## SETUP

### 1. Insert SIM Card

Locate the SIM card tray on the side of your BLU J6. Use the provided SIM ejector tool (if included, otherwise a small paperclip) to open the tray. Insert your Nano-SIM card(s) into the designated slots. Ensure the SIM card is correctly oriented. This device is compatible with GSM carriers such as AT&T, T-Mobile, and Metro PCS. **Note:** SIM card is not included. Not compatible with NEW AT&T or Cricket activations or with CDMA Networks like Verizon, Sprint, and Boost Mobile.

### 2. Charge the Battery

Connect the USB cable to the charger adapter and then to your BLU J6's charging port. Plug the charger into a power outlet. Allow the phone to charge fully before initial use. The device includes a 4000mAh battery.

### 3. Power On and Initial Configuration

Press and hold the Power button until the BLU logo appears. Follow the on-screen prompts to select your language, connect to a Wi-Fi network, and set up your Google account. This will guide you through the initial setup process for

the Android 10 operating system.

## MAINTENANCE

- **Cleaning:** Use a soft, lint-free cloth to clean the screen and body of the phone. Avoid using harsh chemicals or abrasive materials.

- **Software Updates:** Regularly check for and install system updates to ensure optimal performance and security. Go to *Settings > System > System update*
- **Battery Care:** To prolong battery life, avoid extreme temperatures. Do not leave the phone charging for extended periods after it reaches 100%.
- **Storage Management:** Periodically clear unnecessary files and apps to maintain 32GB internal storage efficiency.

## TROUBLESHOOTING

If you encounter issues with your BLU J6, refer to the following common solutions:

- **Phone Not Powering On:**  
Ensure the battery is sufficiently charged. Connect the phone to its charger and allow it to charge for at least 30 minutes before attempting to power it on again. If the issue persists, perform a forced restart by holding the Power button for 10-15 seconds.
- **Poor Network Connectivity:**  
Check if your SIM card is properly inserted. Verify that you are within your carrier's network coverage area. Try restarting the phone or toggling Airplane Mode on and off.
- **Apps Crashing or Freezing:**  
Close and reopen the problematic app. Clear the app's cache and data via *Settings > Apps & notifications > [App Name] > Storage & cache*. If the issue continues, uninstall and reinstall the app.
- **Slow Performance:**  
Close unused background applications. Clear cache and temporary files. Consider uninstalling apps you no longer use to free up storage space. A factory reset can resolve persistent performance issues, but remember to back up your data first.
