SAFETY INFORMATION

Your safety is paramount. Always adhere to the following safety guidelines:

- Use pool safety equipment properly.
- Never dive into the pool. Shallow water can cause serious injury or death.
- Always supervise children and non-swimmers.
- Ensure the pool area is clear of obstacles and hazards.
- Do not allow rough play or running around the pool.

SETUP INSTRUCTIONS

The Bestway Power Steel pool is designed for quick and easy assembly, typically requiring no additional tools. It is recommended to have 1-2 people for setup.

1. **Prepare the Site:** Choose a flat, level surface free of debris. Lay down the ground cloth (if included or purchased separately) to protect the pool liner.
2. **Lay Liner Flat:** Carefully unroll and lay the pool liner flat on the prepared ground. Ensure the drain valve is positioned correctly.

OPERATING INSTRUCTIONS

Once your pool is set up and filled, follow these guidelines for operation:

- **Filter Pump Operation:** Turn on the 1,000 GPH filter pump to begin circulating and filtering the pool water. Use the integrated timer for automated operation.
- **ChemConnect Dispenser:** Utilize the ChemConnect dispenser to maintain proper water chemistry. Follow the instructions provided with your pool chemicals for safe and effective use.
- **Water Draining:** To drain the pool, simply connect a garden hose to the flow control valve. This allows for efficient and controlled water drainage.

Image: Several people enjoying the Bestway Power Steel pool, with the external filter pump and hoses clearly visible.

MAINTENANCE

Regular maintenance is crucial for the longevity and cleanliness of your pool:

- **Water Chemistry:** Regularly test and adjust pool water chemistry (pH, chlorine, alkalinity) using a pool test kit and appropriate chemicals.
- **Filter Cartridge Cleaning/Replacement:** Clean the filter cartridge frequently (e.g., daily or every other day depending on usage) by rinsing it with a garden hose. Replace the cartridge every 2-4 weeks, or sooner if it remains dirty after cleaning.
- **Pool Cleaning:** Use a pool skimmer to remove debris from the surface and a pool vacuum to clean the bottom.
- **Pool Cover:** Use the included pool cover when the pool is not in use to prevent debris from entering and to reduce water evaporation.
- **Liner Inspection:** Periodically inspect the TriTech enhanced 3-ply PVC liner for any signs of wear, punctures, or damage. Address any issues promptly to prevent leaks.

TROUBLESHOOTING

If you encounter issues with your pool, consider the following common solutions:

Problem	Possible Cause	Solution
Poor Water Clarity	Insufficient filtration, improper chemical balance, dirty filter cartridge.	Run filter pump longer, test and adjust chemicals, clean or replace filter cartridge.
Water Leakage	Puncture in liner, loose hose connections, faulty drain valve.	Inspect liner for holes and use a repair kit. Tighten all hose connections. Ensure drain valve is fully closed.
Pump Not Operating	Power issue, clogged impeller, air in system.	Check power supply. Disconnect power and inspect impeller for blockages. Bleed air from the system as per pump manual.

For persistent issues, please refer to the detailed pump manual or contact Bestway customer support.

SPECIFICATIONS

Brand: Bestway

Model: 15123

Pool Size: 14' Diameter x 42" Height

Shape: Round

Color: Brown Wicker

Material: Alloy Steel, Polyvinyl Chloride (TriTech 3-ply PVC liner)

Water Capacity (90%): 2,941 Gallons (11,133 Liters)

Filter Pump Flow Rate: 1,000 Gallons per Hour (GPH)

Assembly Required: Yes

UPC: 193802248821
