Safety Information

No specific safety warnings are applicable for this product beyond general handling precautions for small plastic pieces. This product is recommended for ages 12 years and up.

SETUP AND ASSEMBLY

Assembling your 3D Crystal Puzzle requires patience and attention to detail. The puzzle consists of uniquely shaped, interlocking translucent pieces that fit together to form the final three-dimensional structure. There are no traditional flat puzzle pieces; instead, each piece contributes to the depth and form of the model.

Begin by carefully separating all pieces. It is often helpful to sort pieces by shape or size if applicable. Identify the core pieces that form the base or central structure of the puzzle. Gradually connect the pieces, ensuring each interlocks securely with its neighbors. Some pieces may require a gentle push to snap into place.

If you encounter difficulty, step-by-step solutions are available online to assist with the assembly process. Referencing these solutions can provide guidance on piece placement and construction order.
