

CMARS CMARS

CMARS Active Stylus Pen Instruction Manual

Brand: CMARS | Model: CMARS Active Stylus Pen

PRODUCT OVERVIEW

The CMARS Active Stylus Pen is a versatile and rechargeable stylus designed for a wide range of touch screen devices, including iPads, iPhones, Android tablets, and smartphones. It features a dual-ended design with a precise copper fine point tip and a magnetic mesh tip, offering flexibility for various tasks from detailed drawing to general navigation. This stylus is engineered for high accuracy and smooth, continuous writing without lag.

Image: The CMARS Active Stylus Pen, showcasing its sleek white design and dual tips. The pen is positioned vertically against a vibrant blue and pink watercolor splash background.

PACKAGE CONTENTS

Please ensure all items are present in the package:

- CMARS Active Stylus Pen (White-mesh tip)
- Micro USB Charging Cable
- User Manual (This document, also available as a [PDF download](#))

PRODUCT FEATURES

- **Dual-ended Design:** Features a 1.45mm accurate copper fine point tip for precise input and a magnetic mesh tip for broader strokes or general navigation. Both tips are functional. The mesh tip does not require charging.

- **Wide Compatibility:** Compatible with most touch screen devices including iPad Air/2/3/4, iPad Pro, iPad Mini/2/3/4, iPhone XS/MAX/XR/X/11/12/13, Android phones and tablets, and other popular smartphones. *Note: This stylus does not support palm rejection and is not compatible with Chromebook or Microsoft Windows System devices.*
- **Easy Operation:** One-key switch for instant use. No Bluetooth connection or app pairing required.
- **Intelligent Power Saving:** Automatically enters "Sleep Mode" after 5 minutes of inactivity to conserve battery life.
- **Rechargeable Battery:** Built-in battery provides 8-10 hours of continuous use on a full charge.

High Accuracy

Smoothly and continuously writing, no lag, no scratch and no any fingerprint on your screen. Record your daily routine at any time.

