaning brush, an instruction manual, and a set of 7 different pasta molds.

The JOYOUNG M6L20 comes with essential accessories for a complete noodle-making experience:

- **Main Unit:** The core appliance housing the motor, control panel, and mixing chamber.
- **Measuring Flour Cup:** For accurate measurement of flour.
- **Measuring Water Cup:** For accurate measurement of water for the automatic filling system.
- **Cleaning Brush:** Designed to help clean the various parts, especially the molds.
- **7 Molds:** A variety of dies to create different noodle shapes and dumpling skins.

Figure 3.2: Stainless Steel Components. This image highlights the durable 304 stainless steel construction of the screw rod, dumpling skin mold, and pressing mold, ensuring longevity and food safety.

4. Setup

Follow these steps to set up your noodle maker for first use:

1. **Unpack:** Carefully remove all components from the packaging. Retain packaging for future storage or transport.
2. **Clean Removable Parts:** Wash all removable parts (mixing chamber, molds, measuring cups, etc.) with warm, soapy water. Rinse thoroughly and dry completely before assembly. Do not wash the main unit.
3. **Assemble:** Place the main unit on a stable, flat, and dry surface. Assemble the mixing chamber and attach the desired mold according to the instructions provided in the detailed assembly guide (refer to the included manual for visual aids).
4. **Connect Power:** Plug the power cord into a grounded electrical outlet.

5. Operating Instructions

The JOYOUNG M6L20 is designed for ease of use with its intelligent features.

5.1 General Operation

The noodle maker features intelligent flour weighing and automatic water proportioning to achieve the perfect dough consistency without manual calculations. Simply add your flour, and the machine will guide the rest of the process.

5.2 Kneading Dough Function

Beyond making noodles, this appliance can also be used to knead dough for other recipes, such as steamed buns or bread.

Figure 5.1: Dough Kneading. The machine's powerful motor and mixing paddle efficiently knead dough, making it suitable for various baked goods like steamed buns and bread.

5.3 Automatic Water Filling

The integrated 350ml water tank automatically adds water in multiple tubes, ensuring a uniform water-to-flour ratio for optimal dough texture and chewier noodles.

Figure 5.2: 350ml Water Tank. This image shows the side-mounted 350ml water tank, designed for automatic and precise water delivery during the dough mixing process.

Figure 5.3: Automatic Water-Filling. A close-up view of the automatic water-filling mechanism, demonstrating water being dispensed into the mixing chamber for consistent dough hydration.

5.4 Intelligent Weighing and Proportioning

The machine features intelligent flour weighing, which automatically calculates and proportions the correct amount of water needed for your chosen flour quantity. This eliminates the guesswork and ensures perfect dough every time.

5.5 Using Different Molds

The JOYOUNG M6L20 includes 7 different molds to create a variety of pasta and noodle shapes:

- Dragon beard noodles
- Thin noodles
- Thick noodles
- Hollow noodles
- Narrow noodles
- Wide noodles
- Dumpling skins

Figure 5.4: Noodle Variety. This image showcases different types of noodles that can be produced using the various molds included with the JOYOUNG M6L20, such as thin, thick, and wide noodles.

5.6 Pre-set Timer (12-Hour Reservation)

Utilize the 12-hour pre-set timer function to schedule your noodle making. The machine features separate dry and wet noodle bins, ensuring that ingredients are kept separate until the programmed mixing time, allowing you to enjoy fresh noodles at your convenience.

6. Maintenance and Cleaning

Regular cleaning and maintenance will ensure the longevity and optimal performance of your noodle maker.

- **Unplug:** Always unplug the appliance from the power outlet before cleaning.
- **Disassemble:** Carefully disassemble all removable parts, including the mixing chamber, screw rod, and molds.
- **Wash Removable Parts:** Wash these parts immediately after use with warm, soapy water to prevent dough from drying and hardening. Use the provided cleaning brush to remove any dough residue from the molds and crevices. Rinse thoroughly and dry completely.
- **Main Unit:** Wipe the main unit with a damp cloth. Do not immerse the main unit in water or spray it with water.
- **Drying:** Ensure all parts are completely dry before reassembling or storing the appliance.
- **Storage:** Store the noodle maker in a clean, dry place.
- **Important:** The JOYOUNG M6L20 is **not dishwasher safe**. Hand wash all removable parts.

7. Troubleshooting

If you encounter any issues with your noodle maker, refer to the table below for common problems and their solutions.

Problem	Possible Cause	Solution

Problem	Possible Cause	Solution
Appliance does not turn on.	Not plugged in; power outage; safety lock not engaged.	Ensure the power cord is securely plugged into a working outlet. Check your household's circuit breaker. Ensure all parts are correctly assembled and the safety lock is engaged.
Dough is too sticky or too dry.	Incorrect flour-to-water ratio.	Even with intelligent weighing, ensure you are using the correct measuring cups for flour and water. For best results, use standard all-purpose flour. Adjust water slightly if necessary for specific flour types.
Noodles are not extruding.	Dough too dry; mold blocked; machine overloaded.	Add a small amount of water (1-2 teaspoons) to the dough. Clean the mold thoroughly. Do not exceed the maximum flour capacity.
Machine is shaking excessively.	Unstable surface; improper assembly; dough too stiff.	Place the machine on a stable, flat surface. Recheck assembly of all parts. Ensure dough consistency is not overly stiff.

8. Specifications

Technical details for the JOYOUNG M6L20 Automatic Water-Filling Noodle Maker:

Feature	Detail
Brand	JOYOUNG
Model Number	M6L20
Color	Black
Blade Material	Stainless Steel
Number of Molds/Discs	7
