

Mitsubishi Electric MSZ-HR35VF

Mitsubishi Electric MSZ-HR35VF Inverter Air Conditioner User Manual

Model: MSZ-HR35VF

1. IMPORTANT SAFETY INFORMATION

Read all safety precautions carefully before operating the unit. This manual provides essential information for safe installation, operation, and maintenance. Keep this manual for future reference.

- **Installation:** Installation must be performed by a qualified service person in accordance with national wiring regulations.
- **Power Supply:** Ensure the power supply matches the unit's specifications. Do not use extension cords.
- **Refrigerant:** This unit uses R-32 refrigerant. Do not discharge refrigerant into the atmosphere.
- **Children:** Keep children away from the unit and remote control.
- **Maintenance:** Disconnect power before performing any maintenance or cleaning.

2. SETUP GUIDE

2.1. Unpacking and Inspection

Carefully unpack all components and inspect for any shipping damage. Report any damage to your dealer immediately.

- Indoor Unit (MSZ-HR35VF)
- Outdoor Unit (MUZ-HR35VF - typical pairing)
- Remote Controller
- User Manual (this document)

2.2. Installation Considerations

The installation of both indoor and outdoor units, including refrigerant piping and electrical wiring, requires specialized knowledge and tools. It is strongly recommended that installation be carried out by a certified HVAC professional.

Figure 2.1: Schematic diagram showing the typical installation of the indoor unit, including wall mounting and pipe connections.

Indoor Unit Placement: Choose a location that allows for even air distribution, away from direct sunlight or heat sources. Ensure sufficient space for maintenance.

Outdoor Unit Placement: Select a well-ventilated area, free from obstructions, and with adequate clearance for airflow and service access. Minimize direct exposure to strong winds or heavy rain.

2.3. Electrical Connection

All electrical work must comply with local and national electrical codes. Ensure the power supply circuit is dedicated to the air conditioner and protected by an appropriate circuit breaker.

Figure 2.2: The outdoor unit of the Mitsubishi Electric MSZ-HR35VF air conditioner, showing its compact design. This unit is responsible for heat exchange with the outside environment.

3. OPERATING INSTRUCTIONS

3.1. Remote Controller Overview

The unit is operated via the supplied wireless remote controller. Ensure batteries are correctly inserted.

Figure 3.1: The standard remote controller for Mitsubishi Electric air conditioners. It features buttons for mode selection, temperature adjustment, fan speed, and timer settings.

- **ON/OFF Button:** Powers the unit on or off.
- **MODE Button:** Cycles through operating modes (AUTO, COOL, DRY, HEAT, FAN).
- **TEMP ▲/▼ Buttons:** Adjusts the desired temperature.
- **FAN Button:** Selects fan speed (AUTO, LOW, MED, HIGH).
- **TIMER Button:** Sets ON/OFF timers.

3.2. Operating Modes

Mode	Description
AUTO	Automatically selects cooling or heating based on room temperature.
COOL	Cools the room to the set temperature.
DRY	Dehumidifies the room while slightly cooling.
HEAT	Heats the room to the set temperature.
FAN	Circulates air without heating or cooling.

3.3. Wi-Fi Control (Optional)

If your unit is equipped with the optional Wi-Fi interface, you can control it remotely using the Mitsubishi Electric MELCloud app. Refer to the separate MELCloud setup guide for detailed instructions on connecting your unit to your home network and smartphone.

4. MAINTENANCE

Regular maintenance ensures optimal performance and extends the lifespan of your air conditioner. Always disconnect power before cleaning.

4.1. Air Filter Cleaning

Clean the air filters every two weeks or more frequently depending on usage and air quality. Clogged filters reduce efficiency and airflow.

1. Open the front panel of the indoor unit.
2. Gently remove the air filters.
3. Wash filters with water or vacuum them to remove dust.
4. Allow filters to dry completely in a shaded area before reinserting.
5. Close the front panel securely.

Figure 4.1: Step-by-step illustration of removing and cleaning the air filters from the indoor unit. Regular cleaning is vital for air quality and unit efficiency.

4.2. Outdoor Unit Care

Periodically check the outdoor unit for obstructions (leaves, debris) around the condenser coils. Gently clear any blockages. Do not attempt to clean the internal components yourself; this should be done by a professional.

5. TROUBLESHOOTING

Before contacting service, review the following common issues and their solutions.

