FDTEK Power Strip with USB C (Model Ad-bm8-112390) User Manual

Your guide to safe and efficient use of your FDTEK Power Strip.

1. INTRODUCTION

Thank you for choosing the FDTEK Power Strip with USB C. This device is designed to provide convenient and safe power distribution for your electronic devices. It features 4 AC outlets, 3 USB charging ports (including one USB-C port), a 10-foot flat plug extension cord, and built-in overload protection. This manual provides essential information for setup, operation, maintenance, and troubleshooting to ensure optimal performance and safety.

2. SAFETY INFORMATION

Your safety is paramount. The FDTEK Power Strip is equipped with multiple safety features to protect you and your devices. Please read and adhere to the following guidelines:

- **Overload Protection:** The power strip includes an overload protection system that automatically cuts power if the total connected load exceeds 1250W (125V~10A). This prevents damage to connected devices and reduces fire risk.
- **Over-Current and Over-Voltage Protection:** Integrated circuits protect against excessive current and voltage fluctuations.
- **Short-Circuit Protection:** Designed to prevent damage in case of a short circuit.
- **Fire-Resistance:** Constructed with ABS PC fire-retardant material, capable of withstanding temperatures up to 1382°F (750°C).
- **Grounded Protection:** Ensures a safe electrical path to ground.

- **Reinforced Cable:** Features a durable, 100% pure copper wiring for reliable power delivery.
- Do not exceed the maximum power rating of 1250W (10A, 125V).
- Do not use in wet environments.
- Do not disassemble or modify the device.
- Keep out of reach of children.

Compact Power strip for Travel (No Surger)

3. PRODUCT FEATURES

The FDTEK Power Strip is designed for versatility and convenience:

- **Multiple Charging Options:** Equipped with 4 AC outlets and 3 USB charging ports (2 USB-A, 1 USB-C) to power up to 7 devices simultaneously.
- **Space-Saving Design:** The cube shape and side-oriented outlets allow for large adapters to be plugged in without blocking adjacent outlets, keeping your workspace organized.

- **Smart IC USB Charging:** The USB ports feature built-in smart IC technology that automatically identifies connected devices and delivers optimal charging current (total 5V 2.4A output).
- **Flat Plug and Long Cord:** A 10-foot extension cord with a 45-degree flat plug allows for easy access to wall outlets behind furniture and prevents blocking other wall receptacles.
- **On/Off Switch:** A convenient power switch on top allows you to easily turn off all connected devices, saving electricity when not in use.
- **Compact and Portable:** Its small size makes it suitable for various settings, including home, office, nightstands, and travel (non-surge protection design is approved for cruise ships).

All In One Charging Station

4. SETUP

1. **Unpack:** Carefully remove the power strip from its packaging.
2. **Placement:** Position the power strip on a stable, dry surface, away from heat sources and direct sunlight. Ensure adequate ventilation.
3. **Plug In:** Insert the flat plug of the power strip's 10-foot extension cord into a standard 3-prong grounded AC wall outlet.

4. **Power On:** Press the power button located on the top of the power strip. The indicator light will illuminate, confirming the unit is powered on.

5. OPERATING INSTRUCTIONS

Using your FDTEK Power Strip is straightforward:

- **AC Outlets:** Plug your electronic devices (e.g., laptops, lamps, small appliances) into any of the 4 AC outlets. Ensure the total power consumption does not exceed 1250W.
- **USB Charging Ports:** Connect your USB-powered devices (e.g., smartphones, tablets, power banks) to the 2 USB-A ports or the 1 USB-C port. The smart IC technology will automatically detect your device and provide the optimal charging speed.
- **Power Switch:** Use the power button on the top to turn the power strip on or off. Turning it off disconnects power to all connected outlets and USB ports.

6. MAINTENANCE

To ensure the longevity and safe operation of your power strip, follow these maintenance guidelines:

- **Cleaning:** Disconnect the power strip from the wall outlet before cleaning. Use a dry, soft cloth to wipe the exterior. Do not use liquid cleaners or abrasive materials.
- **Storage:** When not in use for extended periods, store the power strip in a cool, dry place.
- **Inspection:** Periodically inspect the power cord and plug for any signs of damage (fraying, cuts, bent prongs). If damage is found, discontinue use immediately.

7. TROUBLESHOOTING

If you encounter issues with your FDTEK Power Strip, refer to the following common problems and solutions:

- **No Power to Outlets/USB Ports:**
 - Ensure the power strip's main plug is securely inserted into a functioning wall outlet.
 - Verify that the power strip's on/off switch is in the 'on' position.
 - Check if the total power consumption of connected devices exceeds 1250W. If so, the overload protection may have activated. Disconnect some devices and press the reset button (if available, otherwise cycle the power switch).
 - Test the wall outlet with another device to confirm it is supplying power.
- **Device Not Charging via USB:**
 - Ensure the USB cable is properly connected to both the power strip and your device.
 - Try a different USB port or a different USB cable.
 - Confirm your device is compatible with USB charging.
- **Power Strip Feels Warm:**
 - It is normal for the power strip to feel slightly warm during operation, especially when multiple devices are connected.
 - If it feels excessively hot or emits a burning smell, immediately unplug it from the wall outlet and discontinue use. Contact support.

8. SPECIFICATIONS

Detailed technical specifications for the FDTEK Power Strip (Model Ad-bm8-112390):

| Feature | Specification |
|------------------------|---|
| Model Number | Ad-bm8-112390 |
| Product Dimensions | 3.3 x 3.3 x 0.1 inches |
| Item Weight | 14.9 ounces |
| Brand | FDTEK |
| Color | Black |
| Total AC Power Outlets | 4 |
| USB Charging Ports | 3 (2 USB-A, 1 USB-C) |
| USB Output | 5V 2.4A (Total) |
| Voltage | 110-125V |
| Max Power Rating | 1250W (10A) |
| Cord Length | 10 FT |
| Special Feature | On/Off Switch, Flat Plug, Overload Protection |
| Manufacturer | Fudong |

9. WARRANTY AND SUPPORT

FDTEK products are manufactured by Fudong and are designed for reliability. For specific warranty details, please refer to the product packaging or contact the seller directly. General return policies typically allow for returns or replacements within 30 days of purchase.

For further assistance, technical support, or warranty claims, please contact your retailer or the manufacturer, Fudong, through their official channels. You may also refer to the [User Guide \(PDF\)](#) for additional information.
