

Livoo DOM456

Livoo DOM456 Water and Ice Dispenser Instruction Manual

Model: DOM456

1. IMPORTANT SAFETY INFORMATION

Please read this instruction manual thoroughly before operating your Livoo DOM456 Water and Ice Dispenser. Keep this manual for future reference. Failure to follow these instructions may result in electric shock, fire, or serious injury.

- Ensure the appliance is connected to a grounded power outlet with the correct voltage.
- Do not immerse the appliance, power cord, or plug in water or other liquids.
- Keep the appliance away from heat sources and direct sunlight.
- Do not operate the appliance with a damaged cord or plug. Contact qualified service personnel for repairs.
- Supervise children to ensure they do not play with the appliance.
- Only use potable water in the water reservoir.
- Unplug the appliance before cleaning or when not in use for extended periods.

2. PRODUCT OVERVIEW

The Livoo DOM456 is a versatile appliance designed to provide both chilled water and ice cubes. Familiarize yourself with its components before use.

Figure 2.1: Front view of the Livoo DOM456 Water and Ice Dispenser, illustrating its dual dispensing capabilities.

2.1 Main Components

- **Control Panel:** Features buttons for water dispensing, ice size selection (small/large), and power on/off.
- **Water Dispenser Nozzle:** For dispensing chilled water.
- **Ice Dispenser Nozzle:** For dispensing ice cubes.
- **Drip Tray:** Collects any spills from dispensing.
- **Water Reservoir:** Internal tank for holding water to be chilled and converted to ice. (Capacity: 2.1 Liters)
- **Ice Storage Compartment:** Area where produced ice is stored.

Figure 2.2: Detailed view of the control panel, showing the function buttons.

3. SETUP

3.1 Unpacking

1. Carefully remove the appliance from its packaging.
2. Remove all packing materials, tapes, and labels.
3. Check for any damage during transit. If damaged, do not operate and contact your retailer.

3.2 Placement

- Place the dispenser on a stable, level surface.
- Ensure there is adequate ventilation around the appliance (at least 10 cm clearance on all sides).
- Avoid placing it near heat sources or in direct sunlight.

3.3 Initial Cleaning

Before first use, clean the internal components.

1. Remove the water reservoir and ice scoop.
2. Wash the water reservoir, ice scoop, and drip tray with warm, soapy water. Rinse thoroughly and dry.
3. Wipe the interior of the ice storage compartment with a damp cloth.
4. Wipe the exterior of the appliance with a soft, damp cloth.

Figure 3.1: Included accessories: water reservoir, ice scoop, and water hose.

3.4 Filling the Water Reservoir

- Open the top lid of the appliance.
- Carefully fill the water reservoir with potable water up to the MAX fill line. Do not overfill.
- Close the top lid securely.

3.5 Power Connection

Plug the power cord into a grounded electrical outlet. The appliance is now ready for operation.

4. OPERATING INSTRUCTIONS

4.1 Powering On/Off

- Press the **ON/OFF** button on the control panel to turn the appliance on or off.
- The indicator light will illuminate when the unit is on.

4.2 Making Ice

1. Ensure the water reservoir is filled.
2. Press the **SMALL** or **LARGE** button to select your desired ice cube size. The corresponding indicator will light up.
3. The ice making cycle will begin automatically. The first batch of ice may take longer to produce.
4. For the first 3-4 cycles, it is recommended to discard the ice produced to ensure optimal hygiene and performance.
5. The appliance will automatically stop making ice when the ice storage compartment is full or when the water level is low.

4.3 Dispensing Water

- Place a glass or cup under the water dispenser nozzle.
- Press the **WATER** button on the control panel.
- Release the button when the desired amount of water has been dispensed.

4.4 Dispensing Ice

- Place a glass or cup under the ice dispenser nozzle.
- Press the **ICE** button (if available, or use the designated lever/button near the nozzle if not on main panel). *(Note: Based on image 2.2, there is no explicit 'ICE' button on the main panel. The user would likely press the lever under the ice nozzle.)*
- Release the button/lever when the desired amount of ice has been dispensed.

5. MAINTENANCE AND CLEANING

Regular cleaning ensures optimal performance and extends the lifespan of your appliance.

Figure 5.1: Top view showing the ice storage compartment, which should be regularly cleaned.

5.1 Daily Cleaning

- Empty and clean the drip tray daily with warm, soapy water.
- Wipe the exterior of the appliance with a soft, damp cloth.

5.2 Weekly Cleaning

- Unplug the appliance.
- Remove and thoroughly clean the water reservoir and ice scoop with warm, soapy water. Rinse well.
- Wipe the interior of the ice storage compartment and around the dispenser nozzles with a damp cloth.
- Ensure all parts are completely dry before reassembling and plugging in the appliance.

5.3 Descaling (Monthly or as needed)

Mineral deposits from water can build up over time. Descale the appliance to maintain efficiency.

1. Unplug the appliance and drain any remaining water.
2. Prepare a descaling solution (e.g., a mixture of water and white vinegar, or a commercial descaling agent

suitable for ice makers). Follow the descaling product's instructions.

3. Pour the solution into the water reservoir.
4. Run several ice-making cycles with the descaling solution. Discard all ice produced during this process.
5. Drain the solution and rinse the reservoir thoroughly with clean water.
6. Run several cycles with clean water to flush out any residual descaling solution. Discard this water and ice.

6. TROUBLESHOOTING

If you encounter issues, refer to the following table before contacting customer support.

Problem	Possible Cause	Solution
Appliance does not turn on	No power supply	Check if the power cord is securely plugged in and the outlet is functional.
No ice production	Low water level	Refill the water reservoir.
	Ice storage full	Empty the ice storage compartment.
	Air temperature too high	Ensure the appliance is in a cool, well-ventilated area.
Ice cubes are small or soft	Water temperature too high	Use colder water in the reservoir.
	Mineral buildup	Perform a descaling cycle.
Water not dispensing	Low water level	Refill the water reservoir.
Unusual noise	Appliance not level	Adjust the appliance to a stable, level surface.

7. SPECIFICATIONS

- **Model:** DOM456
- **Brand:** Livoo
- **Water Reservoir Capacity:** 2.1 Liters (2100 Millilitres)
- **Power:** 240 Watts
- **Material:** Stainless Steel (Inox)
- **Dimensions:** Refer to product packaging for exact measurements.

8. WARRANTY AND SUPPORT

For warranty information, please refer to the documentation provided at the time of purchase. If you require technical assistance or have questions not covered in this manual, please contact Livoo customer support through their official website or the contact details provided with your product.
