2. SAFETY INFORMATION

Please read all safety instructions before using the VGR V-030 trimmer to prevent injury or damage to the device.

- Avoid eye contact with blades.
- Keep the device dry and away from water. Do not use in or near bathtubs, showers, or other water-filled basins.
- Use with caution on sensitive skin areas.
- This product is intended for head use only as specified by the manufacturer.
- Keep out of reach of children.
- Do not disassemble or attempt to repair the device yourself. Contact qualified personnel for service.

3. SETUP AND CHARGING

Before first use, ensure the trimmer is fully charged to optimize battery life and performance.

1. **Unpacking:** Carefully remove the trimmer and all accessories from the packaging.
2. **Initial Charge:** Connect the charging cable to the trimmer and plug it into a suitable power outlet. Allow the trimmer to charge completely. The charging indicator (if present) will typically change color or turn off when fully charged.
3. **Power Source:** The VGR V-030 operates on both electric power (when plugged in) and battery power (when unplugged and charged).

4. OPERATING INSTRUCTIONS

Follow these steps for effective use of your VGR V-030 trimmer.

- 1. Preparation:** Ensure the trimmer is clean and charged. For best results, use on clean, dry hair.
- 2. Power On:** Turn on the trimmer using the On/Off switch, typically located on the body of the device.
- 3. Adjust Length Setting:** If using a comb attachment, select and attach the desired length setting. The VGR V-030 has one speed setting.
- 4. Trimming:** Gently glide the trimmer over the desired area, moving against the direction of hair growth for an even cut. Use slow, controlled movements.
- 5. Power Off:** When finished, turn off the trimmer using the On/Off switch.

5. MAINTENANCE AND CARE

Regular maintenance ensures optimal performance and extends the lifespan of your trimmer.

- Cleaning Blades:** After each use, turn off the trimmer and use the provided cleaning brush to remove any hair from the blades. For a more thorough clean, the blades may be rinsed under running water, but ensure the main body of the trimmer remains dry. Allow blades to air dry completely before reattaching or storing.
- Lubrication:** Periodically apply a small drop of clipper oil (not included) to the blades to maintain smooth operation and prevent rust.
- Storage:** Store the trimmer in a cool, dry place, away from direct sunlight and moisture. Keep it in its original packaging or a protective pouch to prevent damage.
- Battery Care:** To maintain battery health, avoid completely draining the battery frequently. Charge the trimmer regularly, even if not in use for extended periods.

6. TROUBLESHOOTING

If you encounter issues with your VGR V-030 trimmer, refer to the following common solutions:

Problem	Possible Cause	Solution
Trimmer does not turn on.	Low battery or no power connection.	Ensure the trimmer is fully charged or connected to a working power outlet.
Blades are pulling hair or cutting poorly.	Blades are dull, dirty, or not lubricated.	Clean the blades thoroughly and apply clipper oil. If the problem persists, blades may need replacement (contact support).
Trimmer makes unusual noise.	Blades are obstructed or misaligned.	Turn off and clean the blades. Check for any foreign objects. If noise continues, discontinue use and contact support.