Problem	Possible Cause	Solution
Unit does not turn on.	No power, circuit breaker tripped, remote control batteries dead.	Check power supply, reset circuit breaker, replace remote batteries.
Insufficient cooling/heating.	Dirty air filters, blocked outdoor unit, wrong mode selected, room too large.	Clean filters, clear outdoor unit, select correct mode, ensure unit size matches room.
Unusual noise.	Loose parts, foreign object, normal operating sounds (e.g., refrigerant flow).	If persistent or loud, contact service. Distinguish from normal sounds.
Water leakage from indoor unit.	Clogged drain pipe, improper installation.	Contact a qualified technician for inspection and repair.

If the problem persists after attempting these solutions, or if an error code appears on the display, contact your authorized Mitsubishi Electric service center.

6. SPECIFICATIONS

Key technical specifications for the Mitsubishi Electric MSZ-HR35VF Inverter Air Conditioner.

- **Model:** MSZ-HR35VF (Indoor Unit) / MUZ-HR35VF (Outdoor Unit)
- **Cooling Capacity:** 12,000 Btu/h (Nominal)
- **Refrigerant:** R-32

- **Energy Class (Cooling/Heating):** A++/A+ (as per European standards)
- **Power Supply:** 220-240V, 50Hz, Single Phase
- **Wi-Fi:** Optional (requires MAC-5671F-E interface)
- **Dimensions (Indoor Unit):** Consult product data sheet for exact measurements.
- **Dimensions (Outdoor Unit):** Consult product data sheet for exact measurements.

Note: Full technical specifications, including EER, COP, sound levels, and detailed dimensions, are available in the official product data sheet provided by Mitsubishi Electric.

7. WARRANTY AND SUPPORT

For warranty information, please refer to the warranty card included with your product or contact your authorized Mitsubishi Electric dealer. Warranty terms and conditions may vary by region.

For technical support, spare parts, or professional service, please contact the dealer from whom you purchased the unit or visit the official Mitsubishi Electric website for your region to find authorized service centers.

Fiche de produit	
Règlement d'exécution (UE) n° 626/2011	
Nom du fabricant ou marque commerciale	Mitsubishi Electric
Référence du modèle	MSZ-HR35VF / MUZ-HR35VF
Référence du modèle intérieur	MSZ-HR35VF
Référence du modèle extérieur	MSZ-HR35VF
Niveau de puissance acoustique (intérieurs (mode refroidissement))	66 dB
Niveau de puissance acoustique (extérieurs (mode refroidissement))	- dB
Niveau de puissance acoustique (intérieurs (mode chauffage))	64 dB
Niveau de puissance acoustique (extérieurs (mode chauffage))	- dB
Consommation de l'énergie frigorifique	830
Mode de l'énergie frigorifique	300
Des tables de réfrigération sont incluses dans le règlement technique. Ainsi, de fait, l'impact sur le réchauffement de la planète sera d'autant plus limité que le processus de réchauffement planétaire (PPV) de réfrigération est faible. Ce graphique illustre un réfrigérant dans le PPV corrigé 2011, et d'autres termes, c'est le PPV de réfrigération est faible dans l'ensemble, son impact sur le réchauffement de la planète sera 350 fois inférieur à celui d'un kg de CO2, sur une période de 100 ans, les unités jouent d'équilibre dans le cycle réfrigérant, ce qui détermine le plus ou moins influent et admettent sous contrôle technique et un professionnel.	
Mode de réfrigération	
Coefficient de performance saisonnier (SEER)	6,2
Classe d'efficacité énergétique	A++
Consommation annuelle d'électricité	Consommation d'énergie de 365 kWh par an, déterminée sur la base des résultats obtenus dans des conditions d'essai normalisées. La consommation d'énergie réelle dépend des conditions d'utilisation et de l'ajustement de l'appareil.
Charge nominale	3,5 kW
Mode chauffage	
Coefficient de performance saisonnier (SCOP) (saison moyenne)	4,5
Classe d'efficacité énergétique (saison moyenne)	A+
Consommation annuelle d'électricité (saison moyenne)	Consommation d'énergie de 765 kWh par an, déterminée sur la base des résultats obtenus dans des conditions d'essai normalisées. La consommation d'énergie réelle dépend des conditions d'utilisation et de l'ajustement de l'appareil.
Coefficient de performance saisonnier (SCOP) (saison plus chaude)	5,2
Coefficient de performance saisonnier (SCOP) (saison plus froide)	-
Classe d'efficacité énergétique (saison plus chaude)	A+++
Classe d'efficacité énergétique (saison plus froide)	-
