## Bellemave Daybed with Pop up Trundle Beds

# Bellemave Extending Daybed with Trundle Instruction Manual

Model: Daybed with Pop up Trundle Beds

## INTRODUCTION

Thank you for purchasing the Bellemave Extending Daybed with Trundle. This manual provides detailed instructions for the safe assembly, operation, and maintenance of your new daybed. Please read all instructions carefully before beginning assembly and retain this manual for future reference.

**Important Safety Information:** Always assemble according to the instructions provided. Do not use without a suitable mattress. Keep away from children to prevent entrapment and suffocation hazards.

## COMPONENTS LIST

Before assembly, ensure all parts are present and undamaged. Refer to the included hardware pack and component list for identification.

- Daybed Frame Components (Headboard, Footboard, Side Rails)
- Trundle Bed Frame Components
- Wooden Slats for both daybed and trundle
- Hardware Pack (Screws, bolts, nuts, Allen wrench, etc.)
- Assembly Instructions Sheet

## SETUP AND ASSEMBLY

Assembly is required for this daybed. It is recommended to have two adults for assembly. Please follow the step-by-step instructions provided in the separate assembly guide included with your product. Ensure all connections are secure before use.

### General Assembly Steps:

1. Unpack all components and lay them out on a clean, soft surface to prevent scratches.
2. Attach the side rails to the headboard and footboard of the main daybed frame.
3. Install the wooden slats onto the main daybed frame.
4. Assemble the trundle bed frame, including its wheels.
5. Install the wooden slats onto the trundle bed frame.

6. Slide the assembled trundle bed under the main daybed frame.
7. Ensure all bolts and screws are tightened securely.

## OPERATING INSTRUCTIONS

### Extending the Daybed (Twin to King Size)

The Bellemave Extending Daybed features a unique design that allows it to expand from a twin size to a king size, providing versatile sleeping arrangements.

1. **Prepare the Trundle:** Ensure the trundle bed is fully pulled out from under the main daybed frame. The smooth casters facilitate easy movement.

2. **Lift the Trundle:** Gently lift the trundle bed frame. It is designed to pop up and align with the height of the main daybed.
3. **Secure in Place:** Once lifted, the trundle will lock into position, creating a larger sleeping surface equivalent to a king-size bed.
4. **Add Mattress:** Place an appropriate mattress on the extended section to complete the king-size setup.

## Retracting the Daybed

1. **Remove Mattress:** Remove any additional mattress placed on the extended trundle section.
2. **Release Lock:** Locate the locking mechanism on the trundle frame and release it to allow the trundle to lower.
3. **Lower Trundle:** Gently push down the trundle bed frame until it is in its lower position.
4. **Slide Under:** Push the trundle bed back under the main daybed frame until it is fully stored.

## MAINTENANCE

Proper care and maintenance will ensure the longevity and appearance of your Bellemave Daybed.

- **Cleaning:** For the wooden frame, wipe with a clean, damp cloth. Avoid harsh chemicals or abrasive cleaners. The product care instructions specify "Dry Clean Only" for any fabric components, though the primary material is wood.
- **Tighten Hardware:** Periodically check and tighten all bolts and screws to ensure the frame remains stable and secure.
- **Mattress Care:** Follow the care instructions for your mattress. Ensure the mattress size is appropriate for the daybed (Twin for the main bed, and a suitable size for the trundle).
- **Avoid Overloading:** Do not exceed the recommended weight capacity for the daybed or trundle.

## TROUBLESHOOTING

If you encounter any issues with your daybed, please refer to the following common solutions:

Problem	Possible Cause	Solution
Daybed feels wobbly or unstable.	Loose hardware.	Check and tighten all bolts and screws on the frame.
Trundle bed does not slide smoothly.	Obstruction under the bed; wheels are dirty or damaged.	Clear any obstructions. Clean wheels or inspect for damage. Ensure wheels are properly installed.
Trundle bed does not pop up or lock into place.	Mechanism obstructed or misaligned.	Ensure no bedding or objects are interfering with the pop-up mechanism. Check for proper alignment of the trundle frame.
Squeaking noises.	Loose connections or friction between parts.	Tighten all hardware. Apply a small amount of lubricant (e.g., silicone spray) to metal-on-metal contact points if necessary, avoiding wood.

## SPECIFICATIONS
