## Fossil BQ2609

# Fossil Evanston Multifunction Gunmetal Stainless Steel Watch (Model BQ2609) User Manual

## INTRODUCTION

This manual provides comprehensive instructions for the operation, setup, and maintenance of your Fossil Evanston Multifunction Gunmetal Stainless Steel Watch, Model BQ2609. Please read this manual carefully to ensure proper use and to maximize the lifespan of your timepiece.

## PRODUCT OVERVIEW

The Fossil Evanston BQ2609 is a 45mm multifunction watch featuring a black sunray dial, three subdials, and a gunmetal stainless steel bracelet. It is designed for everyday wear with a robust construction and practical timekeeping functions.

**Image:** Front view of the Fossil Evanston Multifunction Gunmetal Stainless Steel Watch. The black sunray dial features three subdials: one for the day of the week (left), one for 24-hour time (right), and one for the date (bottom). The watch has a gunmetal finish on both the case and the bracelet.

### Key Components:

- **Crown:** Located on the right side of the watch case, used for setting time and date.
- **Pushers:** Two buttons located above and below the crown, used to adjust the multifunction subdials.
- **Hour, Minute, Second Hands:** Main hands for displaying the current time.
- **Subdials:** Display day of the week, 24-hour time, and date.
- **Stainless Steel Bracelet:** Durable gunmetal-finished bracelet with a foldover clasp.

**Image:** Side view of the Fossil Evanston watch, highlighting the crown and the two pushers. The gunmetal stainless steel case and bracelet are visible.

## SETUP

### Setting the Time:

1. Pull the crown out to position 2 (the outermost position).
2. Rotate the crown clockwise or counter-clockwise to move the hour and minute hands to the desired time. Ensure AM/PM is correctly set if the watch has a 24-hour indicator.
3. Push the crown back into position 0 (normal operating position) to start the watch.

### Setting the Date and Day:

1. Pull the crown out to position 1 (the middle position).
2. To set the **date**, rotate the crown clockwise until the date subdial displays the correct date.
3. To set the **day of the week**, press the upper pusher repeatedly until the day subdial displays the correct day.

4. To set the **24-hour time**, press the lower pusher repeatedly until the 24-hour subdial displays the correct time. This subdial typically synchronizes with the main time setting.
5. Once all settings are correct, push the crown back into position 0.

*Note:* Avoid setting the date between 9 PM and 3 AM, as this may interfere with the automatic date change mechanism.

## OPERATING MULTIFUNCTION FEATURES

The Evanston BQ2609 features a multifunction movement with three subdials that provide additional timekeeping information:

- **Day Subdial (Left):** Indicates the current day of the week (e.g., MON, TUE, WED).
- **24-Hour Subdial (Right):** Displays the current time in a 24-hour format, synchronizing with the main hour hand.
- **Date Subdial (Bottom):** Shows the current day of the month.

These subdials are adjusted during the setup process using the crown and pushers as described in the "Setting the Date and Day" section.