Drawing&Writing

Office Notes

Record Inspiration

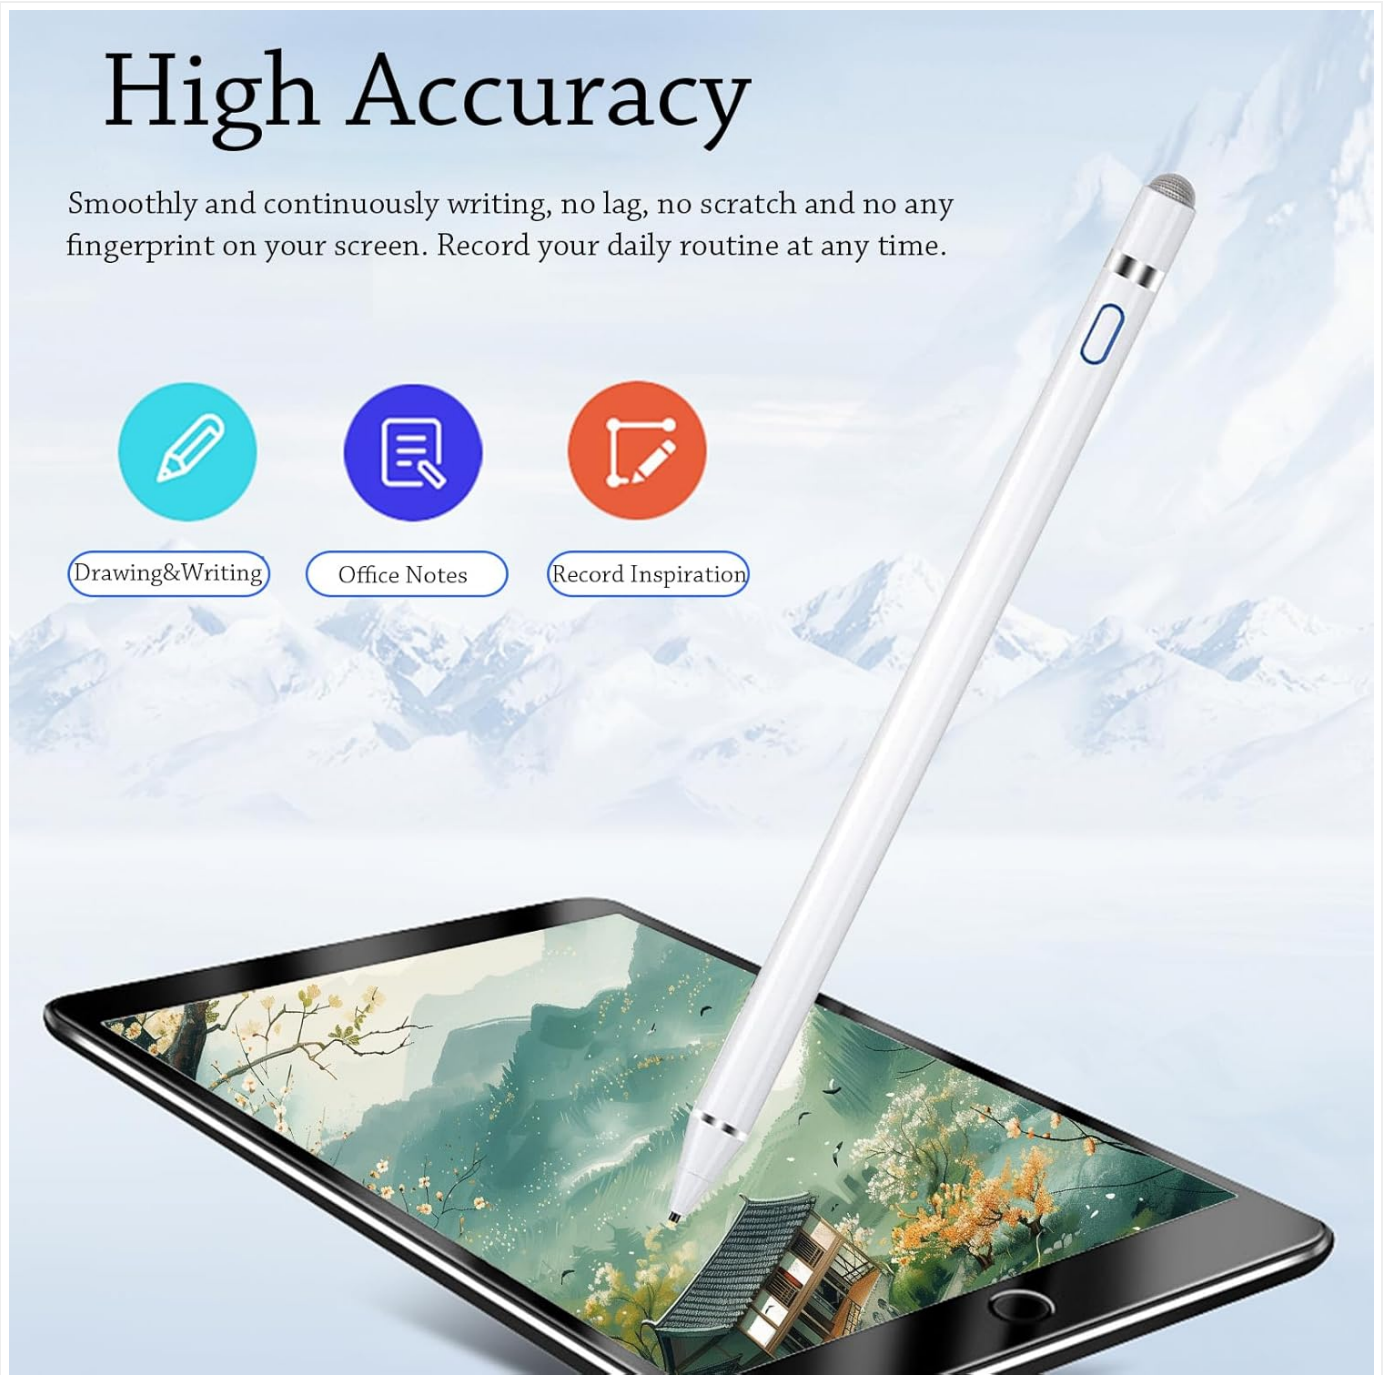

Image: A hand holding the CMARS Active Stylus Pen, using it on a tablet screen to illustrate its high accuracy for drawing, writing, and taking notes. Icons for "Drawing & Writing", "Office Notes", and "Record Inspiration" are shown above the tablet.

SETUP AND FIRST USE

1. Charging the Stylus:

Before first use, fully charge the stylus. Connect the Micro USB charging cable to the stylus's charging port (located under the magnetic cap) and to a USB power source. The indicator light will show the charging status:

- **Red Light:** Charging
- **Green Light:** Fully charged
- **Blue Light:** Working

A full charge typically takes 60-80 minutes and provides 8-10 hours of use.

Image: Close-up of the CMARS Active Stylus Pen illustrating the magnetic cap, the Micro USB charging port, and the different colored indicator lights for charging (red), working (blue), and fully charged (green).

2. Powering On/Off:

Press the button on the stylus once to turn it on. The indicator light will turn blue, indicating it is ready for use. Press the button again to turn it off.

Easy to Use

One key switch, just pressing the button once (Blue light on) and you can draw or write on your touch screen devices.

Button switch

No Bluetooth connection required

Easy to Use

One key switch, just pressing the button once (Blue light on) and you can draw or write on your touch screen devices.

