MAINTENANCE

To keep your Zinus Lorelai bed frame in optimal condition, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the metal frame with a damp cloth to remove dust and dirt. Avoid using harsh chemicals or abrasive cleaners, as these may damage the finish.
- **Periodic Checks:** Every few months, inspect all bolts and connections to ensure they remain tight. Re-tighten any loose bolts to maintain stability and prevent squeaking.
- **Avoid Excessive Weight:** Do not place excessive weight on the frame, especially concentrated in one area, to prevent bending or damage.

TROUBLESHOOTING

Squeaking Noises:

If your bed frame develops squeaking noises, it is most commonly due to loose connections. Follow these steps to resolve the issue:

1. Remove the mattress from the frame.
2. Carefully inspect all bolts and connections throughout the frame.
3. Using the provided Allen wrench, tighten any bolts that feel loose. Ensure all connections are secure.
4. Replace the mattress and test the frame. If squeaking persists, re-examine the connections or contact customer support.
