Voion SK20

Voion Smart Galaxy Star Projector SK20 User Manual

Model: SK20 | Brand: Voion

1. INTRODUCTION

The Voion Smart Galaxy Star Projector (Model SK20) is designed to transform any space into a mesmerizing starry sky with nebula effects. This device offers versatile control options, including a dedicated mobile application and voice commands, to create various atmospheric settings. It is suitable for diverse environments such as gaming rooms, bedrooms, home theaters, and camping tents.

Figure 1: Voion Smart Galaxy Star Projector, showcasing its compact design and projected nebula and stars.

2. WHAT'S IN THE BOX

Ensure all items are present upon unboxing:

- Smart Galaxy Star Projector (Model SK20)
- DC Charging Cable
- User Manual

3. SETUP INSTRUCTIONS

3.1 Power Connection

1. Connect the provided DC Charging Cable to the projector's power input port.
2. Plug the other end of the cable into a compatible USB power adapter (not included) or a USB port.
3. The projector will power on automatically, indicated by a blue light on the control button.

3.2 App Installation and Wi-Fi Pairing

To unlock full smart control features, download and install the Smart Life app:

- Scan the QR code provided in the manual or on the product packaging to download the Smart Life app from your device's app store.

- Register or log in to your Smart Life account.
- Ensure your mobile device is connected to a 2.4GHz Wi-Fi network. The projector is compatible with 2.4GHz Wi-Fi only.
- In the app, tap '+' to add a new device. Select 'Lighting' then 'Light Source (Wi-Fi)'.
- Follow the in-app instructions to put the projector into pairing mode (usually by pressing and holding the power button until the indicator light blinks rapidly).
- Confirm your Wi-Fi network and password in the app to complete the pairing process.

Figure 2: Smart Life app interface for controlling the projector's features.

3.3 Voice Assistant Integration

The projector is compatible with Amazon Alexa and Google Home for voice control:

- Once the projector is successfully paired with the Smart Life app, open your Alexa or Google Home app.
- Enable the 'Smart Life' skill/service and link your Smart Life account.
- Discover devices. The projector should now appear in your voice assistant's device list.

Voice Control

Easy To Use

Adjust and control the star projector without remote control.

Alexa, Please turn on star projector

Alexa: OK

Figure 3: Voice control functionality with Amazon Alexa and Google Assistant.

3.4 Physical Placement and Angles

The projector features an adjustable base for optimal projection:

- Adjust the projector's base to achieve desired projection angles (0°, 30°, 45°, or 60°).
- Place the projector on a flat, stable surface to ensure clear and stable projection.

Figure 4: Adjustable base for various projection angles.

3.5 Laser Safety

WARNING: Avoid direct eye exposure to the laser beam. Do not look directly into the laser aperture.

4. OPERATING INSTRUCTIONS

4.1 Manual Controls

The projector has a single multi-function button:

- **Short Press:** Cycles through different light modes (e.g., nebula only, stars only, nebula + stars, various color combinations).
- **Long Press:** Powers the projector on or off.

4.2 App Controls (Smart Life)

The Smart Life app provides comprehensive control over the projector:

- **Color Selection:** Use the color wheel to choose from 16.7 million colors for the nebula effect.
- **Brightness Adjustment:** Adjust the brightness levels for both the nebula and star effects independently.
- **Scene Modes:** Select from pre-set scene modes such as Sleep, Romantic, Party, and Relax.
- **Custom Scenes:** Create and save your own custom lighting effects.
- **Timer Function:** Set schedules for the projector to automatically turn on/off at specific times.
- **Nebula Movement:** Adjust the speed and intensity of the moving nebula.
- **Star Twinkling:** Control the twinkling effect of the stars.

Figure 5: Setting a 24-hour timer for automatic operation via the Smart Life app.

4.3 Voice Commands

Use simple voice commands with your linked voice assistant:

- "Alexa, turn on the Smart Star Projector."
- "Hey Google, set the projector to blue."
- "Alexa, dim the projector to 50%."
- "Hey Google, change the projector scene to Romantic."

Video 3: This video highlights the smart features of the projector, including app control and different projection modes.

6. MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the exterior of the projector. Do not use liquid cleaners or abrasive materials.
- **Storage:** When not in use, store the projector in a cool, dry place away from direct sunlight and extreme temperatures.
- **Lens Care:** Avoid touching the projection lenses directly to prevent smudges or scratches.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Projector does not turn on.	No power supply or faulty cable.	Check power connection and cable. Ensure power adapter is functional.
Cannot connect to Wi-Fi.	Incorrect Wi-Fi band (not 2.4GHz) or wrong password.	Ensure connection to a 2.4GHz Wi-Fi network. Verify password. Try resetting the projector and re-pairing.
Lights are dim or distorted.	Dirty lens or improper placement.	Clean the projection lenses with a soft cloth. Adjust projector angle and distance from projection surface.
Voice control not working.	Smart Life skill not linked or device not discovered.	Ensure Smart Life skill is enabled and linked in Alexa/Google Home app. Re-discover devices.

8. PRODUCT SPECIFICATIONS

Product Specification

Material: Flame Retarding V0 Class ABS

Figure 6: Detailed product dimensions and component overview.

Feature	Detail
Model Number	SK20
Color	Multicolor
Material	Acrylonitrile Butadiene Styrene (ABS)
Light Source Type	LED
Power Source	Corded Electric
Product Dimensions	6.38"L x 2.7"W x 6.36"H
Item Weight	1.59 pounds (0.72 Kilograms)
Connectivity	Wi-Fi (2.4GHz), App Control, Voice Control (Alexa, Google Home)
Bulb Features	Adjustable Brightness

Feature	Detail
Batteries Included?	Yes (for internal clock/memory, not primary power)
