Bald Buddy 5-Blade Replacement Shaving Head User Manual

Brand: The Cut Buddy | Model: 850026

INTRODUCTION

Thank you for choosing The Cut Buddy Bald Buddy 5-Blade Replacement Shaving Head. This manual provides essential information for the proper use, maintenance, and care of your new shaving head. Designed for a smooth, close shave on various body parts, including the skull, face, body, arms, legs, back, and chest, this replacement head ensures optimal performance when used with compatible rotary shavers.

Please read this manual thoroughly before first use to ensure safe and effective operation.

IMPORTANT SAFETY INFORMATION

- Keep out of reach of children.
- Avoid contact with skin and eyes.
- If ingested, seek medical help immediately.

PRODUCT FEATURES

- **5 Rotary Blades:** Features flex-action, thin, waterproof blades that pivot and contour to reduce skin discomfort and razor bumps, providing a smooth, close shave. Can be operated wet or dry.
- **Designed for Coarse Hair:** Engineered to minimize nicks, pinches, and snags for an efficient and comfortable shave.

- **Easy to Clean:** Simply run the shaver head in a cup of water for a few seconds to remove hair buildup. Regular cleaning extends blade life.
- **Regular Replacement Recommended:** Switch out with a new shaver head every 3-6 months for optimal longevity and performance.
- **Broad Compatibility:** Can be used with various rotary shaver brands that utilize the same buckle system, allowing for fast and easy blade replacement.
- **Designed for All Users:** Suitable for all races, genders, skin types, and hair types.

Compatibile Models

Illustrates compatibility with various shaver models, explicitly stating it is not compatible with Skull Shaver or Remington brands.

SETUP

Initial Charging

Your Bald Buddy shaver does not come fully charged. Before first use, it is essential to fully charge the device. The charging port is located at the end of the handle. Gently remove the rubber plug covering the charging port using a thin tool like tweezers. Plug in the charger.

While charging, the battery symbol on the display will flash. Once fully charged, the battery symbol will stop flashing and remain constant. For newer models, a percentage from 0 to 100 will indicate the charge level.

Power On/Off

To turn on your shaver, simply press the power button. To turn it off, press the power button again.

Travel Lock Mode

The shaver features a travel lock mode to prevent accidental activation during transport. To activate or

deactivate the lock mode, hold down the power button for 5 seconds. When locked, a flashing lock symbol will appear on the display, and the shaver will not turn on until unlocked.

OPERATING INSTRUCTIONS

Once your Bald Buddy shaver is fully charged and the replacement head is securely attached, you are ready to shave. The 5 rotary blades are designed to pivot and contour to your skin, providing a smooth and close shave. You can use the shaver for wet or dry shaving, depending on your preference.

For optimal results, apply gentle, even pressure and move the shaver in circular motions over the desired area. The flexible heads are designed to adapt to the contours of your head and body, reducing irritation and ensuring an efficient shave.

MAINTENANCE

Routine Cleaning

To maintain optimal performance and extend the life of your shaver head, clean it during and after every use. If you notice the motor slowing down during shaving, it indicates hair buildup. Simply run the shaver head in a cup of water for about 30 seconds until the motor picks back up.

Deep Cleaning

For a more thorough clean, especially if the shaver head is clogged and the motor is struggling, a deep clean is recommended:

- 1. Remove Shaving Head:** Firmly hold the shaver head with one hand and the shaver handle with the other. Gently pull the head straight off. Do NOT twist or pull at an angle, as this can break the support bars.
- 2. Disassemble Blades:** The blade design features a hinge. Locate the small notches on the side of each blade. Gently pull back on the notch to open the blade unit. Do not overextend the hinge to prevent breakage.
- 3. Clean Components:** Remove any visible debris. Place the disassembled blades in a bowl of soapy water and let them soak to loosen any caked-up shaving cream or hair. You can also wipe clean the areas on the inside.
- 4. Reassemble Blades:** For the central blade, turn it counterclockwise to open and clockwise to close. Reassemble all blades by pushing them straight back into their respective slots.
- 5. Reattach Shaving Head:** Align the notches on the shaver head with the corresponding slots on the shaver body. Push the head straight in until you hear a click. Do NOT push at an angle.

6. **Final Rinse:** Once reassembled, run the shaver head in water again to flush out any remaining debris.

TROUBLESHOOTING

Shaver Not Turning On / Flashing Lock Symbol

If your shaver is not turning on and displays a flashing lock symbol, it is in travel lock mode. Hold the power button for 5 seconds to deactivate the lock mode and enable normal operation.

Motor Slowing Down / Auto Shut-off

If the shaver's motor slows down or the device automatically shuts off during use, this indicates excessive hair buildup in the shaving head. This auto-shutoff function protects the motor from damage. Perform a routine or deep clean as described in the Maintenance section to clear the buildup and restore full functionality.

SPECIFICATIONS

Attribute	Detail
Model Name	Bald Buddy
Item Model Number	850026
Package Dimensions	8.46 x 6.1 x 1.65 inches
Item Weight	1.76 ounces
Manufacturer	The Cut Buddy
Country of Origin	China
Recommended Uses	Scalp
Special Feature	Portable, Waterproof, Detachable Head, Ergonomic Design