Image: A hand holding the CMARS Active Stylus Pen, pointing to the button switch on its side. Text indicates "One key switch, just pressing the button once (Blue light on) and you can draw or write on your touch screen devices." A "No Bluetooth connection required" icon is also visible.

3. Initial Device Settings (for iPad/iOS users):

If you experience issues with writing or drawing on your iPad/iOS device (e.g., only swiping and tapping work), adjust the following settings:

- Go to **Settings > Apple Pencil > Turn off Only Draw with Apple Pencil.**
- Alternatively, go to **Settings > Notes > Turn off Only Draw with Apple Pencil.**

These settings ensure compatibility with third-party styluses. Other applications may also require similar adjustments.

OPERATING INSTRUCTIONS

Once powered on and configured, the CMARS Active Stylus Pen functions like a natural writing or drawing tool on your compatible touch screen device.

- **Using the Fine Point Tip:** Ideal for precise writing, detailed drawing, and accurate selection. Apply light pressure for

optimal performance.

- **Using the Mesh Tip:** Suitable for general navigation, tapping, swiping, and drawing larger areas. This tip works without power, serving as a convenient backup.
- **Automatic Sleep Mode:** The stylus will automatically enter sleep mode after 5 minutes of inactivity to save battery. Press the button once to wake it up.

Widely Compatible

Image: The CMARS Active Stylus Pen displayed above a collection of compatible devices, including various models of iPads, iPhones, Android smartphones, and a Nintendo Switch, emphasizing its wide compatibility across different operating systems (Android and Apple iOS logos are shown).

MAINTENANCE

- **Cleaning:** Wipe the stylus body and tips with a soft, dry cloth. Do not use abrasive cleaners or immerse the stylus in water.

- **Storage:** Store the stylus in a cool, dry place away from direct sunlight and extreme temperatures.
- **Battery Care:** To prolong battery life, avoid fully discharging the stylus frequently. Charge it when the low battery indicator flashes.

TROUBLESHOOTING

- **Stylus not writing/drawing on iPad/iOS (only swiping/tapping):**

Refer to the "Initial Device Settings" in the Setup section. Ensure "Only Draw with Apple Pencil" is turned off in iPad/iOS Settings > Apple Pencil or Settings > Notes.

Notes

- ✓ If the stylus cannot write and draw on your iPad, but you can swipe and tap the screen, check the following settings:

Go to Settings > Apple Pencil > Turn off Only Draw with Apple Pencil.

Or Settings > Notes > Click on the brush > click on the three dots > to open "painting with your finger".

(Other apps may also be unavailable due to settings, so you can check first.)

- ✓ If any of the above settings cannot be used, please try the following:

It may be that the pen tip is too tight/too loose. You can try twisting the pen tip and screwing it back again. (If it really doesn't work, you can contact us.)

Make sure the stylus has power.

No palm rejection

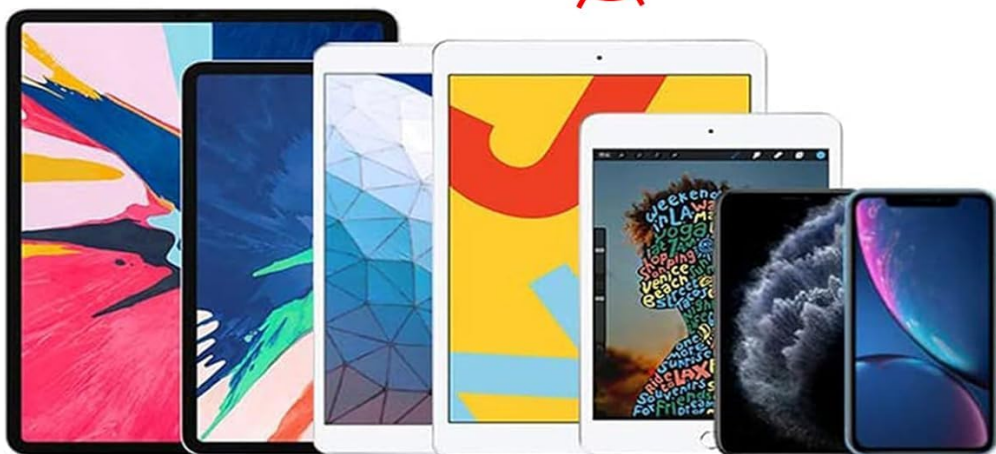

Image: A visual guide titled "Notes" providing troubleshooting steps for when the stylus cannot write or draw on an iPad. It instructs users to check iPad settings to turn off "Only Draw with Apple Pencil" and suggests checking pen tip tightness and power. A "No palm rejection" icon is also present.

