This manual provides essential information for the safe and effective use, setup, and maintenance of your DERYAN Baby Travel Cot.

## 2. SAFETY INFORMATION

Always prioritize your child's safety. Please read and understand all safety instructions before using the travel cot.

- Age and Weight Limit:** Suitable for children between 0 and 1 year old. Ensure your child's weight and size are within safe limits for the cot.
- Stable Surface:** Always place the travel cot on a flat, stable, and level surface. Do not use on elevated surfaces.
- Supervision:** Never leave your child unattended in the travel cot.
- Breathability:** The cot features breathable mesh material to ensure proper airflow. Do not obstruct the mesh sides.
- Mosquito Net:** The integrated mosquito net has a mesh size of less than 1mm, providing protection against insects. Ensure it is properly secured when in use.

- Frame Security:** The sturdy aluminum frame includes a two-sided locking system. Always ensure the frame is fully locked and stable before placing your child inside.
- Hazard Prevention:** Keep small objects, cords, and choking hazards away from the cot and your child.