## MAINTENANCE

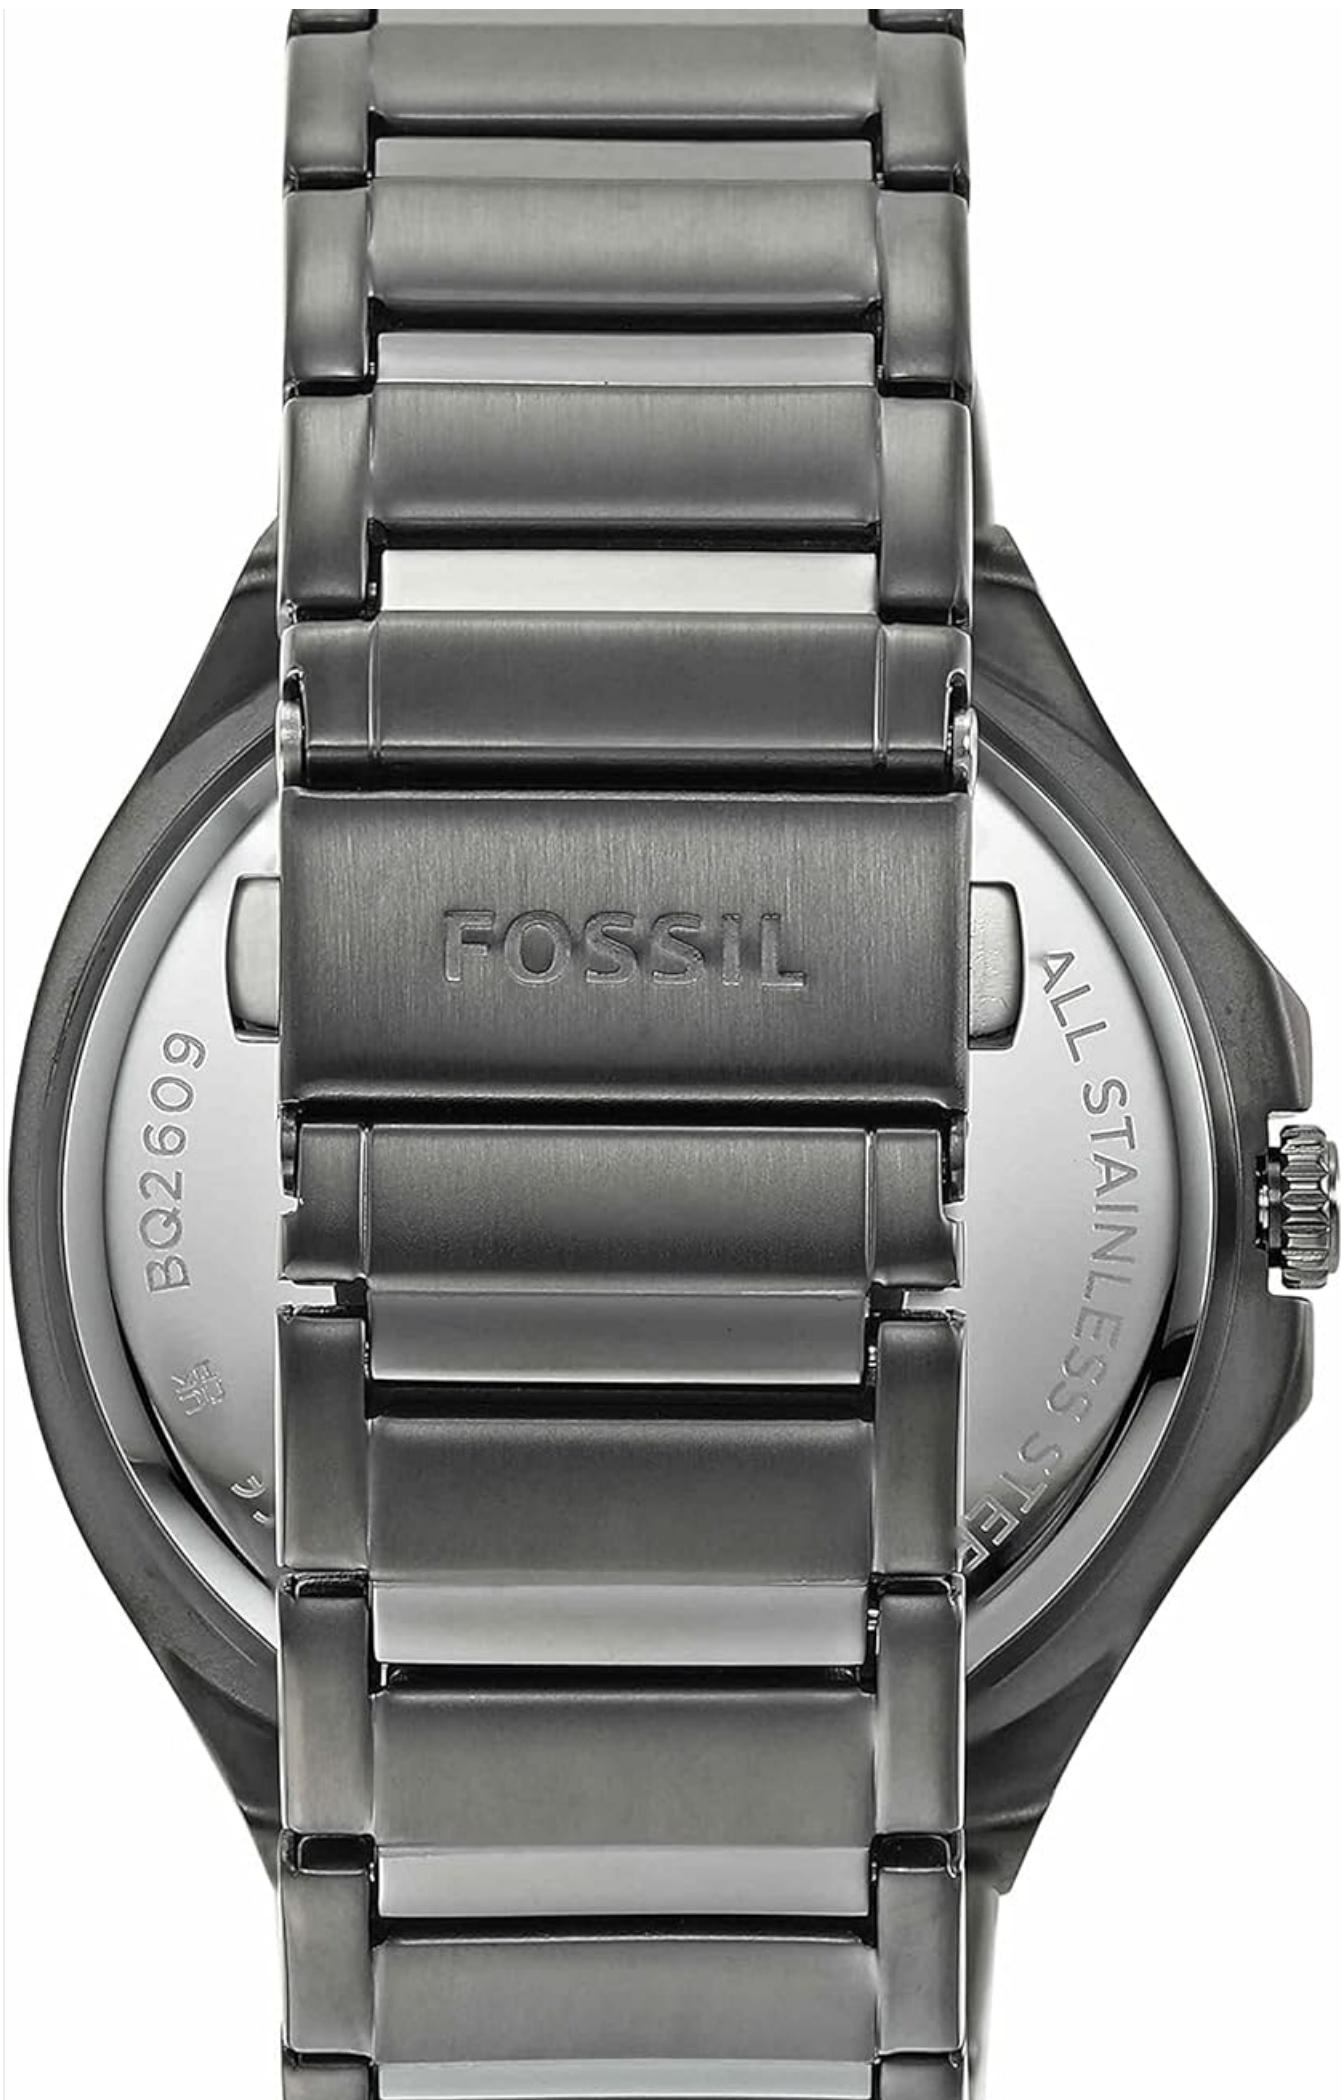

### Cleaning Your Watch:

- Wipe the watch case and bracelet with a soft, damp cloth. For stainless steel, a mild soap solution can be used, followed by rinsing with a damp cloth and drying thoroughly.
- Avoid using harsh chemicals, abrasive cleaners, or solvents, as these can damage the watch finish.
- Ensure the crown is pushed in completely before cleaning to maintain water resistance.

### Water Resistance:

This watch has a water resistance rating of **5 ATM (50 meters)**. This means it is suitable for short periods of recreational swimming, showering, or washing hands. It is **not** suitable for diving, snorkeling, or high-impact water sports. Do not operate the crown or pushers while the watch is wet or submerged.

**Image:** Back view of the Fossil Evanston watch, showing the gunmetal stainless steel bracelet and the foldover clasp. The model number BQ2609 is engraved on the case back.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Watch stops or runs intermittently.	Depleted battery.	Replace the battery. It is recommended to have this done by a professional watchmaker.
Time or date does not set correctly.	Crown not pulled out to the correct position; setting during restricted hours.	Ensure the crown is in position 1 or 2. Avoid setting the date between 9 PM and 3 AM.
Condensation under the crystal.	Exposure to extreme temperature changes or compromised water resistance.	Seek professional service immediately to prevent internal damage.

## SPECIFICATIONS

Feature	Detail
<b>Model Number</b>	BQ2609
<b>Case Size</b>	45mm
<b>Movement</b>	Multifunction Quartz
