Fookoo 1080P 9" Wireless Backup Camera System

Model: DW902

Brand: Fookoo

INTRODUCTION

The Fookoo 1080P 9" Wireless Backup Camera System is engineered to provide a clear and reliable view of your surroundings, significantly improving safety during driving and reversing. Featuring a large 9-inch HD monitor with dual/quad split-screen capabilities, this system supports up to four cameras simultaneously. Its advanced wireless digital signal technology ensures stable and interference-free transmission, even at high speeds. The cameras are IP69 waterproof and equipped with infrared lights for superior night vision, making it suitable for all weather conditions and various large vehicles.

Fookoo 9-inch Wireless Backup Camera System, including the monitor and two cameras.

SETUP AND INSTALLATION

This system is designed for easy installation, typically completed within 15 minutes. While the cameras and monitor communicate wirelessly, they still require a wired power connection.

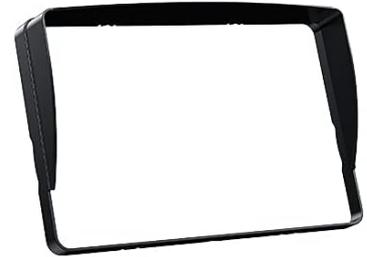

Package Contents

Camera X2

Monitor

Sunshade

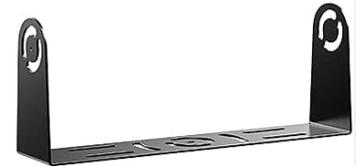

Power Cord X3

Car Charger

Antenna X3

U-shaped Bracket

SD Card Cover

Installation Kit

Upgrade Bracket

Fan-shaped Bracket

All components included in the Fookoo 9-inch Wireless Backup Camera System kit.

- 9-inch HD Monitor
- Wireless Cameras (x2)
- Power Cords (x3)
- Car Charger
- Antennas (x3)
- U-shaped Bracket
- Upgrade Bracket
- SD Card Cover
- Installation Kit (screws, tools)
- Sunshade for Monitor
- 32GB SD Card (pre-installed or included)

Power Connection

The system operates on 12-24V DC power, making it compatible with a wide range of vehicles. You have two primary options for powering the monitor and cameras:

- **Hardwire Connection:** Connect directly to your vehicle's power source.

- **Car Charger:** Use the included car charger for a simpler plug-and-play setup. The car charger also features a USB port for charging other devices.

Easy to Install Even By One Person

Without Wires Between Monitor and Cameras, Easy to Set Up or Uninstall When Not Needed. Installation Can Be Completed in Only 15 Minutes.

Power connection options: direct hardwire or via the car charger.

Camera Mounting

The cameras come with versatile mounting options to suit different vehicle types and preferences. Two types of bracket adapters are provided:

- **U-type Bracket:** A common bracket for surface mounting.
- **Sheet-type Bracket:** Designed for specific pre-wired mounts, such as Furrion pre-wired vehicles, allowing for easy installation without uninstalling existing mounts.

Ensure the camera is mounted securely to prevent movement during vehicle operation. The camera lens is adjustable to achieve the optimal viewing angle.

We have two types of bracket adapter with power pigtail outlet wire which suit for Furrion pre-wired mount, then you can easily install our camera to you vehicle, no need to uninstall the pre-wired mount.

***The adapter isn't included in the package, if you need, please reach us.**

Option 1: U-type Bracket

Option 2: Sheet-type Bracket

Two types of bracket adapters for camera installation: U-type and Sheet-type.

OPERATING INSTRUCTIONS

Monitor Functions

The 9-inch HD monitor provides a clear 1920x1080 pixel display. It supports various viewing modes to suit your needs:

- **Single Camera View:** Displays the feed from one camera in full screen.
- **Dual Split Screen:** Shows feeds from two cameras simultaneously.
- **Quad Split Screen:** Displays feeds from up to four cameras at once, providing a comprehensive view of your surroundings.

Full/ Split Screen for Choosing

You Can Use Up to Four Cameras on This System. It Will Display Multiple Cameras at the Same Time to Monitor the Surrounding Situation in Real Time.

The monitor displaying various screen modes: full screen, dual split, and quad split views.

9-inch Larger Monitor

Larger Than Other 7-inch Monitor on the Market. Capture and Display More Details. Reduce Blind Spots. Make Your Trip Safer and Happier.

The 9-inch HD monitor displaying a clear view with parking lines, showing a truck on a road.

Advanced Wireless Signal

The system utilizes advanced digital wireless signal technology, offering superior anti-interference capabilities. This ensures a stable, smooth, and clear image display with no delay, even when your vehicle is traveling at speeds up to 95mph. The wireless transmission range can reach up to 128 feet in open areas.

Advanced Digital Wireless Signal

Stronger Penetration, No Interference and Delay, Real-time Transmission

Illustration of the advanced digital wireless signal transmission, showing a truck and the 128FT signal range.

Loop Recording

The monitor supports loop recording, allowing you to continuously record your driving footage. The system includes a 32GB SD card for storage. When the SD card is full, the system automatically overwrites the oldest videos, ensuring continuous recording without manual intervention. Recorded videos can serve as valuable evidence if needed.

Support Loop Recording

Record and Save the Content Displayed on the Screen,
Automatically Overwrite the Previous Videos When the SD Card is Full.

The monitor screen showing loop recording in progress, with a 32GB memory card.

Parking Assistance

Integrated parking lines on the monitor display assist you in safer and faster parking maneuvers. These guidelines help you accurately judge distances and vehicle positioning, eliminating the need for external guidance.

Night Vision

The cameras are equipped with infrared lights, providing excellent night vision capabilities. This ensures clear visibility and enhanced safety even in low-light conditions or complete darkness.

Adjustable Lens

Each camera features an adjustable lens, allowing you to fine-tune the viewing angle to best suit your vehicle and specific needs.

MAINTENANCE

Proper maintenance ensures the longevity and optimal performance of your Fookoo backup camera system.

- **Waterproof Design:** The cameras boast an IP69 waterproof rating, meaning they are highly resistant to water and dust ingress. They are designed to work perfectly in any extreme weather conditions, including heavy rain.
- **Temperature Resistance:** The cameras are built to withstand a wide range of temperatures, from -4°F to 198°F (-20°C to 92°C).
- **Cleaning:** Periodically clean the camera lenses and monitor screen with a soft, damp cloth to ensure clear visibility. Avoid using harsh chemicals or abrasive materials.
- **Cable Inspection:** Regularly check all power cables for any signs of wear, damage, or loose connections.

The camera's IP69 waterproof rating and adjustable lens, designed for durability in various conditions.

TROUBLESHOOTING

If you encounter issues with your Fookoo backup camera system, refer to the following common problems and solutions:

- **No Image on Monitor:**

- Ensure the monitor and cameras are properly connected to a power source and receiving power.
- Check all cable connections for looseness or damage.
- Verify that the camera and monitor are paired correctly. Refer to the pairing instructions in the full manual if needed.

- **Flickering or Unstable Image:**

- Ensure the antennas on both the camera and monitor are securely attached and positioned correctly.
- Check for potential sources of interference (e.g., other wireless devices, strong electrical fields).
- Verify that the distance between the camera and monitor is within the effective wireless range (128FT in open areas).

- **Poor Night Vision:**

- Ensure the camera lens is clean and free from dirt or obstructions.
- Verify that the infrared lights on the camera are functioning.

- **Recording Issues:**

- Check if the 32GB SD card is properly inserted into the monitor.
- Ensure the SD card is not full (though loop recording should manage this automatically).
- Try reformatting the SD card (refer to monitor settings for this option).
