WeatherTech 4516621-459453

WeatherTech Custom Fit FloorLiners

Model: 4516621-459453 (Tan)

Introduction

The WeatherTech FloorLiner is an advanced system of interior floor protection designed to precisely fit your vehicle's floor. These liners are engineered to contain fluids and debris, protecting your vehicle's carpet from spills, dirt, and wear. Utilizing digital laser measurements, each FloorLiner is custom-fit to the contours of your specific vehicle model, ensuring comprehensive coverage and a secure placement.

Vehicle Compatibility

These WeatherTech Custom Fit FloorLiners (Part Number: 4516621-459453) are specifically designed for:

- **2021-2023 Chrysler Pacifica Hybrid Models**
- **Only fits Limited Trim**

It is essential to confirm the fitment for your specific year, make, and model prior to installation to ensure proper function and safety.

Key Features

- **Precision Fit:** Each FloorLiner is digitally laser-measured to ensure a precise, custom fit to the vehicle's floor contours.
- **Advanced Material:** Constructed from a patented High-Density Tri-Extruded (HDTE) material, providing a rigid core for strength, surface friction to prevent movement, and a tactile feel.
- **Fluid Containment:** Advanced surfacing creates channels that direct fluids and debris into a lower reservoir, minimizing fluid movement while driving and keeping messes contained.
- **Retention Systems:** Designed to integrate with existing vehicle retention hooks or posts, ensuring the liners remain securely in place.
- **Durability:** Engineered to resist cracking, warping, and wear, providing long-lasting protection.

Image: A close-up view of the FloorLiner's surface, demonstrating the effectiveness of the channels in containing liquids and the design of the retention system that secures the mat.

Installation Instructions

Follow these steps for proper installation of your WeatherTech FloorLiners:

1. **Remove Old Floor Mats:** Before installing your new WeatherTech FloorLiners, ensure all existing floor mats are removed from the vehicle's carpet. Installing the FloorLiner over existing mats can interfere with pedal operation and create a safety hazard.
2. **Clean Vehicle Carpet (Optional):** For best results, clean and dry the vehicle's carpet before installation. This helps ensure the FloorLiner sits flush and prevents trapped moisture.
3. **Position Front Liners:** Carefully place the driver's side and passenger's side FloorLiners into their respective footwells. Align the liners with the vehicle's contours and any factory retention posts or hooks. Press down firmly around the retention points to secure the liners.
4. **Position Rear Liner:** Place the one-piece second/third row FloorLiner into the rear passenger area. Ensure it is

properly aligned and seated against the vehicle's floor and any seat tracks or consoles.

5. **Verify Fitment:** After installation, ensure that the FloorLiners do not interfere with the operation of the accelerator, brake, or clutch pedals. The liners should sit flat and securely without buckling or shifting.

Care and Maintenance

Maintaining your WeatherTech FloorLiners is simple and helps preserve their appearance and protective qualities:

- **Regular Cleaning:** For light dirt and dust, simply wipe the liners with a damp cloth.
- **Deep Cleaning:** For heavier dirt, mud, or spills, remove the FloorLiners from the vehicle. Use a hose to rinse off loose debris. For stubborn grime, use a mild soap and water solution or a dedicated WeatherTech cleaner. Scrub with a soft brush if necessary.
- **Drying:** Allow the FloorLiners to air dry completely before reinstalling them in your vehicle. Do not use harsh chemicals or abrasive cleaners, as these can damage the material.
- **Avoid Extreme Temperatures:** While durable, prolonged exposure to extreme heat or cold can affect the material. Store them flat if removed for extended periods.

Image: A hand removing a dirty WeatherTech FloorLiner from a vehicle, illustrating how the liner contains dirt, snow, and other debris, keeping the vehicle's carpet clean underneath.

Troubleshooting

If you encounter any issues with your WeatherTech FloorLiners, consider the following:

- **Improper Fit:** Double-check that all old floor mats have been removed. Ensure the FloorLiner is correctly aligned with the vehicle's contours and retention posts. Sometimes, a slight adjustment or re-seating is needed.
- **Liner Shifting:** Verify that the FloorLiner is properly engaged with the vehicle's factory retention hooks or posts. If your vehicle does not have these, the textured underside of the FloorLiner is designed to provide friction with the carpet to minimize movement.
- **Odor:** New products may have a slight odor initially. This is normal and will dissipate over time with ventilation. Cleaning the liners and allowing them to air out can help.
- **Stains:** For tough stains, use a dedicated automotive interior cleaner or WeatherTech's TechCare FloorLiner and FloorMat Cleaner. Follow the product instructions carefully.

Specifications

Attribute	Detail
Brand	WeatherTech
Model Number	4516621-459453
Color	Tan
Coverage Area	Complete Set (1st Row, 1-Piece 2nd/3rd Row)
Material	High-Density Tri-Extruded (HDTE)
Manufacturing	Designed, Engineered, and Manufactured in the USA
UPC	787765644501

Warranty and Support

WeatherTech products are backed by a limited lifetime warranty against defects in materials and workmanship. For specific warranty details, claims, or product support, please visit the official WeatherTech website or contact their customer service directly.