- **Stylus unresponsive or inconsistent:**

- **Check Power:** Ensure the stylus is charged. If the battery is low, the pen will not function correctly.
- **Check Pen Tip:** The pen tip might be too tight or too loose. Try gently twisting the pen tip to ensure it is securely seated.

- **Screen Protector Interference:** If you are using a protective glass film on your device, it might affect the stylus's responsiveness due to thickness. We recommend a protective film of 3mm or less.

- **No Palm Rejection:**

This stylus does not support palm rejection. When using the stylus, avoid resting your palm on the screen to prevent unintended input.

- **Not working with Chromebook/Windows:**

This stylus is not compatible with Chromebook or Microsoft Windows System devices.

SPECIFICATIONS

Feature	Detail
Model Number	CMARS
Color	White-mesh tip
Material	Aluminum
Item Weight	0.593 ounces (16.8 Grams)
Package Dimensions	7.72 x 1.77 x 0.79 inches
Battery Type	1 Lithium Polymer battery (included)
Charging Time	Approximately 1 hour (60-80 minutes)
Battery Life (Active Use)	8-10 hours
Compatible Devices	Android, Smartphone, Tablet, iPhone, iPad (Capacitive Touch Screens)

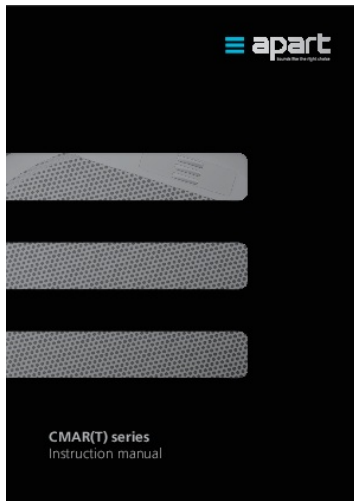

SUPPORT AND CONTACT INFORMATION

For further assistance, technical support, or if you encounter issues not covered in this manual, please contact CMARS customer service.

You can visit the official CMARS store on Amazon for more information and contact options:[CMARS Amazon Store](#).

If troubleshooting steps do not resolve your issue, please reach out to our support team for further guidance.

Product Data Sheet

Description:	
The Ammeter provides an overview of the entire vehicle system, alerting the user whether the system is charging or draining the battery charge. The analog ammeter is available for 50A or 150A and must require a current pickup unit, the digital ammeter is available for 50A and includes a current pickup unit.	
Product Type:	Ammeter
Product Name:	CMAR
Bezel:	SS 316 Stainless Steel
Face Plate:	Black or White Plastic
Mounting Dimension:	80mm
Protection Rating:	IP67 - can work up to 1m under water
Signal:	Wired with 50A current pickup unit
Indicating Range:	0 50A or 0 150A
Mounting:	Strap-on motor mount
Operating Voltage:	12V DC
Rated Power Draw:	120mA
Background Light:	Red or Yellow
Connection:	Push plug sealed connection

photomultiplier tubes		XP1918	
product specification			
UV sensitive, 10-stage, 19 mm (3/4") round tube			
Applications: Time of flight applications with BaF2 scintillators under limited dimensional conditions.			
Description			
Window:	Material:	Used silica	
	Pyrex/ceramide	0.4-0.9	
	Refr. index at 400 nm:	1.47	
Multiplier:	Structure:	Inner focused	
	No. of stages:	10	
Mass:	25 g		
Photocathode characteristics			
Spectral range:			180-620 nm
Maximum sensitivity at:			420 nm
Sensitivity @:	Blue spectrum	100 µA/cm ²	
	Red spectrum, at 400 nm:	min: 8.5	typ: 10.5 µA/cm ²
			max: 90 mA/cm ²
Characteristics with voltage divider A			
Gain slope (vs supp. volt., log-log):			7.5
For an anode bias sensitivity of:			10
@ Supply voltage:	max: 1350	typ: 1150	A/cm ²
Gain:	max: 1350	typ: 1150	
@ Anode dark current @:	max: 25	typ: 10	µA
Pulse amplitude resolution for 10 ⁴ Cx @:			8 %
Mean anode sensitivity resolution @:			1.5 %
@ Supply voltage:			10 V
Gain (vs supp. volt., log-log):			1.5
For an anode bias sensitivity of:			10
@ Supply voltage:			0.3 mA/cm ²
Gain:			0.2
@ Anode dark current @:			0.2 µA/cm ²
Characteristics with voltage divider B			
For a supply voltage of:	1500	1000 V	
Gain:	3000	3.0x10 ³	
Linearity (2% of anode current up to):	80	20	mA
Resolution			
Rise time	2.5	3	ns
Decay time at half height	3.5	20	ns
Fall time	2.5	3	ns
Capacitance	20	4	pF
anode to all:
