Special Functions

The toaster is equipped with four special functions, each with an LED indicator:

- **Cancel:** Press this button to stop the toasting cycle at any time.
- **Bagel:** Activates the bagel function, which toasts the cut side of bagels while gently warming the other side.
- **Defrost:** Use this function to thaw and toast frozen bread. The cycle will be slightly longer to account for thawing.
- **Reheat:** Warms previously toasted bread without further browning. Ideal for bread that has cooled down.

Dual Independent Controls

The toaster features two independent control panels, allowing you to toast different types of bread or different browning levels simultaneously in each pair of slots. This is ideal for households with varying preferences.

Maintenance and Cleaning

Regular cleaning ensures optimal performance and hygiene of your toaster.

Crumb Tray

The removable crumb trays (one for each pair of slots) collect crumbs for easy disposal. Clean them regularly to prevent buildup and potential fire hazards.

1. Unplug the toaster from the power outlet and allow it to cool completely.
2. Pull out the crumb trays from the bottom of the toaster.
3. Discard crumbs and wipe the trays with a damp cloth. For stubborn residue, use a mild detergent.
4. Ensure the trays are completely dry before reinserting them securely into the toaster.

Exterior Cleaning

Wipe the exterior of the toaster with a soft, damp cloth. Do not use abrasive cleaners, metal scouring pads, or harsh

chemicals, as these can damage the stainless steel finish.
